

The figure displays a 64x64 grid representing the output of a 2D convolution operation. The grid is labeled with row and column indices from 0 to 63 on the left and right sides. The top 49 rows (0-48) are mostly white, indicating zero values. The bottom 15 rows (49-63) show a pattern of yellow and red cells, representing non-zero values. A red horizontal line is drawn across the grid at row 49. The grid is labeled with row and column indices from 0 to 63 on the left and right sides.
