2026 Tax Software Provider District of Columbia (DC) Letter of Intent

Welcome to the Income Tax Letter of Intent (LOI). If your software company intends to submit electronic and/or paper substitute forms to the District of Columbia, Office of Tax and Revenue (OTR) you will need to complete this form and submit it to efile@dc.gov.

By submitting this Letter of Intent (LOI) to OTR you agree to meet our standards for software provider registration, tax preparation software, and substitute forms. If you do not meet the standards and requirements explained in this LOI or provide an incomplete form, we may deny your application or revoke your approved software provider status and reject all electronic and/or paper returns submitted using your products.

You must complete a separate LOI for each unique product your company offers.

Note: If you are a new Software Provider who has not filed city/state income tax returns with any city or state agencies, you must have passed assurance testing with the IRS. Attach documentation from the IRS demonstrating you have successfully tested with the IRS.

- Complete and submit this LOI by 10/30/2026.

Electronic Amended Returns

OTR requests you to support electronic amended returns for those available through MeF.

Agency Requirements

This section identifies agency requirements and expectations of new and existing Software Providers and the software product.

Issue Notification and Resolution Requirements

This section represents the OTR issue notification and issue resolution standards.

Notify the agency if any forms and/or payments you support are not ready during the filing season after agency approval. Submit this information via email to efile@dc.gov and include the date the electronic or paper product will be ready to submit.

System Security Requirements

OTR does not prescribe the security requirements for your system. You are responsible for implementing appropriate security measures to protect taxpayers and their information in your system. You must apply security measures to protect taxpayer information in your system when it is on-line, off-line, at rest, and in transit.

Questionable Informational Returns

The OTR aligns with the IRS in their reporting fraud and abuse requirements within the IRS e-file program. You should report fraudulent or abusive returns, including those with questionable W-2s or other informational returns.

Security Incident Requirements

If your company identifies an issue, incident, or threat of significance, you should:

- Conduct an initial analysis and immediately take steps to block or contain the issue.
- Share your initial assessment with OTR which includes:
 - o Date and time of the incident
 - o Date and time the incident was discovered.
 - o How the incident was discovered.
 - o Description of the incident.
 - o Data involved, including specific data elements if known.
 - o Actual or estimated number of taxpayer records involved.
 - o Infrastructure/systems involved.
 - o Examples of information communicated to customers or other external audiences about the issue.
 - o Plan for correcting the issue and if appropriate, notifying those impacted.
- Provide any additional information you have that may be important to us in identifying and resolving the incident.
- If applicable, work with us to develop and distribute communication material and instructions for customers.

In addition to the requirements stated above, Software Providers executing this agreement are subject to the data breach notification laws and regulations of DC, including D.C. Code § 28–3852.

Data breaches, security incidents, or other improper disclosures of taxpayer data must be reported to the affected taxpayers and must be emailed to the D.C. Office of Attorney General (OAG)'s Office of Consumer Protection: databreach@dc.gov

Under D.C. Code § 28–3852(a-1), both taxpayers and OAG must be notified in the most expedient time possible and without unreasonable delay. The notice must include:

- To the extent possible, a description of the categories of information that were subject to the breach;
- Contact information for the company making the notification;
- The toll-free telephone numbers and addresses for the major consumer reporting agencies;
- A statement explaining the right to obtain a security freeze free of charge under federal law and information on how a resident may request a security freeze; and
- The toll-free telephone numbers and addresses for the Federal Trade Commission and OAG.

Production Return Submission Requirements

All returns generated from this software must be e-Filed or printed from the approved software or a subsequent product update.

Product Updates

Desktop product users who attempt to file 10 or more business days after a production release must be required to download and apply the product update.

Schemas

Your software must follow the schema requirements. Find OTR schema requirements on the SES.

Testing and Submissions

All e-File ATS and substitute forms tests submitted during the approval process must be created in, and originate from, the actual software. OTR Forms team generally does not review/approve non-scannable forms without barcode. However, you may be required to submit selected non-scannable forms for review/approval as a part of e-File ATS. Until such forms are reviewed and approved by e-file team, you may not submit MeF returns in production. Additionally, we request that any DC OTR worksheets utilized within your software be included with your test submissions for our review.

Validation of Data Elements

You must validate the following pre-populated data elements:

- State driver's license/State issued identification data elements
- Filer address
- Bank account information

Software Limitations and Exceptions

Check all forms or schedules you support. If there are any limitations after completing the LOI, please provide it before you submit ATS testing. Provide any exceptions to forms or schedules you support based on the type of software during ATS; for example, if a DIY product does not support the same schedules as a professional product. Failure to provide this information could delay the review of your test returns.
