Note: Reproduced forms must meet the requirements as established in this document and our current Forms Reproduction Policy.

FORM M-36 (Rev. 2018)**General Information and Key From Image Specifications**

This document provides software vendors with the requirements for reproducing Form M-36. Form M-36 requires manually keying data from the image or KFI. A 1D barcode must be present on page 1 of the form.

The form must be an exact replica of the official version of the form with respect to layout, data dots, shading and content.

Substitute KFI forms **MUST** meet the requirements as established in this document and our current Forms Reproduction Policy, and be approved prior to release or distribution.

GENERAL INFORMATION**1. Substitute Form**

- Photocopies of the form must not be submitted to the Department for processing. This will distort the 1D barcode.

2. Paper and Ink

- The paper size is 8.5 inches by 11 inches, the same size as the Department's original form. The paper weight must be at least 20 pound white bond and the page orientation is portrait.
- Black ink should be used in printing the text on the form and the variable data.

3. Variable Data

- All variable data fields must utilize 10 pt Courier font, and all variable text data must be in uppercase letters. Text labels must not touch variable data.

4. Testing and Approval of the KFI Form

- A review of the form will be done based on processing specifications. It is assumed that there are no spelling errors, incorrect or missing words, missing lines, etc.
- 1 test sample is required to be submitted. The sample must be an original. Photocopies, fax submissions, etc. will not be accepted.
- It will require 1 to 2 weeks, upon receipt by the Department, to verify the accuracy of the submitted sample.
- Approval of the facsimile must be obtained from the Department **prior** to filing.

KEY FROM IMAGE (KFI) SPECIFICATIONS**1. Layout**

- The form must be an exact replica of the official Form M-36 with respect to layout, data dots, shading, and content.

2. Hawaii Vendor I.D. Number

- Print your 2-digit Hawaii Vendor I.D. Number preceded with "ID NO" label (see exhibit for exact placement).

Pages 1 and 2: The 2-digit Hawaii Vendor I.D. Number should begin at column 44, row 65.

4. Barcode

- A 1D barcode is specific to the form. The property of the 1D symbology barcode uses 3 of 9 (Code 39).
- Placement of the barcode is as follows:

Page 1: The left bottom corner of the 1D barcode is at the beginning of column 6 and at the bottom of row 10.

- Height of the barcode is 0.5 inch.
- Length of the barcode is approximately 2 inches.
- Density of narrow bar width is set to 20 mils with resolution set to 300 dpi.

- Narrow to Wide Ratio is set to 2.
- A 1/4 inch minimum clearance (blank space) must surround the barcode with the exception of the text required to be printed underneath the barcode.
- DO NOT stretch the barcode image.
- The required barcode is FDT181 for page 1:

FDT181

- The barcode includes the form number code (FD), type of form (T), form year (18), and page number (1). There are no hyphens.
- Use of the Department of Taxation's JPEG file of the barcode is preferable. The JPEG file can be found at our software vendor website.
- DO NOT use Windows Metafile Format (wmf). This format causes a very low read rate by the Department's IBML scanners.
