#### Introduction

The Idaho State Tax Commission (ISTC) accepts substitute or reproduced tax forms. These forms must meet the requirements of ISTC's original forms. ISTC has established these guidelines and standards for software developers, computer tax processors, business forms companies, and any other individual or business that plans to market, distribute, or file substitute or reproduced tax forms.

#### **Approval for Reproduced or Substitute Tax Returns**

A company that develops any substitute return must get approval from ISTC before releasing or distributing the substitute return to its customers or clients. Any changes to the return by the developer after the original approval must be resubmitted for additional approval.

In an effort to protect confidential taxpayer information, ISTC will not send out Employer Identification Numbers (EIN) and Social Security Numbers (SSN) on ISTC generated documents. A ten digit reference number will be used for all permit based documents that are mailed by ISTC. All substitute tax returns from vendors are still expected to have the EIN and SSN number placed according to the specifications listed below.

The approval process begins with a visual verification of all scan lines, margins, data fields, barcode validation, and anchor placement to quickly identify layout errors. The approval process is completed through our imaging equipment for intelligent character recognition, system validation, and check digit verification.

Developers will receive notification of their forms results within 10 business days. All reviewed returns will be faxed or emailed with a statement indicating approval or notice of required changes.

Returns that do not change from one year to the next and have been approved previously do not need to be resubmitted for approval.

When applicable, please adhere to the NACTP standards (<a href="http://www.nactp.org/">http://www.nactp.org/</a>).

On a developer's first subdocument submission, a *Developer Contact Information Form* will be sent to the development company. This information will only be used by subdocument approval staff. Please return all of the information to ISTC within five business days.

For all tax types included in this document, ISTC requires one blank sample copy and five data filled copies. The data filled copies must have variable data in all data entered positions on each return.

Substitute forms will not be accepted by fax. Submit all substitute forms in PDF form to:

substituteforms@tax.idaho.gov

#### **Helpful Hints**

- Substitute returns must contain all current data elements included on the state-provided form.
- Substitute returns must be proofread prior to submission to the state.
- Substitute forms must include your NACTP vendor ID number and the form version date.
- You may reproduce any Idaho scannable tax return. The reproductions must be identical to the official Tax Commission returns.
- The Tax Commission will verify accuracy of line references, data dots, boxes, and any reference to percentages. The Tax Commission will check the revision dates, header of the returns, form name, year, response boxes, and barcodes for accuracy. The Tax Commission won't verify verbiage or spelling.

Tax Commission full-page tax returns are optically read on high-speed scanners. Original returns should always be submitted. All optically-scanned returns have anchors printed at the corners of the form and a large box for tax due/refund amounts. All characters and numbers must be centered within each box. All substitute returns should be printed on a laser printer if possible. Returns printed on ink jet or dot matrix printers may be rejected if processing is adversely affected.

#### **Margins**

Margins on substitute returns should be the same as on the official Tax Commission return.

#### **Shading**

Some official Tax Commission returns contain shading. Please include shading where shown on the official Tax Commission returns

#### **Form Fonts**

All substitute returns should be printed in a font that closely resembles the font used on the original return.

#### **Keying Symbols and Line Numbers**

Keying symbols such as data dots and line numbers are essential codes to the Tax Commission's returns processing system. All substitute full-page tax returns must include these symbols and line numbers.

#### 1-D Barcode

The Tax Commission uses an Interleaved 2 of 5 human readable 1-D barcode using 36 point barcode font. The type may range from "Bar 25i b HR" to "Bar 25i f HR". The barcode is located in the lower right corner of each page of the scannable full page return except for Form 1450; see sample attached.

\*Your barcode data must contain your specific NACTP vendor code. This data varies by return and return page number. A list of your barcode data may be obtained via email from substituteforms@tax.idaho.gov or by calling (208) 334-7783.

#### **Check Digit Validation**

The calculation for the check digit is *Modulus 10 Luhns Sum of Digits*. It can be found in the scan line of all of the OCR scannable tax returns. The check digit is found in position <u>39</u> of the scan line. The calculation to validate the check digit is performed on positions <u>1 through 38</u> of the scan line. The spaces separating two fields are **not** included in the calculations.

Numbers 0-9 are equal to their face value.

Numbers 10 and above are equal to the sum of their two digits.

**Example:** 10 = 1 + 0 = 1

14 = 1 + 4 = 5

18 = 1 + 8 = 9

The letters of the alphabet are valued as follows:

A	В	C	D	Е	F	G	Н	I	J	K	L	M	N	О	P	Q	R	S	T	U	V	W	X	Y	Z
1	2	3	4	5	6	7	8	9	1	2	3	4	5	6	7	8	9	2	3	4	5	6	7	8	9

AMPERSAND (&) = 0, DASH (-) = 0, AND BLANK SPACES = 0

WEIGHTING FACTOR = 121212121 2121212 1212 12 12 12 12 1 21 C

Check digit validation calculations are done as follows:

```

- TOTAL 60
  - 1. Sum of the digits. The sum in this example equals 60.
  - 2. Divide the sum by 10. 60/10 = 6 with a remainder of 0.
  - 3. Subtract the remainder from 10. 10 0 = 10.
  - 4. The check digit equals 0.

#### Note:

The "C" used in the example of weighting factor on the previous page designates the location of the check digit. It has no other purpose.

#### Note:

If the remainder is equal to zero, the check digit is 0.

#### **Name Control Guidelines**

Name control must be the first **four** letters and/or characters of the business name. Do **not** include spaces. Do **not** include any punctuation with the exception of the ampersand (&), and the hyphen (-). If the legal business name includes the first word "The", go to the next word to begin the four-letter name control (example shown below). If the name control is less than four letters, use the following examples to help you.

#### **Business Name Control Samples**

ABC The name control would be ABC (Space at the end after the "C") **987654321 000456321 ABC 05 1213 A 95 6** 

AB C The name control would also be ABC (Remove spaces in the middle and compact the letters. Space is at the end)

987654321 000456321 ABC 05 1213 A 95 6

A+B, Inc: The name control would be ABIN (Remove the "+" and the comma) **987654321 000456321 ABIN 05 1213 A 95 9** 

A/B/C The name control would be ABC (Remove the "/"s and compact the letters. Space after "C") **987654321 000456321 ABC 05 1213 A 95 6** 

A/B/C Company The name control would be ABCC (Remove the "/"s and compact the letters) **987654321 000456321 ABCC 05 1213 A 95 0** 

John Doe Inc. (Business): The name control would be JOHN **987654321 000456321 JOHN 05 1213 A 95 1** 

The ABC Company: The name control would be ABCC (Disregard "The" as part of the name control) **987654321 000456321 ABCC 05 1213 A 95 0** 

Spaces are placed only at the end of a name control. If the legal business name contains characters other than & (ampersand) or - (hyphen), remove them from the name control and collapse the letters.
