

Indiana Department of Revenue 1D Barcode Specifications

Tax Year 2024

Version 1.0 2024

One-dimensional (1D) barcodes are printed on most Indiana Department of Revenue (DOR) forms to conform with DOR technology. These codes identify the specific form, page and the producer (vendor) of the form.

1D Barcode Specifications

Form Identification Barcode:

11 Characters (numeric), 3 of 9 one dimension. A “non-proprietary” 3 of 9 barcode font that prints the same size as what is printed on the sample forms is acceptable.

Placement:

The barcode location and surrounding clear space must follow the sample form on the website.

Code Definition: *FFYYVSPPP*

*	Start bar – this is a constant that must always be placed in front of the barcoded data.
FFF	Form number, identifying specific form.
YY	Form template year.
V	Form version.
S	Sequence or page number within the form that has data to be captured.
PPPP	Producer or vendor – NACTP (National Association of Computerized Tax Processors) assigned, 4-digit vendor code to identify the producer of the form.
*	Stop bar – this is a constant that must always be placed at the end of the barcoded data.

Example (*IT-40, Page 1*) using 18-point AdvC39a font:

15124111694 prints as:

Eye-readable code prints below in 8-point Arial without asterisks:

15124111694

Determining the Correct Barcode

Sample forms on DOR's website show the 1D barcode and placement. Year, version and sequence number can be determined by the codes on the sample forms. **Software developers need to modify the sample barcode and text below to identify their software.** Note the following:

- A 4-digit vendor code has been assigned to vendors by NACTP.
- A barcode "24100000000" indicates the page has not been set up for OCR/ICR data capture. If this code is on a sample form, duplicate it without any changes. It should NOT be vendor specific. The NACTP vendor code should print in the lower left corner of these pages.
- When a form is updated, be sure to check the sample form and verify you are using the correct version number in the barcode. New revisions may result in the version number being updated. Forms using the 1D barcode are listed below:

Form Name	1D Barcode Form Number
Form IT-9	012
Form ES-40	149
