DIRECTOR BRENDAN BEATTY

**To:** Tax Software Developers

**Concerning:** Encouraging 2D Barcode Usage for Form 2 Submissions

We are writing to share some important insights and encourage the use of 2D barcodes for tax year 2025 Form 2 submissions.

Throughout our recent pilot run with the 2D barcode technology; we have gathered a wealth of valuable information. This season demonstrated not only the potential for significant efficiency gains but also how the accuracy of data processing can be notably improved. As such, we are optimistic about the benefits this technology can bring to our operations moving forward.

We strongly encourage you to submit your Form 2 with the 2D barcode for this year. Doing so will not only align with our streamlined processing objectives but will also play a crucial role in expediting the form testing process. By adopting the 2D barcode, we can ensure a smoother and faster validation procedure, ultimately benefiting both your operations and ours.

Thank you for your cooperation and for embracing this shift in our annual processes. Should you have any questions or need further clarification, please do not hesitate to reach out.

Thank you,

Information Governance Unit
