New Code §801 replaces this "three-phase" design with a system that imposes current tax, at normal corporate rates, on the company's total net income — its "life insurance company taxable income" ("LICTI"). Abolition of the phase system is accomplished by restricting the reach of the policyholder dividend deduction limit to mutual life insurance companies, eliminating the deferral of one-half of the excess of gain from operations over taxable investment income, and also eliminating the "special" items of deduction. New Code §801(a)(2) preserves the availability of the alternative tax for net capital gains (comparable to former Code §802(a)(2)). LICTI is defined in new Code §801(b) simply as "life insurance gross income" minus "life insurance deductions." (*See* also the discussion under new Code §815, *infra.*)

B. Section 803 — Life Insurance Gross Income

Under new Code §803(a), "life insurance gross income" consists of the following items:

1. Premiums

New Code §803(a)(1) and (b) includes in gross income all "premiums and other consideration" received under insurance and annuity contracts, thus preserving the provisions of former Code §809(c)(1). Specifically included are fees, deposits, assessments, advance or prepaid premiums, and consideration received for reinsurance. Also included are premiums for supplementary contracts, policy proceeds left on deposit with the company, and the amount of policyholder dividends reimbursed to the taxpayer by another company under a reinsurance agreement. A company may reduce its gross premiums by the amount of any "return premiums" (premiums returned by reason of policy cancellation or errors in determining premiums) and premiums paid to other companies under indemnity reinsurance agreements.[6]

2. Net Decrease in Reserves

Like former Code §809(c)(2), new Code §803(a)(2) requires a life insurance company to include in income any net decrease in its insurance reserves for the taxable year (as described in the discussion under new Code §807, *infra*). As explained in the discussion of new Code §809, *infra*, the amount of income under new Code §803(a)(2) may be increased in the case of a mutual life insurance company.

3. Other Amounts

New Code §803(a)(3), like former Code §809(c)(3), requires a company to include in its gross income all amounts, not included under the two categories described above, which, under Subtitle A of the Code, are "includible in gross income." This "catch-all" provision brings into a company's gross income all of its investment income as well as its capital gains (separately dealt with in former Code §§804 and 809(b)).

C. Section 805 — General Deductions

Under new Code §804, the "life insurance deductions" allowed in computing a company's taxable income are listed as (1) the "general deductions" described in new Code §805, (2) the "special life insurance company deduction" as set forth in new Code §806(a), and, if applicable, (3) the "small life insurance company deduction" of new Code §806(b). The general deductions essentially are the same deductions (with some modifications) that were allowed under the 1959 Act. In fact, the only 1959 Act deductions not allowed to any degree under the new law are the "special" deductions previously allowed for "nonparticipating" contracts under former Code §809(d)(5) and for certain accident and health ("A&H") and group life insurance contracts under former Code §809(d)(6), together with the "small business" deduction of former Code §809(d)(10). These and certain other provisions of the 1959 Act are replaced by the new Code §806 deductions.

The "general deductions" allowed by new Code §805 are as follows:

1. Death Benefits, etc.

New Code §805(a)(1) allows the same deduction for death benefits, claims, losses, etc., under insurance and annuity contracts that was allowed by former Code §809(d)(1).[7]

2. Net Increase in Reserves

The deduction for the annual net increase in insurance reserves (as listed in new Code §807(c)) allowed by new Code §805(a)(2) is essentially similar to that allowed by former Code §809(d)(2). It does differ formally in two respects, however. First, the deduction for reserve increases now includes increases due to assumed interest. That is, in contrast with the 1959 Act, the new law does not require closing reserves to be reduced by the "required interest," nor is this required interest separately excluded from the company's income. Second, for purposes of determining the net increase (or decrease) in insurance reserves, the closing reserve balance is now reduced by the "policyholders' share" of tax-exempt interest (this "share" in defined by the so-called "proration" formula of new Code §812). This treatment replaces former Code §809(d)(8)(A)(i), which allowed a deduction for the "company's share" of tax-exempt interest. Instead, under the new law, only the "policyholders' share" is ever taken into account in computing the company's income (via the reduction in the closing reserve balance), and no deduction for the "company's share" is necessary.

3. Policyholder Dividends

Under new Code §805(a)(3)(as under former Code §809(d) (3)), life insurance companies are allowed a deduction for dividends to policyholders during the taxable year, as defined in new Code §808. Stock life insurance companies are allowed an unlimited deduction for the full amount of such dividends, thereby eliminating the so-called "excess interest" controversy under the 1959 Act.[8] The policyholder dividend deduction remains limited in the case of mutual life insurance companies, however, pursuant to the provisions of new Code §809.

It should be noted that the new law effects one significant change in the basic standard for determining the extent to which, *before* application of the limitation on such dividends, they meet the test for deductibility. Under former Code §811, a company could include in policyholder dividends the amount of its annual statement "reserve" for dividends payable during the following year. Under the new law (as prescribed in new Code §808), such amounts are deductible *only* if they are actually paid or are properly *accrued* under the general accrual accounting standards imposed on life insurance companies. However, as part of the "fresh start" rules (described in connection with new Code §807, *infra*), any difference in the dividend deduction from 1983 to 1984 due to this change that would otherwise result in income is not taken into account.

The new Code §805(a)(7) deduction for policyholder dividends reimbursed under a reinsurance agreement is essentially the same as the deduction under former Code §809(d)(12) (as added by TEFRA), and is similarly not subject to the dividend deduction limit generally applicable to mutual companies.

4. Dividends Received

As under former Code §809(d)(8)(A)(ii), new Code §805(a)(4) allows a life insurance company a limited version of the deduction for intercorporate dividends received, otherwise allowable under Code §§243, 244, and 245. In general, it may deduct the "company's share" of such dividends.[9] However, in the case of "100 percent dividends" — defined generally in new Code §805(a)(4)(C) as dividends that would be fully deductible under §§243 or 244 of the Code — the company is allowed a deduction for the full amount of the dividends, except to the extent that the dividend is itself attributable to tax-exempt interest or intercorporate dividends (*i.e.*, as received by the controlled subsidiary). The manner in which non-100 percent dividends are divided between the company and its policyholders, and the "tracing" rule for 100 percent dividends, are discussed below in connection with the "proration" formula of new Code §812.

5. Operations Loss Deduction

The operations loss deduction allowed under new Code §§805(a)(5) and 810 is essentially the same as, and is treated as a continuation of, that allowed under former Code §§809(d)(4) and 812 (modified only to take account of certain definitional changes under the new law).

6. Assumption Reinsurance

The deduction allowed under new Code §805(a)(6) for consideration paid to another insurance company for assuming liability under insurance and annuity contracts is the same as that allowed under former Code §809(d)(7).

7. Other General Corporate Deductions

As under the 1959 Act, a life insurance company is entitled under new Code §805(a)(8) to "all other deductions" allowed by Subtitle A of the Code for purposes of computing taxable income, subject to certain modifications. The "modifications" under new Code §805(b) are nearly identical to those under former Code §809(e). Since life insurance companies are taxed on a "single-phase" system under the new law, no specific deduction is allowed for investment expenses, unlike the case with the 1959 Act. Instead, such expenses fall within the new Code §805(a)(8) "catch-all" provision.

D. Section 806 — Special Deductions

Under the 1959 Act, a life insurance company's net taxable income for any year was determined, in the case of a mutual life insurance company, after allowance of the deductible portion of policyholder dividends, and in the case of a stock company, after taking into account the deductible portion of policyholder dividends (if any), the deductible portion of the "special" deductions under former Code §809(d)(5) and (6), and the 50 percent deferral of any excess of gain from operations over taxable investment income. One of the principal objectives of these provisions was to moderate the tax burden imposed on the life insurance industry.

Like the 1959 Act, the new law was fashioned with an eye to moderating the tax burden on life insurance companies so that they would not be taxed in a way that was disproportionate in comparison with the taxation of other financial institutions.[10] Under the new law, this is accomplished by allowing a company to take two special deductions under new Code §806: the "special life insurance company deduction," and (if applicable) the "small life insurance company deduction."

In setting forth the rules pertaining to these new special deductions, new Code §806(c)(3)(C) makes a significant substantive change in the way that "bottom line" taxable income is computed in the case of a life insurance company that (1) operates a "noninsurance business" (within the meaning of the rules discussed next) and (2) incurs a loss with respect to that business for the taxable year. In such a situation, in contrast to the result under the 1959 Act, the loss incurred on that business is not permitted to offset and reduce the company's insurance-related taxable income in full. Rather, by analogy to the treatment of the losses of nonlife subsidiaries that are consolidated with life company income for tax purposes (as provided under Code §1503(c)), such a noninsurance business loss may be "absorbed" by the insurance-related income in an amount not exceeding 35 percent of the lesser of the loss or the income.[11] Hence, unlike other corporations, life insurance companies — at least those with noninsurance business losses — may show taxable income and losses in the same taxable year.

1. The Special Life Insurance Company Deduction

Under new Code §§804(2) and 806(a), a life insurance company is entitled to a "special life insurance company deduction" equal to 20 percent of the excess of its "tentative LICTI" for the taxable year over the amount (if any) of its "small life insurance company deduction" for the year. For this purpose, "tentative LICTI" equals a company's LICTI (otherwise computed) with two modifications. First, under new Code §806(c)(1), the special life insurance company deduction and the small life insurance company deduction are not taken into account in determining tentative LICTI. Second, items attributable to noninsurance businesses are similarly excluded by new Code §806(c)(2).

A "noninsurance business" is defined in new Code §806(c)(3)(A) as "any trade or business which is not an insurance business." While that definition is hardly illuminating, the Report of the House Ways and Means Committee sheds a little more light:

> "Generally, insurance business refers to the business activity of issuing insurance and annuity contracts, together with investment activities and administrative services that are required to support or are substantially related to the contracts issued or reinsured by the taxpayer. Thus, for example, if a life insurance company ran a manufacturing business directly (rather than owning stock in the company), any income or deduction items attributable to the manufacturing business would not be taken into account in computing tentative LICTI. Likewise, if a life insurance company acted as a broker, buying and selling securities directly for the public, such activities would not be investment activities that are necessary to support contractual obligations to policyholders in the insurance business, and would be noninsurance business." [12]

Further, new Code §806(c)(3)(B) treats an "activity" as an insurance business for this purpose if:

> (a) it is of a "type traditionally carried on by life insurance companies for investment purposes," and
>
> (b) either the activity (other than one involving real estate) does not rise to the level of an "active trade or business" or it involves the performance of administrative services in connection with plans providing life insurance, pension, or A&H benefits.[13]

The adoption of this distinction between insurance and noninsurance business may well have been necessary to prevent the unlimited acquisition of unrelated operating businesses by insurance companies solely to avoid a portion of the tax otherwise applicable to the incomes of those businesses.[14] Nonetheless, the distinction may well prove to be difficult to interpret and administer, for both the insurance industry and the IRS.[15]

A special rule applies, under Act §217(c), in computing the tentative LICTI of a corporation domiciled or having its principal place of business in one of four states [16] and which acquired the assets of one or more life insurance companies after 1979 and before April 1, 1983, the basis of such assets having been determined under Code §334(b)(2) or §338. In such a case, the tentative LICTI of the corporation is increased by deductions allowable for amortization of acquired insurance in force (and any attributable operations loss deduction), and such deductions are then taken *after* allowance of the special (or small) life insurance company deduction. The effect of this provision is to allow those deductions against income at the standard corporate rate of 46 percent (rather than at the 36.8 percent rate which

© 1984 Tax Management Inc., a subsidiary of The Bureau of National Affairs, Inc.

would otherwise apply because of the special deduction, *i.e.*, 46 percent minus (20 percent times 46 percent) equals 36.8 percent).

To summarize, "tentative LICTI" generally equals LICTI disregarding the special and small life insurance company deductions and any items attributable to noninsurance businesses. After subtracting any small life insurance company deduction from tentative LICTI, a company is allowed a deduction equal to 20 percent of the remaining amount. However, under new Code §806(d), all *life insurance companies* which are members of a *controlled group* are treated as a single life insurance company for this purpose.[17] Thus, the "overall" tentative LICTI of all life insurance company members of the group is computed — with the result that any loss members lower that tentative LICTI figure — and a group special or small life insurance company deduction is determined.[18] That group deduction is then allocated among the life insurance companies in the group according to their respective individual tentative LICTIs.

Finally, it should be noted that, when the alternative tax computation under new Code §807(a)(2) is applicable, tentative LICTI is also reduced by the amount of any net capital gain (determined without regard to any items attributable to a noninsurance business).

2. The Small Life Insurance Company Deduction

In line with the historically favorable treatment accorded small companies in the Code, new Code §§804(3) and 806(b) provide for smaller life insurance companies an additional, special "small life insurance company deduction." [19] This deduction equals 60 percent of a life insurance company's tentative LICTI up to $3,000,000; thus, the small life insurance company deduction can never exceed $1,800,000. If a life insurance company's tentative LICTI exceeds $3,000,000, the amount of the small life insurance company deduction is reduced (phased-out) by an amount equal to 15 percent times the tentative LICTI in excess of $3,000,000. Hence, if a company's tentative LICTI is $15,000,000 or more, the company is not entitled to any small life insurance company deduction.

Tentative LICTI is determined for the small life insurance company deduction in the same manner as for the special life insurance company deduction. However, in keeping with the congressional desire to benefit small companies, the small life insurance company deduction, unlike the special life insurance company deduction, is available only to a life insurance company the assets of which for the taxable year do not exceed $500,000,000.[20] Further, the small life insurance company deduction, like the special life insurance company deduction, is determined on a controlled group basis for life insurance companies in the group. In addition, for purposes of the small life insurance company deduction asset test, all members of the controlled group (whether life companies or not) are treated as one company.

E. Section 807 — Reserves

Since 1909, a life insurance company has been allowed a deduction for additions to its insurance reserves. Under the "total income" approach in effect during the period 1909-1920, a net increase in reserves was deductible by a life insurance company and a net decrease in reserves was includible in its income. From 1921 through 1957, on the other hand, life insurance companies were taxed only on their "free" investment income, and were allowed to deduct only the interest additions to their reserves. Beginning in 1958, under former Code §§809 and 810, increases and decreases in reserves were treated in two steps: (1) any net increase or net decrease in reserves, aside from "required interest," gave rise to an item of deduction or income (as appropriate); and (2) required interest was excluded from the company's income. In a similar fashion, under new Code §§803, 805, and 807, a net increase in reserves (including interest additions) is deductible, and a net decrease gives rise to income.[21] The precise impact of these rules depends on a variety of factors, including the reserves taken into account and the manner in which they are computed.

1. Reserves Taken Into Account

Under new Code §807(c) the insurance reserves giving rise to income (if there is a net decrease) or a deduction (if there is a net increase) are listed as follows:

(a) Life insurance reserves, as defined in former Code §801(b);

(b) Unearned premiums and unpaid losses included is "total reserves";

(c) Discounted liabilities for insurance or annuity contracts not currently involving life, health, or accident contingencies;

(d) Dividend accumulations and other amounts held at interest under insurance or annuity contracts;

(e) Advance premiums and premium deposit fund liabilities; and

(f) Reasonable retired lives and premium stabilization reserves.

As explained in the Report of the House Ways and Means Committee:

> "The six items specified in the bill generally are the same items as under present law [the 1959 Act]. However, the bill requires that the amount of the contingency reserves held for retired lives and premium stabilization be reasonable in relation to the amount of coverage provided by, and the loss experience suffered by, the company with respect to the underlying group contract. Also, the bill requires that the discount rate used by the companies for a reserve amount for an insurance and annuity obligation that does not involve life, accident, or health contingencies be the higher of the prevailing State assumed interest rate or the interest rate assumed by the company in determining the guaranteed benefits. These rates are to be determined when the obligation first ceases to involve life, accident, or health contingencies." [22]

Further, both Committee Reports make clear that a net increase or decrease in the new Code §807(c)(1) "life insurance reserves" is to be taken into account as such, regardless of whether those reserves are "properly" computed. Finally, the Reports clarify that certain types of liabilities are included in the Code §807(c) list of reserves:

© 1984 Tax Management Inc., a subsidiary of The Bureau of National Affairs, Inc.

liabilities for new Code §816(f) "guaranteed investment contracts" with temporary mortality guarantees are said to constitute Code §807(c)(3) or (4) reserves, and liabilities for life insurance contracts failing the requirements of new Code §7702 are classified as Code §807(c)(4) reserves.[23]

2. Reserve Amounts

Under the 1959 Act, the amounts of a company's insurance reserves at the end of the taxable year (with respect to which any net increase or decrease was determined) generally were the amounts as reported to state regulators on the company's annual statement for that year in accordance with the requirements of State law. A significant exception appeared as former Code §818(c). To neutralize the tax consequences of a company's use of "preliminary term" reserves (which produce "weaker" reserves because they make allowance for initial expenses of writing new business) in lieu of net level reserves for annual statement purposes, former Code §818(c) permitted a company to elect to "revalue," solely for tax purposes, its preliminary term reserves on a net level basis.

Under new Code §807(d), the amount of the life insurance reserves taken into account for tax purposes under Code §807(c)(1) may differ from the amounts as reported for State regulatory accounting purposes. As explained below, in determining the deduction for any net increase in reserves (or the income resulting from any net decrease), the new law, in essence, requires an insurance company (whether or not taxed as a life company) to compute its life insurance reserves using prescribed methods, interest rates, and mortality tables. These features of the new law reflect the view of the government that, under the 1959 Act, life insurance reserves were in many cases economically overstated, principally because of the low assumed interest rates which could be used under State law in valuing reserves.[24] It should be noted that these new requirements apply *only to life insurance reserves, and only to the computation* of the deductible amount of such reserves. As such, they have no bearing for purposes of determining life company qualification, and they do not apply to the other types of reserves listed in new Code §807(c)(2)-(6).

a. Reserve Computation Rules—In General

Under new Code §807(d)(1), the amount of the "life insurance reserve" for any contract is the *greater* of (1) the "net surrender value" of the contract, or (2) the reserve as computed under new statutorily prescribed ("Federal") standards. In no event is this amount permitted to exceed the annual statement reserve figure for the taxable year.[25] This comparison is generally to be made on a policy-by-policy basis (though "grouping" of policies is permitted at least for purposes of determining the greater of the net surrender value/Federal-standard-reserve). In performing this operation, the reserves for all benefits under a policy are to be aggregated before comparison with the policy's net surrender value. As the Committee Reports state:[26]

> "Generally, the comparison of the net surrender value of a contract and the Federally prescribed reserves for the benefits under the contract is made on a [sic] aggregate benefit basis; however, the comparison may be made on a benefit-by-benefit basis if the benefit is a qualifying supplemental benefit or qualifying substandard risk (*see* discussion below on special rules). Also, the comparison of contract cash surrender values and Federally prescribed reserves can be done on a group basis (*i.e.*, grouping contracts that are identical as to plan of insurance, date of issue, age of issue, etc.) or on an individual contract basis."

For purposes of this comparison, new Code §807(e)(1) defines the "net surrender value" of any contract as its cash value reduced by any surrender penalty or charge (except that any market value adjustment required on surrender is not taken into account). In the case of a "pension plan contract" (defined in new Code §818(a)), the net surrender value equals the year-end balance in the "policyholder's fund," with such balance being reduced by any surrender penalty or forfeiture (except that any market value adjustment is, again, not taken into account).

As set forth in new Code §807(d)(2), the reserve as computed under the new Federal standards is an amount determined in accordance with the methods and assumptions used in calculating the life insurance reserves shown on a company's annual statement, though modified to take account of (1) a prescribed reserve method, (2) a "prevailing" interest rate, and (3) a "prevailing" mortality or morbidity table. In addition, in computing this amount, new Code §811(c) and (d) specify that net "deferred and uncollected premiums" and any reserve in respect of "excess interest" guaranteed beyond the end of the taxable year are to be eliminated. The purpose of this calculation is to restrict the amount of the life insurance reserves (for deduction purposes) to the "minimum reserve that most States would require," with such amount being computed in a fashion that "avoid[s] State-by-State variations."[27]

(i) Reserve Method

The reserve method that must be used under new Code §807(d)(3) is:

- The Commissioners' Reserve Valuation Method ("CRVM") for life insurance contracts;
- The Commissioners' Annuity Reserve Valuation Method ("CARVM") for annuity contracts; and
- A two-year full preliminary term method for noncancellable A&H contracts.[28]

In each case, the method to be used is the NAIC-prescribed method that applies to the contract when it is issued.[29] If a contract does not fall within one of the above categories, the method to be used is (similarly) the NAIC-prescribed method that applies to the contract on its issue date, and if there is no such method, then the "most appropriate" method that is "consistent with" one of the above-described methods on the issue date is to be used. Since the precise details of any such method probably will not be known in all respects, the Report of the Senate Finance Committee notes that while the reserve computation "should take into account any factors specifically recommended by the NAIC," if in any respect "specific factors are not prescribed by the NAIC recommended reserve method, the prevailing State interpretation of such method should be considered . . ." More specifically, with respect to the computation of annuity reserves, the Conference Report observes that "the practices of the various States differ on whether surrender charges should be taken

© 1984 Tax Management Inc., a subsidiary of The Bureau of National Affairs, Inc.

into account . . ." It then states, as an exception to the general rule, that "if the NAIC in 1984 clarifies what surrender charge factors are to be disregarded (and not to reduce the amount of the reserve) under the CARVM, then this clarification is to be considered in effect on the date of issuance" of the annuity contracts involved.[30]

Although, as described later, the 1959 Act definition and exclusion of "deficiency reserves" are eliminated from new Code §816(b), such amounts remain excluded — under an updated definition — from deductible reserves by virtue of new Code §807(d)(3)(C). Specifically, under that provision, the prescribed reserve methods are deemed not to incorporate any rule which increases a reserve because the net premiums with respect to a contract (recomputed in accordance with the requirements of Code §807(d)(2)) exceed the contract's actual or gross premiums. This definition of an excludable amount in the nature of a deficiency reserve was intended to comport with the description of a comparable amount under the Standard Valuation Law as modified by the 1976 Amendments.

Because new Code §807(d)(3) mandates the use of a preliminary term method (the CRVM) in computing the deductible reserves for life insurance contracts, the elective revaluation of preliminary term reserves to net level for tax purposes provided under former Code §818(c) is rendered obsolete and does not appear in the new law. Any income that would arise from a reduction in reserves due to its elimination is generally forgiven by virtue of the "fresh start" rules, discussed below.

(ii) Assumed Interest Rate

Under new Code §807(d)(4), the assumed interest rate (denominated the "prevailing State assumed interest rate") to be used in computing life insurance reserves under the Federal standards is the *highest* assumed interest rate which at least 26 States permit to be used in computing reserves for life insurance or annuity contracts (whichever is appropriate).[31] As a general matter, this prevailing rate is determined as of January 1 of the year in which the contract was issued. However, except in the case of annuity contract reserves, a company may elect to use the rate prevailing as of the beginning of the calendar year preceding the year of issue; the time and manner of electing this one-year delay is to be prescribed in regulations. Since there may be no prevailing State assumed interest rate applicable to noncancellable A&H contracts when issued (for want of sufficient State "adoptions"), new Code §807(d)(4)(D) specifies that the rate to be used in such cases is the rate for whole life insurance contracts issued at the same time.

(iii) Mortality and Morbidity Table

New Code §807(d)(5) provides that the mortality or morbidity tables to be used in the new computation (denominated as the "prevailing commissioners' standard tables") are the *most recent* standard tables prescribed by the NAIC which at least 26 states permit to be used in computing reserves for the type of contract involved at the time of issue. For this purpose, a state is understood to "permit" the use of a new table with respect to a contract as soon as it allows a company subject to its regulatory authority to value the liability for that contract on the basis of such table. However, new Code §807(d)(2)(C) specifically provides that in making the new computation, a "prevailing" table may be adjusted "as appropriate" to reflect the risks (such as substandard risks) insured under the contract if the nature of those risks is not otherwise taken into account. As noted in the Report of the House Ways and Means Committee:

> "Companies may adjust the prevailing commissioners' standard tables, as appropriate, to reflect risks incurred . . . not otherwise taken into account. For example, a company may use an appropriate multiple of a table to reflect the substandard classification of particular insureds because of poor health. Also, adjustment to the tables may be appropriate to reflect the risks involved in writing term insurance on individuals for whom the company requires no evidence of insurability (that is, if the company does not underwrite the risks); or because the insureds reside in a foreign country known to be experiencing strife." [32]

If there are no applicable commissioners' standard tables, the regulations are to prescribe the tables that are to be used.[33] If more than one table (or more than one option, such as a projection) is simultaneously "prevailing," the one "generally" yielding the *lowest* reserves is to be used. However, if a prevailing commissioners' standard table as of any January 1 (the "year of change") differs from the prevailing table as of the preceding January 1, the "old" table may be used with respect to contracts issued during the three-year period beginning on January 1 of the year of change.

(iv) Deferred and Uncollected Premiums

New Code §811(c)(1) (as discussed *infra*) provides that the reserve computed under the Federal standards may not contain any amount in respect of deferred and uncollected premiums. Accordingly, the net deferred and uncollected premiums (computed under the Federal standards) are to be subtracted from what otherwise is a mean reserve computation. This requirement has no application to reserves in respect of premiums actually paid during the taxable year.

(v) Interest Guaranteed Beyond Year-End

Under former Code §818(h), as added by TEFRA, with respect to contracts guaranteeing "excess interest" beyond the end of the taxable year, reserves for such contracts were required to be computed as if the excess interest were guaranteed only until year's end. New Code §811(d) preserves that rule, defining "excess interest" for this purpose as interest at a rate exceeding the prevailing state assumed interest rate for the contract involved. As noted in the Report of the House Ways and Means Committee:

> "Any amount in the nature of interest that is credited under any contract for any period at a rate in excess of the prevailing State assumed interest rate for the contract for such period and is guaranteed beyond the end of the taxable year can only be taken into account in computing reserves as if it were guaranteed to the end of the taxable year. Under this rule, 'amounts in the nature of interest' include both implicit and explicit guarantees for determining contractual benefits. Thus, 'amount in the nature of interest' refers

© 1984 Tax Management Inc., a subsidiary of The Bureau of National Affairs, Inc.

to amounts credited to policyholder reserves as assumed interest or interest paid on such items." [34]

b. Exception to the General Rules

As a general matter, then the life insurance reserve for any contract under the new law is computed using the Federal standards, and the greater of that reserve or the net surrender value (not exceeding the annual statement reserve) is the reserve figure taken into account for tax purposes (other than for determining life company qualification). There are, however, exceptions to these rules:

(i) Supplemental Benefits

Despite the general rule that life insurance reserves must be computed using the new Federal standards, the statutory or annual statement reserve is accepted as the reserve amount in the case of certain "supplemental benefits" enumerated in new Code §807(e)(3).[35] These benefits (presumably with reserves that are de minimis in amount) are —

- Guaranteed insurability;[36]
- Accidental death or disability benefit;[37]
- Convertibility; and
- Disability waiver of premium.

In addition, any other benefit so denominated in regulations will be considered to be one of the enumerated supplemental benefits.

While the amount of the reserve for any such supplemental benefit is that shown on the annual statement, it must be kept in mind that the deductible reserve for tax purposes is the greater of the reserve for *all* benefits under a contract or the contract's net surrender value. However, in the case of any "qualified" supplemental benefit, the reserve for that benefit is added in separately, after the reserve/surrender value comparison is made for the "basic" contract, as if such qualified benefit were provided under a separate contract. For this purpose, a qualified supplemental benefit is one for which there is a separately identified premium or charge which may not be funded out of any net surrender value attributable to other benefits.[38]

(ii) Substandard Risks

New Code §807(e)(5) requires that, as with a qualified supplemental benefit, the amount of the life insurance reserve for any "qualified substandard risk" be computed separately. For such a risk to be "qualified," the company must maintain a separate reserve for the risk; there must be a separately identified premium or charge for the risk; and the net surrender value may neither increase nor decrease in amount due to the risk, or be used "systematically" to pay premiums for the risk.[39] In contrast with a reserve for a qualified supplemental benefit, however, the reserve for a qualified substandard risk, although computed separately, still must be computed using the new Federal standards, and in no event may that reserve exceed the separately identified premiums for the risk, plus interest, less mortality charges for the risks. As a final limitation, the Code §807(e)(5) rule applies only to an aggregate amount of insurance in force which does not exceed 10 percent of the company's insurance in force under life insurance contracts (other than term).

(iii) Other Exceptions

There are several other exceptions that are worthy of note. First, under new Code §807(e)(6), the reserve for a term insurance or annuity benefit under a contract may be computed separately (but still using the new Federal standards) if (1) there is a separately identified premium or charge for the benefit; (2) any net surrender value attributable to other benefits cannot fund the benefit; and (3) the plan of insurance involved was on file in at least one state before January 1, 1984. This rule applies, however, only to life insurance contracts issued before January 1, 1989. Second, certain small life insurance companies may elect to have their Code §807(c)(1) reserves for contracts issued after the beginning of their first taxable year commencing after December 31, 1983, and before January 1, 1989, equal their annual statement reserves for the contracts (with a modification in the interest rate). This provision is available only to a company with tentative LICTI at or below $3,000,000 and assets (taking affiliates into account) at or below $100,000,000.[40]

3. Changes In Reserve Bases

Under former Code §810(d), if a life insurance company changed its basis for computing reserves during a taxable year, the income or deductions attributable to the change were taken into account ratably over a 10-year period. New Code §807(f) preserves the 1959 Act rule. Moreover, if a company ceases to be taxed as a life insurance company, and if Code §381(c)(22) does not apply, all adjustments not yet made under the 10-year rule are taken into account in the last full taxable year of life company status.

4. "Fresh Start"

Under Act §216(a), a life insurance company (except for purposes of qualification) must compute its reserves for its first taxable year beginning after December 31, 1983, as if the Federal reserve standards under the Act applied with respect to all then-existing contracts when they were issued.[41] In other words, for tax purposes the company must recompute those reserves, as of January 1, 1984, under the new Federal standards. In the absence of special relief, this provision would cause virtually all companies to experience income (from the reserve decrease). To avoid this problem, Act §216(b) provides, as a general rule, that any change in reserve (or accounting) methods attributable solely to the new rules is not to be treated as a change in reserve (or accounting) method.[42] Thus, a "fresh start" is provided, and the potential flow into gross income is precluded.[43] Under a special election provided in Act §216(c), a small company (with not more than $100,000,000 in assets on a consolidated basis) is allowed to forego this "fresh start" in order to avoid the administrative problems connected with the recomputation with respect to its "in force."

There are, however, certain reserves to which this "fresh start" rule does not apply:

(a) Any reserve transferred pursuant to a reinsurance agreement entered into after September 27, 1983, and before January 1, 1984;

(b) Any reserve transferred pursuant to any modification of a reinsurance agreement made after September 27, 1983, and before January 1, 1984; and

(c) Any reserve subject to a "reserve strengthening" reported for Federal income tax purposes after September 27, 1983, for a taxable year ending before January 1, 1984.[44]

These rules are designed to prevent companies from securing unintended benefits from the fresh start rule. Also in connection with these rules, no election made under former Code §818(c) after September 27, 1983, will be allowed to take effect.[45]

Where the fresh start is disallowed, the resulting income is taken into account under new Code §807(f) ratably over a 10-year period if it would have been subject to such spread treatment under former Code §810(d). Otherwise, the full income amount is recognized, pursuant to Act §216(b)(3)(C), in the company's first taxable year beginning after December 31, 1983. Thus, where reserves subject to former Code §818(c) revaluation were transferred in a new reinsurance transaction in the last quarter of 1983, the spread rule does not apply. Moreover, under Act §216(b)(3)(D) and (E) no special or small life insurance company deduction is allowed under the new law with respect to such amounts, nor is the former Code §809(d)(5) or (6) deduction allowed for 1983.

Finally, under Act §216(b)(5), where the fresh start does apply with respect to reserves transferred under a reinsurance arrangement entered into in 1982 or 1983, the benefit of the fresh start is, in effect, allocated between the ceding company and the reinsurer when the former "recaptures" the reinsured contracts after 1983. As the Report of the Senate Finance Committee explains:

"Generally, the "fresh start" benefit would be allocated by income recognition or deductions for recaptured reserves upon termination of the reinsurance agreement, making the amounts under the allocation reflect the post-1983 duration of the agreement between the parties. . . . If the amount of the reserves with respect to the recaptured contracts (computed at the date of recapture) that the reinsurer would have taken into account under present law exceeds the amount of the reserves with respect to the recaptured contracts (computed at the date of recapture) taken into account by the reinsurer under the bill, such excess will be taken into account by the reinsurer, in computing life insurance company taxable income, over a 10-year period commencing with the taxable year of termination. However, the excess taken into account by the reinsurer cannot exceed the amount of such excess if computed on January 1, 1984. The same amount of excess, if any, shall be taken into account by the ceding company over a ten-year period commencing with the taxable year of recapture." [46]

F. Section 808 — Policyholder Dividends

Reacting to the 1959 Act "excess interest" controversy, the new law significantly expands the definition of a policyholder dividend. Under new Code §808(a) and (b), a policyholder dividend is defined as "any dividend or similar distribution to policyholders in their capacity as such," and specifically includes excess interest, premium adjustments, experience-rated refunds, and (as under the 1959 Act) any amount not fixed in the contract which is dependent on company experience or management discretion. To provide consistency in treatment, new Code §808(e) treats policyholder dividends consisting of increases in cash surrender value or other benefits and premium reductions as if the policyholder had received a dividend and returned it to the company as additional premium. As explained in the Report of the House Ways and Means Committee:

"The term excess interest means any amount in the nature of interest that is paid or credited to a policyholder and determined at a rate in excess of the prevailing State assumed interest rate for the contract (*i.e.*, the rate used under the bill for purposes of determining the amount of the company's Federally prescribed reserve under the rules contained in new section 807(d)). Amounts in the nature of interest include all amounts paid for the use of money regardless of the particular designation adopted by the payor or payee. Thus, amounts in the nature of interest include interest payments with respect to amounts left on deposit and amounts paid in lieu of interest such as in the case of origination or service fees. Similarly, amounts in the nature of interest include amounts calculated as interest such as the increase in reserves attributable to assumed or guaranteed interest rates rather than premium contributions. Thus, for example, any increase in the cash surrender value of a contract above that which would result if the prevailing State assumed interest rate were used to compute the increase is treated as excess interest. The term premium adjustment means any reduction in the premium under an insurance or annuity contract which, but for such reduction, would have been required to be paid under the contract. If no premium amount is fixed in the contract, variations in premiums paid during the course of the contract are not considered premium adjustments. Further, a change in the amount of a premium that is attributable to the insurability of the insured is not considered a premium adjustment. Finally, the term experience-rated refunds means any refund or credit based on the experience of the contract or group involved. Thus, for example, if a company sells a group policy to an employer covering the lives of its employees and the premiums received exceed the sum of the claims paid and other expenses, any refund of such excess is an experience rated refund." [47]

Also, as noted previously in the discussion of new Code §805(a)(3), the deductibility in any taxable year of such policyholder dividends is premised (by virtue of new Code §808) on the fact that such amounts are "paid or accrued" by the end of the year.

G. Section 809 — Limit on Deductions of Mutual Companies

New Code §809, which limits the deductibility of policyholder dividends and benefit reserves by mutual companies, essentially performs two functions. First, on its face, it attempts to ensure that mutual company taxable income is not reduced below a minimum "return on equity" by virtue of deductions for distributions to policyholders. Second, implicitly, the new provisions regulate the distribution of the life insurance industry's tax burden between the stock and mutual segments of the industry, implementing a

congressional judgment that the two segments should share the burden on the basis of a 45 percent/55 percent split, respectively, for the 1984 taxable year. These two functions are carried out by requiring each mutual company's post-dividend gain from operations to be increased by an amount derived by multiplying the company's "equity base" by a rate of return, initially fixed in the statute and then varied over time as a function of the difference between stock and mutual *segment* rates of return.

The 1959 Act had also imposed a limit on the deductibility of policyholder dividends, which was principally (but not exclusively) significant to mutual life insurance companies. This limit was imposed by former Code §809 (incorporating the rules of former Code §§804-805), which provided that the deduction for policyholder dividends (except for the 1982-1983 "stopgap" period) could not exceed $250,000 plus the amount by which a company's "gain from operations" (before deducting such dividends) exceeded its "taxable investment income."

The new law technically imposes its limit first by providing, under new Code §808(c)(2), that the deduction for policyholder dividends otherwise allowable for a mutual life insurance company is "reduced by the amount determined under section 809." New Code §809(a)(1) provides in turn, that a mutual company's dividend deduction must be reduced (though not below zero) by a "differential earnings amount computed for the taxable year." Further, if a company's dividends are less than its differential earnings amount for any year, new Code §809(a)(2) provides that the excess of the differential earnings amount over such dividends will be treated, first, as a reduction in the company's deduction for and increase in reserves under new Code §807, and, then, as a net decrease in reserves giving rise to income. The differential earnings amount is defined in new Code §809(a)(3) as the product of a mutual life insurer's "average equity base" for the taxable year multiplied by a segment-based "differential earnings rate" for the year.

1. Average Equity Base

Under new Code §809(b)(1), a company's "average equity base" is simply the average of its "equity base" as of the beginning and the close of any taxable year. The company's "equity base," as defined in new Code §809(b)(2)-(6), is intended to approximate the financial equity of a mutual life insurer, and is determined in a manner that may be compared with the procedure for computing stock company surplus under GAAP. To accomplish this, the statute starts with a company's "surplus and capital" as computed for purposes of annual statement accounting, and then proceeds to make four specific adjustments:

a. Non-Admitted Financial Assets

Company surplus is required to be increased by the amount of any non-admitted assets consisting of bonds, stocks, real estate, real estate mortgage loans, and other "invested assets."

b. Difference Between Tax and Statutory Reserves

Generally speaking, the aggregate life insurance reserves carried on a company's annual statement to date can be expected to exceed the amount of its "tax" reserves computed under new Code §807(d). Given the government's apparent belief that statutory reserves were too conservative to be used it is not surprising that the excess of a mutual life insurer's statutory reserves over its tax reserves is required to be added to its "equity." Of course, to the extent that the reserve for any policy equals its "net surrender value," as will be the case for many older blocks of business, this adjustment will have no impact.

c. Other Reserves

In addition to the adjustment for the difference between statutory and tax reserves, the new law treats certain other items, technically carried as liabilities for regulatory accounting purposes, as part of a mutual company's "equity." The statute specifically requires "equity" to include the amount of the company's mandatory securities valuation reserve, the amount of "any deficiency reserve," as well as the amount of any other "voluntary reserve or similar liability." [48]

d. Policyholder Dividend Reserve

Finally, a company's equity is required to be increased by 50 percent of the amount carried as a reserve for policyholder dividends payable in the following year.[49]

2. Differential Earnings Rate

The single most complex aspect of new Code §809 is the computation of the "differential earnings rate." New Code §809(c)(1) provides that, for any taxable year, the "differential earnings rate" equals the difference between (i) the "imputed earnings rate" for that year and (ii) the "average mutual earnings rate" for "the *second calendar year preceding*" that year. (Emphasis added.) To facilitate the filing of estimated tax declarations and the actual computation of the Code §809 limitation for 1984, a transitional rule is provided in Code §809(c)(2) that fixes the "average mutual earnings rate" to be used in the initial differential earnings rate computation for 1984 at 7.8 percent. (For the rules governing the subsequent adjustment of this number, *see* the discussion of "average mutual earnings rate," below.)

a. Imputed Earnings Rate

Code §809(d)(1)(A) initially fixes the "imputed earnings rate" at 16.5 percent for 1984 to achieve the predetermined mutual/stock segment balance. So that this "plug" rate will fluctuate to reflect changes in stock segment earnings over time, Code §809(d)(1)(B) provides for it to be adjusted annually to reflect changes in stock segment earnings rates (referred to as the "current stock earnings rate") over stock segment earnings during a base period, 1981-1983 (the "base period stock earnings rate"). Consistent with the fact that the stock "base period" is a three-year period, the "current stock earnings rate," used to index the plug rate, is a rolling average of stock company earnings for the three calendar years preceding any computation year. Thus, for example, in adjusting the plug rate for use in 1985, stock company earnings during the period 1982-1984 will be compared with stock company earnings during the "base period" 1981-1983, and the 16.5 percent rate will be adjusted accordingly. This device was adopted to avoid sharp changes in the Code §809 limitation as the result of abrupt fluctuations in stock company earnings.

In computing the stock company earnings rate for both the base period and subsequent adjustments, Code §809(d)(4) calls for the use of a stock company's post-dividend, pre-tax gain (or loss) from operations, as computed for annual statement accounting purposes, expressed as a percentage of the company's "average equity base," computed in accordance with the rules for mutual companies set out above. The actual "current stock earnings" rate is the numerical average of the results of this computation for the 50 largest stock life insurance companies (and their affiliates), as determined by the Secretary of the Treasury.[50]

b. Average Mutual Earnings Rate

Under new Code §809(c), the "average mutual earnings rate" is the weighted average of the rate determined by expressing aggregate mutual, post-dividend statement gain from operations as a percentage of aggregate mutual equity. As already noted, however, the "average mutual earnings rate" actually used in computing the initial Code §809 limitation is, for any year, the rate computed under Code §809(e) for the second calendar year *preceding* the computation year. As a result, the Code §809 limitation for any taxable year, when initially computed, does not accurately reflect the extent to which mutual life insurers, through the distribution of policyholder dividends, may (or may not) have reduced their post-dividend gain from operations below the imputed earnings rate (as indexed).

New Code §809(f) corrects this by providing that any difference between the average mutual earnings rate used in the initial Code §809 computation for any taxable year, and the actual "average mutual earnings rate" as subsequently computed for that taxable year, is to be "trued-up" or taken into account in the following year. Specifically, Code §809(f) defines the "recomputed differential earnings amount" as the "differential earnings amount" for any taxable year substituting the actual mutual earnings rate in that taxable year for the mutual earnings rate used in the initial Code §809 computation for the year.[51] Code §809(f) contemplates that the "recomputed differential earnings amount" may be either higher or lower than the initially computed "differential earnings amount." If higher, the excess is includible in the mutual company's income in the taxable year following the year for which the initial Code §809 computation was made. Where it is smaller, the difference is allowable as a deduction in the following taxable year. No interest is payable to the government or to the mutual life insurer by reason of a disparity between the initial differential earnings amount for any taxable year and the recomputed differential earnings amount, as taken into account in the following taxable year.

3. Special Rules

Under new Code §809(g)(1)-(4), the "equity base," the "average mutual earnings rate," and the "stock earnings rate" are all generally computed on the basis of statutory accounting. New Code §809 contains several other special rules, two of which merit special mention:

a. Treatment of Mutual Affiliates

One item that was subject to substantial dispute before finalization of new Code §809 was the treatment to be accorded a stock life insurance company that was a wholly-owned, or controlled, subsidiary of a mutual life insurance company.[52] In effect, Code §809(h)(2)-(3) resolves this question in favor of treating stock subsidiaries of mutual companies as themselves being mutual companies. Where the parent and subsidiary are members of an affiliated group, stock of the subsidiary is disregarded in computing the mutual parent's equity, and dividends received from the subsidiary are disregarded in computing the parent's gain from operations. Instead, new Code §809(h)(2)(B) provides that the two companies are treated "as though they were one mutual life insurance company." On the other hand, where the stock subsidiary and its parent are not members of an affiliated group, Code §809(b)(3)(A) requires that, under regulations, adjustments will be made to the average equity base of the mutual parent (or parents) to reflect the equity in the subsidiary.

b. Transition Rule for Certain "High Surplus" Mutuals

In fashioning the Code §809 limitation, Congress was cognizant of the fact that some mutual life insurers carried more surplus in relation to their assets than was characteristic of the mutual segment of the industry and that, for such companies, the limitation might operate in an unduly burdensome fashion. To alleviate any difficulties for these so-called "high surplus" mutual life insurers, new Code §809(i) contains a special transition rule, which defines a "high surplus" mutual life insurer's "excess equity" in relation to its assets, and provides that no "differential earnings amount" will be computed with respect to a portion of the company's "excess equity." A "high surplus" mutual is defined in Code §809(i)(2)(C) as one whose equity, in 1984, exceeded 14.5 percent of its assets. This special relief is phased down after 1984 and expires after 1988.

H. Section 810 — Operations Loss Deductions

As noted above, in connection with the discussion of new Code §805(a)(5), a company is allowed to deduct the amount (if any) of the "operations loss deduction" as determined under new Code §810, which carries forward the provisions of former Code §812 with only the modifications needed to conform them with the "single phase" approach of the new law. New Code §810, like former Code §812, allows a life insurance company to deduct this specially computed carryover amount in lieu of an amount determined under the general net operating loss provisions of Code §172, partly to avoid the technical problems that would be involved in modifying the latter to take the rules of Part I of Subchapter L into account. (As a result, under new Code §805(b), life companies are denied the Code §172 deduction.) Since this provision of the new law largely preserves the 1959 Act rule, it is not surprising that subsection (g) of new Code §810 specifically states that the section "shall be treated as a continuation" of former Code §812.

I. Section 811 — Accounting Rules

The taxable income of a life insurance company is determined through the application of special rules, principally because of the long-term nature of its liabilities. In many respects, however, a life insurance company is treated for tax purposes in the same fashion as any other type of

© 1984 Tax Management Inc., a subsidiary of The Bureau of National Affairs, Inc.

business corporation. In particular, it is subject to the general rules of the accrual method of accounting, and to this, former Code §818(a) provided:

> (a) "METHOD OF ACCOUNTING. — All computations entering into the determination of the taxes imposed by this part shall be made —
>
> (1) under an accrual method of accounting, or
>
> (2) to the extent permitted under regulations prescribed by the Secretary, under a combination of an accrual method of accounting with any other method permitted by this chapter (other than the cash receipts and disbursements method).
>
> Except as provided in the preceding sentence, all such computations shall be made in a manner consistent with the manner required for purposes of the annual statement approved by the National Association of Insurance Commissioners."

This language arguably was interpreted by the courts as giving precedence to annual statement accounting. For example, in *Comr. v. Standard Life and Accident Insurance Co.*,[53] the Supreme Court held that net deferred and uncollected premiums were to be taken into account for tax purposes even though such amounts were not properly accruable under general principles.

New Code §811(a) contains a provision identical to former Code §818(a) except for the concluding sentence (the revised language is emphasized):

> *"To the extent not inconsistent with the preceding sentence or any other provision of this part,* all such computations shall be made in a manner consistent with the manner required for purposes of the annual statement approved by the National Association of Insurance Commissioners."

This slight change in language is intended to work a potentially significant (if ill-defined) substantive change. As noted in the Report of the House Ways and Means Committee:

> "The bill retains the general rule in present law that life insurance companies must use an accrual method, or a method permitted under the regulations that combines an accrual method with another recognized method. However, the bill makes it clear that accounting methods required for State regulatory purposes apply only to the extent that they are not inconsistent with Federal tax accounting rules. The *change* from present law was *intended to reinforce the primacy of the Federal tax rules* and *not impose a new method of tax accounting* on life insurance companies. Thus, for example, agents' commissions paid by direct insurers would continue to be treated as sales expenses and deductible when paid, as has been allowed historically (even though they arguably might be classified as acquisition expenses to be amortized). [Emphasis added.]" [54]

In addition, while new Code §811(c) preserves the old Code §818(e) prohibition against deducting any item more than once, it expands on that theme to prohibit both counting any item more than once for reserve purposes, and establishing of a reserve for any item unless the premiums (or other consideration) attributable to that item are required to be included in income. This specifically focuses on, and reverses, the tax treatment of net deferred and uncollected premiums called for by the decision in *Standard Life.*[55]

On a more general note, new Code §811(b) and (e) preserves, without substantive change, the former Code §818(b) and (d) accounting rules concerning amortization of premium, accrual of discount, and short taxable years. New Code §811(d) is discussed in connection with Code §807, *supra.*

J. Section 812 — Proration Formula

As part of the basic pattern of taxing life insurance companies, interest required to be credited to reserves is allowable as a deduction. Where a company's portfolio includes investments in "tax-favored" assets,[56] some part of that "required interest" is, at least theoretically, attributable to earnings on those assets. Congress has long taken the view that, if a life insurance company may exclude (or deduct) such amounts from its income and also deduct all of the interest credited to reserves, the company is effectively excluding (or deducting) the same amounts twice.

Under the 1959 Act, Congress' solution to this perception of double deductions (or exclusions) with respect to tax-favored income consisted of two steps. First, under Code §§804 and 809(a) and (b), a life insurance company was required to include in its income the so-called "company's share" of net investment income, including tax-exempt interest and dividends received. Second, under Code §809(d)(8), the company was allowed a deduction for the "company's share" of tax-favored amounts (tax-exempt interest and the dividends received deduction). In other words, the tax-favored income was "prorated" between the life insurance company and its policyholders, and the life insurance company was directly allowed to exclude only "its" share of tax-exempt interest and to deduct only "its" share of any dividends received deduction.

Under the new law, a life insurance company may exclude tax-exempt interest from gross income, but must include in income any dividends received. The company then is allowed to take "the company's" share of any intercorporate dividends received deduction (Code §805(a)(4)); but it must reduce, under Code §807(a) and (b), its deduction for any net increase in reserves (or increase its income from any net decrease in reserves) by the "policyholders' share" of any tax-exempt interest. The effect of the new provisions generally is the same as the corresponding 1959 Act provisions: the company is allowed to benefit from "its" share of these tax-favored items, while the balance is treated as being credited directly to the policyholders (and, indirectly, deducted by the company). Under the new law, however, the method of determining the "policyholders'" and the "company's" shares has been changed.

New Code §812 was considered to be an exercise in "tax simplification." Under it, tax-exempt interest and the 85 percent dividends received deduction (see the separate discussion of the 100 percent dividends received deduction, below), are prorated between the company and its policyholders by reference to the company's "net investment

© 1984 Tax Management Inc., a subsidiary of The Bureau of National Affairs, Inc.

income," defined in new Code §812(c) as "90 percent gross investment income." [57] The term "company's share" — which is used solely to determine the life insurance company's allowable deduction for dividends received — is defined in new Code §812(a)(1) as the company's share of net investment income divided by the total net investment income. In turn, the company's share of net investment income is defined as total net investment income minus the sum of "policy interest" plus the "gross investment income's proportionate share of policyholder dividends."

The subtraction of these two amounts is an attempt to "back out" of gross investment income those amounts considered to have been applied to fund reserve additions or policyholder dividends. "Policy interest," defined in new Code §812(b)(2), includes all required interest credited with respect to insurance reserves (except unearned premiums and unpaid losses not included in life insurance reserves); the deductible part of "excess interest" as defined in new Code §808;[58] and the deductible part of *any* other amount credited to a policyholder's fund under a pension plan contract for employees (except retired employees) or to a deferred annuity contract before the annuity starting date.[59] The "gross investment income's proportionate share of policyholder dividends," defined in new Code §812(b)(3), is a more complicated concept, on which it perhaps is best to let the Report of the Senate Finance Committee attempt to speak for itself:

> "[This item is] a fraction of the deductible portion of policyholder dividends (not including the deductible portion of any amounts previously included under [required interest], or of any premium or mortality charge adjustments associated with a contract for which excess interest was credited during the taxable year). . . . The deductible portion of any policyholder dividend is that portion remaining after a pro rata reduction of all policyholder dividends by the differential earnings amount under section 809 (if applicable). Finally, the fraction of the deductible portion of policyholder dividends to be included will be determined by applying a mini-fraction. The numerator of the mini-fraction is gross investment income (including tax-exempt income), less required interest, excess interest and the amounts credited to pension plan contracts and deferred annuities. . . . The denominator of the mini-fraction is gross income (including tax-exempt income), less net increases in reserve items. The application of this mini-fraction to the deductible portion of policyholder dividends recognizes that some portion of traditional policyholder dividends consist of redundant premiums (*i.e.*, rebates of mortality and expense charges). In so recognizing this, the assumption is made that, except for those items specifically allocated to be paid out of investment income (*i.e.*, amounts generally in the nature of interest), all other sources of income are available to pay all other expenses ratably." [60]

The Report concludes with the observation that, at bottom:

> "The company's share is the amount of net investment income that remains after paying or crediting amounts to policyholders."

The "policyholders' share" — which is used to determine the portion of tax-exempt interest considered to belong to the policyholders and, therefore, subtracted from the company's closing reserve balance in computing its deduction (or income) for a net increase (or decrease) in reserves — is simply 100 percent minus the company's share. In short, the company may directly deduct, or exclude, only the "company's share" of tax-exempt interest and the "85 percent" intercorporate dividends received.

On the other hand, "100 percent dividends" *are not* subject to the proration formula described above. In general, these are dividends received from subsidiaries more than 80 percent owned by the life insurance company. The basic theory for exempting them from proration is to treat the earnings from the subsidiaries' businesses as though they had been received directly by the parent. Thus, the dividends are fully excluded from "gross investment income," for purposes of the proration formula, and the deduction in respect of such dividends is allocated entirely to the company *unless* those dividends themselves are derived (wholly or in part) from tax-exempt interest or 85 percent dividends at the paying subsidiary's level. As explained in the Report of the Senate Finance Committee:

> "However, 100 percent dividends (*i.e.*, dividends that would be allowed a 100 percent deduction under sections 243 or 244, and certain dividends received by foreign corporations that would be 100 percent dividends but for the foreign recipient) are not subject to proration except to the extent they are funded with tax-exempt interest or with dividends that would not qualify as 100 percent dividends in the hands of the taxpayer. For these purposes, a distribution would be considered to be funded ratably out of tax-exempt income, dividends that would not qualify as 100 percent dividends to the taxpayer, and all other taxable income of the distributing corporation. Also for purposes of applying the exception, multi-tiered corporate ownership arrangements cannot be used to change the character of the tax-exempt interest and dividends received in an attempt to avoid proper proration.
>
> ". . . Without this rule, a parent life insurance company could avoid proration of tax-exempt interest by having a subsidiary own all of its tax-exempt obligations. The subsidiary would not be taxed on this income which it could distribute to the parent as dividends. . . . The bill also prevents a group from using multi-tier corporations to pass dividends comprised of tax-exempt income up to a parent life insurance company." [61]

The Conference Report further explains this "tracing" rule by reference to standard earnings and profits concepts:

> "The conferees wish to clarify that in determining how much of a dividend has been paid out of tax-exempt interest, or dividends other than 100-percent dividends, or out of other taxable income items, a comparison should be made between the amount that previously undistributed tax-exempt interest and dividends other than 100-percent dividends have contributed to a company's current and post-1983 accumulated earnings and profits and all such earnings and profits immediately prior to the distribution. The conferees believe that this interpretation of the dividends-received proration provision is consistent with the definition of a dividend as a distribution out of earnings and profits

(and not out of other amounts). Any other interpretation either would require the establishment of a unique set of earnings and profits accounting provisions, or would result potentially in year-to-year distortions because of annual variations in the proration formula." [62]

K. Sections 813-814 — Foreign Branch Operations

1. U.S. Branch Operations of Foreign Life Insurance Companies

As a general rule, foreign corporations are subject to U.S. income tax only on their income which is either U.S. source income or is effectively connected with a trade or business in the United States. Under both the 1959 Act and the new law, a foreign corporation operating a U.S. insurance business is taxed like a domestic life insurance company on its income effectively connected with that business if, considering only that business, it would have qualified as a life insurance company if it were a domestic company.[63] However, former Code §819 provided for the reduction of certain deductions of such a branch operation of a foreign corporation if its surplus attributable to U.S. business fell below a specified minimum level (designed to approximate the average surplus that a domestic life insurance company would maintain with respect to the same level of business). New Code §813 generally preserves this rule, although, in lieu of decreasing the deductions of the U.S. branch, the new section increases the amount of its income deemed "effectively connected" with its U.S. insurance business by an amount equal to its surplus "deficit" multiplied by its current investment yield.[64] As under the 1959 Act, the new law permits any resulting tax increase to offset the flat-rate tax, if any, imposed under Code §881.[65]

2. Foreign Branch Operations of U.S. Companies

As a general rule, domestic corporations are taxed on their worldwide income, including income from foreign branch operations. However, in the case of a domestic mutual life insurance company operating a branch in a country "contiguous" with the United States, former Code §819A (beginning in 1976), in recognition of the fact that income from such operations was locally oriented, permitted such a company to elect to exclude from U.S. taxable income the income earned by that branch, unless it was repatriated to the United States. New Code §814 carries that rule forward, with some technical modifications. In addition, by virtue of Act §217(a), an old Code §819A election will be treated as an election under new Code §814.

L. Section 815 — "Phase III" Amounts

Under the 1959 Act, a life insurance company was allowed to defer tax on one-half of the excess of its gain from operations over its taxable investment income, and was allowed special deductions with respect to certain nonparticipating contracts and certain A&H and group life insurance contracts. The premise of so-called "phase III" was to return to taxable income those amounts that were not taxed currently (because they might have been needed for policyholders) when it became clear they were not required for policyholders.

As a result, each stock life insurance company was required to set up two memorandum tax accounts — a "Shareholders Surplus Account" and a "Policyholders Surplus Account." The Shareholders Surplus Account, defined by former Code §815(b), represented amounts that had been taxed or that were never intended to be taxed. The annual addition to the Shareholders Surplus Account was the amount by which the sum of (1) life insurance company taxable income, computed without regard to any phase III tax, plus (2) the excess of any net capital gain over the amount in (1), plus (3) the full amount of the intercorporate dividends received and the tax-exempt interest, plus (4) the "small business deduction," exceeded the tax imposed for the taxable year, again without regard to any phase III tax. The Policyholders Surplus Account, defined under former Code §815(c), represented amounts that were not taxed previously because they might be needed for policyholders. The annual addition to the Policyholders Surplus Account equalled the amounts (referred to above) deferred for the taxable year.

Under former Code §815(a), post-1958 distributions to shareholders were deemed first to be made from the Shareholders Surplus Account (with no tax effect other than to reduce the balance in that account) and, only thereafter, were deemed to be made from the Policyholders Surplus Account, thereby triggering a phase III tax. However, distributions were nonetheless deemed to be made from the latter account where certain limits, keyed to life insurance reserves and premiums as set forth in former Code §815(d)(4), were exceeded.

Under the "single-phase" system of the new law, there is no longer a need to add amounts to a Policyholders Surplus Account. However, rather than either immediately taxing balances remaining in companies' Policyholders Surplus Accounts or permanently forgiving any such tax, new Code §815 requires stock life insurance companies to continue to maintain those Accounts. Under the new provisions, a company's LICTI may be increased by any distributions from the Policyholders Surplus Account, largely determined in accordance with the rules of former Code §815.[66] Technically, new Code §815 requires that the company's tax be recomputed as if tax were imposed on LICTI (not less than zero) plus any Policyholders Surplus Account distributions. Thus, for example, such distributions would not increase LICTI for purposes of computing the special and small life insurance company deductions.

A life insurance company's carried-over Policyholders Surplus Account under new Code §815 equals the balance in such Account as of December 31, 1983, and no amounts are added to that Account after 1983. On the other hand, a company's carried-over Shareholders Surplus Account is increased annually by the excess of the sum of its LICTI (not less than zero), its special and small life insurance company deductions, the company's share of its dividends received deduction,[67] and its excluded tax-exempt interest over the tax imposed for the year (without regard to new Code §815).

M. Section 816 — Qualification as a Life Insurance Company

As was true under the 1959 Act, the provisions of revised Part I of Subchapter L apply only to "a life insurance company." Like other corporate enterprises, the income of a life insurance company is taxed at normal corporate rates, but, under Subchapter L, its taxable income is computed somewhat differently than that of other

© 1984 Tax Management Inc., a subsidiary of The Bureau of National Affairs, Inc.

corporations, reflecting the specialized nature of its business and the make-up of the insurance industry.[68] For this purpose, a "life insurance company" is defined in new Code §816(a), comparable to the provisions of former Code §801, as an "insurance company" that issues certain types of contracts (*i.e.*, life insurance, annuity or noncancellable A&H contracts) more than 50 percent of the reserves of which are "life insurance reserves" plus unearned premiums and unpaid losses (whether or not ascertainable) on noncancellable A&H policies not included in life insurance reserves. Further, "life insurance reserves" are defined in new Code §816(b) (continuing the tests of former Code §801(b)) as amounts that are actuarially computed or estimated (on the basis of interest assumptions and recognized tables) and required by State law to be "set aside" for future claims under life insurance, annuity, or noncancellable A&H contracts involving life, health, or accident contingencies. The amount of these reserves under new Code §816 continues to be that shown on a company's annual statement, rather than the recomputed reserves described in new Code §807(d).[69]

While new Code §816 thus preserves most of the 1959 Act rules affecting qualification, it does make several important changes. First, it refines and incorporates in statutory language (in new Code §816(a)) the definition of an "insurance company" that appears in Regs. §1.801-3(a)(1). The new language reads:

> "For purposes of the preceding sentence [defining a "life insurance company"], the term "insurance company" means any company more than half of the business of which during the taxable year is the issuing of insurance or annuity contracts or the reinsuring of risks underwritten by insurance companies."

As explained in the Report of the Senate Finance Committee:

> "[F]or purposes of qualifying as a life insurance company, a company must be one for which more than half of the business activity during the taxable year is the issuing of insurance or annuity contracts or the reinsuring of risk [sic] underwritten by insurance companies. By requiring more than that the 'primary and predominant business activity' be insurance activity, the bill adopts a stricter and more precise standard for a company to be taxed as a life insurance company than does the general regulatory definition of an insurance company applicable for both life and nonlife insurance companies under present law. Whether more than half of the business activity is related to the issuing of insurance or annuity contracts will depend on the facts and circumstances and factors to be considered will include the relative distribution of the number of employees assigned to, the amount of space allocated to, and the net income derived from, the various business activities . . .
>
> "Because the definition of a life insurance company, under the bill, looks to the activities of the company for the entire taxable year, a company will be characterized for that year as a life insurance company or as a property and casualty company on the basis of its activities for the entire year. . ."[70]

Second, as enacted by Act §221, new Code §7702 contains a definition of "life insurance contract" for all purposes of the Code, including the life company qualification rules. (As under prior law, the term "annuity contract" is not comprehensively defined by statute.)[71] Third, unlike former Code §801(b), new Code §816 does not include a provision excluding deficiency reserves from the definitions of "life insurance reserves" and "total reserves." (Although under new Code §807(d)(3)(C), amounts in the nature of deficiency reserves are still excluded for purposes other than determining life company qualification.)

Finally, new Code §816 specifically addresses the treatment of liabilities for so-called "guaranteed investment contracts." Under the 1959 Act, a company issuing group contracts out of its general account as funding vehicles for qualified pension plans was allowed an exclusion, for tax purposes, in respect of the interest credited under such contracts. This exclusion was equal to the "pension plan reserves" for the contracts multiplied by the company's current yield on its total investment portfolio (*see* former Code §805(a)(2)). As interest rates rose during the 1960's and 1970's, the amount of interest credited at the then current market rates (as needed to remain competitive) frequently exceeded the exclusion as so computed. To obtain former Code §805(e) "interest paid" treatment for the amount so credited and thereby rectify this problem, companies began issuing pension funding contracts which contained only temporary annuity purchase rate guarantees and, in some instances, which contained no such guarantees ("guaranteed investment contracts" or "GICs").

While the IRS agreed with these companies, in published and private rulings, that "interest paid" treatment was proper in such cases because the related liabilities were not "life insurance reserves,"[72] it also took the position that the liabilities might well be insurance reserves includible in the denominator of the qualification fraction. Thus, some companies were in danger of losing their tax status as life companies by reason of the issuance of these contracts. As a temporary response, in TEFRA §260(c) Congress prohibited the reclassification of companies for tax purposes solely on this basis.

Now, under new Code §816(f), amounts set aside and held as interest under contracts which do not contain permanent guarantees as to life (or A&H) contingencies are counted neither as life insurance reserves nor as total reserves in determining life company qualification. This provision thus resolves any qualification question in respect of guaranteed investment contracts based on the reserve ratio test. The Committee Reports note that, if a guaranteed investment contract contains insurance or annuity purchase rate guarantees for some duration (though not permanent guarantees), the premiums constitute income and the related funds are treated as reserves under new Code §807(c)(3) or (4).[73] On the other hand, with respect to liabilities for contracts that contain no purchase rate guarantees, the Reports observe:

> "The fact that such funds are not treated as insurance reserves for purposes of the qualification fraction is not intended to have any effect on the characterization of the contracts or of the company issuing the contracts. Rather, whether a contract with less than a

permanent guarantee should be considered an insurance or annuity contract would depend on the terms of the contract. That is, it will depend on whether the company has assumed a significant insurance risk or has made an annuity guarantee (for life or a fixed period). Generally, the assumption of solely an investment risk would give rise to an insurance liability."[74]

Thus, if a given guaranteed investment contract were determined not to be an insurance contract, a company primarily issuing such contracts might fail to qualify as an insurance company for tax purposes.

N. Section 817 — Variable Contracts

Former Code §801(g) (enacted in 1962 and amended in 1976) prescribed rules for a "separate accounting," for tax purposes, with respect to "contracts with reserves based on segregated asset accounts." Such contracts consisted of nonqualified variable annuities as well as former Code §805(d) pension plan contracts — those accounted for in state law separate accounts, under which the amounts paid in or paid out reflected the investment return and market value of the assets in the separate account. Variable life insurance contracts, which were first sold in the United States in the 1970's, were not addressed.

Among the special rules prescribed by former Code §801(g) were those governing the tax treatment of increases (or decreases) in reserves and of the disposition of assets with respect to separate account liabilities. As discussed earlier, a life insurance company generally may deduct any annual net increase in its reserves and must include in income any annual net decrease in those reserves. In the early 1960s, however, when variable annuities first were introduced to the insurance market, the investment company community expressed concern that the deferral inherent in the tax treatment of annuity holders, when coupled with the customary corporate-level deduction of reserve increases reflecting the appreciation in value of assets in variable annuity separate accounts, would afford variable annuity writers a competitive advantage in the financial marketplace. Reflecting this concern, former Code §801(g)(6) denied issuers of variable annuities any deduction for increases in required reserves reflecting appreciation in value of the separate account assets; at the same time, the 1959 Act subjected the issuer to tax on the asset gains giving rise to those reserves when the gains were realized. This treatment, in effect, placed a tax on the "inside build-up" with respect to the contracts involved.

On the other hand, since there could be no such perceived competitive advantage with regard to variable contracts funding qualified pension plans, old Code §801(g)(7) permitted issuers of variable annuities used in connection with such plans to adjust the basis of the separate account assets to reflect appreciation (or depreciation) of those assets. Thus, although issuers of such contracts did not benefit from the usually permitted deductions for increases in their reserves, they were not subject to capital gains tax on the appreciation giving rise to those increases.

As a general matter, new Code §817 carries forward the rules of former Code §801(g), with modifications appropriate to the abolition of the phase system. Thus, under new Code §817(a), neither appreciation nor depreciation in the separate account assets (whether or not realized) is counted in computing the company's deduction or income item resulting from a net increase or decrease in reserves, respectively. The new law does, however, make three significant changes in the variable contract rules.

First, variable life insurance contracts are accorded specific statutory recognition (as noted in the discussion of new Code §7702) and are made subject to the Code §817 rules. In this regard, the definition of "variable contract" in Code §817(d)(3)(B) incorporates both the "traditional" variable life policy ("the amount of the death benefit ... is adjusted") and its proposed "universal" version ("the amount of the death benefit (or the period of coverage) is adjusted"). The Committee Reports clarify that, for variable life insurance, the amount of the reserve adjustment under Code §817(a) is keyed to the appreciation or depreciation in the separate account assets and not to any greater change in the amount of the contractual death benefit.[75]

Second, under Code §817(b), the basis of each asset in a separate account is increased or decreased to reflect appreciation or depreciation of that asset. Accordingly, on disposition of the asset, the company will not be taxed on any realized appreciation (and cannot reduce its tax with respect to other capital gains by virtue of any realized depreciation). This is intended to eliminate the corporate-level capital gains tax that former Code §801(g) had imposed.

Third, new Code §817(h) requires "adequate diversification" of the investments made by a separate account underlying *nonqualified* variable contracts, as a prerequisite to those contracts being treated as variable life insurance or annuity contracts (as the case may be) for corporate and policyholder tax purposes. The requisites of "adequate diversification" are to be spelled out in regulations. In this regard, the second sentence of Code §817(h)(1) "looks through" a separate account organized as a unit investment trust to determine whether the diversification requirements have been satisfied, *i.e.*, the investments made by the underlying funding vehicle(s), not the shares or units held by the separate account, are tested for compliance with the diversification requirements. This "look-through" rule is binding on the Treasury, however, only if *all* shares or units of the underlying funds are owned by one or more separate accounts of insurance companies.[76] This provision, to the extent it limits "access" to the underlying funding vehicles to purchasers of variable contracts from insurance companies,[77] is consistent with Rev. Rul. 81-225, 1981-2 C.B. 12, which held that because the underlying funds were also publicly available, the variable contract there involved would be considered a "wrap-around" arrangement, and the policyholder, not the insurance company issuing the contract, would be treated as the owner of the funds for tax purposes.[78] The Conference Report indicates, however, that the public availability of a "similar" fund will not in itself cause an underlying fund to be treated as publicly available, thus laying to rest the "clone fund" controversy that arose in the wake of Rev. Rul. 81-225.

The regulations to be issued under new Code §817(h)(1) might reasonably be expected to carry forward the diversification standards currently being applied in

© 1984 Tax Management Inc., a subsidiary of The Bureau of National Affairs, Inc.

private letter rulings issued by the IRS. Should these standards be changed in any respect, the Report of the Senate Finance Committee notes that:

"The committee anticipates that any regulations prescribing diversification standards changing current practice will have a prospective effective date." [79]

In light of this statement, it may be assumed that, in the case of a contract for which the IRS previously issued a letter ruling based on its diversification representations, the ruling might properly be relied on as indication of compliance with new Code §817(h) until such time as definitive regulations are promulgated. A judgment that such reliance is appropriate should, however, be made in light of the minimum diversification standards prescribed in the Conference Report itself:[80]

"In authorizing Treasury to prescribe diversification standards, the conferees intend that the standards be designed to deny annuity or life insurance treatment for investments that are publicly available to investors and investments which are made, in effect, at the direction of the investor. Thus, annuity or life insurance treatment would be denied to variable contracts (1) that are equivalent to investments in one or a relatively small number of particular assets (*e.g.*, stocks, bonds, or certificates of deposits of a single issuer); (2) that invest in one or a relatively small number of publicly available mutual funds; (3) that invest in one or a relatively small number of specific properties (whether real or personal); or (4) that invest in a nondiversified pool of mortgage type investments. This new diversification authority is not intended to allow the imposition of any requirement that the investment fund reflect a diverse range of investment goals (*e.g.*, short-term/long-term, or fixed income/equity securities need not be mixed in a single fund)."

New Code §817(h)(2) provides a "safe harbor," under which any fund is deemed to be adequately diversified so long as (1) its investments meet the requirements of Code §851(b)(4) (relating to "regulated investment companies"), and (2) not more than 55 percent of its total assets consists of cash, cash items, Government securities, and securities of "other regulated investment companies." The application of this rule may be somewhat narrow in scope. Further, new Code §817(h)(3) provides a general exception to the diversification requirements for funds underlying *variable life insurance* contracts (in the context of a unit investment trust arrangement) where the funds invest in securities issued by the United States Treasury. This special rule will permit a variable life policy to be based on a fund which invests solely in such securities if such fund is owned exclusively by the separate account of the company issuing the policy.

New Code §817(h)(4) clarifies that an insurance company may use an independent investment advisor with respect to the segregated assets underlying its variable contracts, thus settling a possible controversy arising under Rev. Rul. 81-225 in a manner consistent with the subsequent private letter ruling position of the IRS.

With respect to underlying funds which are not "adequately diversified" in accordance with new Code §817(h), the statute in effect codifies the result reached in Rev. Rul. 81-225 by specifying that a variable contract based on such a fund will not be treated as a life insurance or annuity contract for purposes of Subchapter L, and Code §§7702 and 72.

O. Section 818 of the Code, and §§217, 218, and 231 of the Act — Other Definitions, Special Rules, and Studies

New Code §818 collects a variety of definitional and other special rules pertaining to Part I of Subchapter L. Several of its provisions preserve rules of the 1959 Act: subsection (a) repeats (with minor modifications) the definition of "pension plan" contracts of former Code §805(d), and subsections (b) and (c) carry forward the rules of former Code §817 concerning the treatment of capital gains and losses. (In connection with the latter, the Committee Reports note that the regulations promulgated under former Code §817 with respect to assumption reinsurance transactions are expected to be carried over under the new law.) [81] The provisions of subsections (d) (relating to supplementary contracts) and (e) (relating to consolidated returns) were mentioned previously. Finally, for purposes of the Code §904 foreign tax credit limitation, new Code §818(f) provides that, under regulations, a company's deductions for policyholder dividends, reserve increases, and death benefits are to be treated as not allocable to one item or class of gross income.[82]

A number of other special and transitional rules (often affecting only one or a few companies) appear, outside of the Code, in Act §217. For example, under subsection (b), income with respect to an installment obligation under a pre-1984 Code §453B(e)(2) election is to be treated as noninsurance business income for purposes of new Code §806, and under subsection (f), rules are provided for companies that operate on an assessment basis. Finally, Act §217(i) provides a special election, solely for purposes of determining life company qualification, whereby a mutual life insurance company may treat all of its individual noncancellable (or guaranteed renewable) A&H insurance contracts as though they were cancellable. This provision was added for the benefit of a number of smaller mutual companies writing primarily this class of contract that had been taxed as Part I companies under the 1959 Act. By permitting them to be taxed under Part II of Subchapter L, it allows them to avoid the impact of new Code §809. Such election must be made on the company's return for its first taxable year beginning after December 31, 1983, and, if such an election is made, it will apply to all future years. Further, if the common parent of an affiliated group makes this election, any stock life company in the group will be treated as if it were a mutual life company, and the electing company's taxable income will be counted in computing the phase-out of any small life insurance company deduction available to other members of the same group.

To avoid imposition of an estimated tax penalty under Code §6655 due solely to a change in a company's tax liability resulting from the retroactive application of the new law, Act §218 provides a waiver of the penalty with respect to any underpayment of tax required to be paid prior to the enactment of the new law. The penalty is waived so long as the underpayment is paid in full prior to the date of the first installment prescribed under Code

© 1984 Tax Management Inc., a subsidiary of The Bureau of National Affairs, Inc.

§6655 that occurs after July 18, 1984 (meaning September 15, 1984, in the case of calendar year taxpayers).

The final "miscellaneous" provision worthy of note is Act §231, which calls for certain studies and reports to be submitted regarding revenue, "segment balance," and other issues arising under the new law. First, reports on tax revenues collected from the life insurance industry are to be submitted by the Treasury Department to the House Ways and Means Committee and the Senate Finance Committee on July 1 each year, beginning in 1985. Second, detailed studies are to be prepared by the Treasury, in consultation with the Ways and Means Committee, the Finance Committee, and the Joint Committee on Taxation, concerning the operation of the new law during 1984-1986. The final report in this respect is due January 1, 1989, with interim reports scheduled for July 1 of 1986, 1987, and 1988. In preparing these reports, the Treasury is directed to give "specific attention to the revenue impact of allowing consolidated returns to be filed by life insurance companies with nonlife or noninsurance companies" and to collect information on the volume and use of policyholder loans.[83]

P. Section 845 — Reinsurance

The 1959 Act recognized the consequences of reinsurance transactions for tax purposes and, in certain instances, provided special rules governing them. Although some of those rules could best be described as accounting rules,[84] under former Code §818(g) (added by TEFRA on a temporary basis) the IRS was granted authority to reallocate and/or recharacterize income, deductions, assets, reserves, credits, and other items arising from a reinsurance agreement between related persons (as defined in Code §1239) if it determined that doing so was necessary to reflect the proper source and character of the taxable income of the parties. While the new law generally preserves this treatment, it significantly expands the rule of former Code §818(g). Thus, under new Code §845 — which applies to insurance companies taxed under Part I of Subchapter L as well as to nonlife companies taxed under Part II or Part III — the IRS is granted authority to reallocate, recharacterize, or otherwise adjust items arising under reinsurance agreements, whether or not they involve related parties. This sweeping grant of authority was at least partly a congressional response to continuing Treasury concern that reinsurance transactions could be employed by the parties, whether or not they were "related," to obtain tax benefits that the Treasury considered to be unwarranted. It arose in its ultimately expanded form during the Conference.

More specifically, new Code §845(a) preserves the former Code §818(g) related-party rule, though adding to its scope reinsurance transactions not involving life companies and transactions between unrelated parties if one party is "in effect" an agent of another party or a conduit between related parties. Further, the actions that the IRS may take to achieve a proper reflection of income are expanded to include "mak[ing] any other adjustment." In addition, whether parties are "related" for purposes of new Code §845(a) is determined under the more stringent rules of Code §482. As noted in the Report of the Senate Finance Committee:

> "[A]lthough one party may not have de facto control over the business of the other party (as required by sec. 482), it may have unilateral control over the profit levels for both parties with respect to specific lines of business covered by a reinsurance agreement, which can be used to distort the income of the parties. The bill also makes it clear that the reallocation and recharacterization authority can be used when one party to the reinsurance transaction acts as a conduit between related parties. The committee believes that whether a party is an agent of, or conduit between, other parties must be determined in light of all the facts and circumstances. An example of a fact that would tend to establish that an agency relationship existed is control on the part of the reinsurer over the amount of policyholder dividends that are paid by the reinsured."[85]

Under Act §217(d)(1), new Code §845(a) applies to any "risk reinsured" on or after September 27, 1983.[86]

Next, new Code §845(b) grants the IRS broad authority to make "proper adjustments" any time it determines that *any* reinsurance contract (regardless of whether the parties are related in any sense) has a "significant tax avoidance effect." That provision, which Act §217(d)(2) applies to risks reinsured after December 31, 1984, was added in its entirety during the Conference. The Conference Report discussion of new Code §845[87] is quite detailed and should be reviewed carefully and at length by any taxpayer contemplating a future reinsurance transaction. In brief, that discussion makes mention of the following points:

> (a) The IRS may make adjustments under new Code §845 regardless of any party's motivation in entering into a reinsurance transaction, whether or not there is a legitimate business purpose for the transaction, and whether or not the IRS ultimately treats it as involving the transfer of insurance risk.
>
> (b) A "tax avoidance effect" — such as reduction of a mutual company's "equity", change in the character or source of an item, deferral of tax, elimination of the "SRLY taint" of a previous loss, extension of a loss carryover period, transfer of tax benefits between taxpayers in different brackets, etc. — is "significant" (triggering application of the new provision) when, as to either party, the tax benefit is "disproportionate" to the risk transferred, a determination to be made by the IRS based on the "economic substance" of a transaction and taking into account these factors (no one of which is to be conclusive):
>
> > (1) Duration age of the business reinsured ("coinsurance of new contracts may carry a risk of lapse . . .; thus, there may be a significant risk . . . [to] the reinsurer");
> >
> > (2) Character of the business reinsured ("coinsurance of yearly renewable term life insurance will generally not have significant tax avoidance effect");
> >
> > (3) Structure for determining potential profits, including provisions for experience rating;
> >
> > (4) Duration of the reinsurance agreement ("a longstanding agreement for automatic reinsurance . . . would tend to indicate that there is no signifi-

© 1984 Tax Management Inc., a subsidiary of The Bureau of National Affairs, Inc.

cant tax avoidance effect", though there may be exceptions);

(5) The parties' rights to terminate the agreement and the consequences flowing therefrom ("a payback provision which allows a reinsurer to recover all its losses ... would indicate that the transaction is merely a financing arrangement");

(6) The parties' relative tax positions (with an eye to "bracket shifting," profit and loss companies, and life and nonlife companies); and

(7) The parties' financial situations generally (*e.g.*, an otherwise insolvent company may properly make use of surplus relief reinsurance).

(c) Until regulations are reissued under new Code §845, certain transactions will be considered to fall within a "safe harbor" — *e.g.*, reinsurance of yearly renewable term coverage that does not involve sharing of expenses or transfer of long term reserves, or coinsurance of new business (or, in some circumstances, existing business) where income and expenses are allocated proportionately to the risks transferred.

(d) Under new Code §845(b), the IRS may make adjustments to either or both of the unrelated parties to eliminate the tax avoidance effect, and such adjustments may include treatment of an agreement as terminated at each year-end and reinstated the following day.

(e) All transactions that permit the IRS to make adjustments under new Code §845(b), but for the fact that related parties are involved (or an agency or conduit situation exists), are subject to the authority granted under new Code §845.

A. Definition of "Life Insurance Contract"

1. Background

Since 1913, death benefits received under life insurance contracts have been excluded from gross income, and the IRS has consistently treated increments to the cash value of such contracts as not includible in income until the maturity or surrender of the contract while the insured is alive. Before TEFRA, the definition of "life insurance contract" for tax purposes was at best rudimentary. Judicial interpretations of the term turned on whether a given contractual arrangement involved any element of risk shifting and risk distribution, principally in connection with efforts to distinguish between life insurance policies and annuity contracts.[88]

With the 1970's and early 1980's, the life insurance industry began to develop a number of new products that incorporated features designed to make life insurance more flexible and attractive to consumers. By 1981, the IRS had addressed the tax treatment of a number of these products. For example, in Rev. Rul. 79-87, 1979-1 C.B. 73, the IRS held that variable life insurance policies would be treated for tax purposes in the same manner as other cash value life insurance contracts. Further, a "universal" life insurance policy was accorded the same tax treatment as other cash value life insurance policies by private rulings issued in January and February, 1981,[89] and in a private ruling issued in May, 1981,[90] an "interest-sensitive" whole life insurance policy was similarly treated.

By the spring of 1981, the IRS began to encounter substantial criticism over its ruling position on universal life insurance. This criticism was premised in part on tax policy considerations, particularly the prospect that the net amount at risk could be quite small in relation to the cash value under a universal life insurance policy even at early policy durations. In response, the IRS undertook a year-long reconsideration of its ruling position, culminating in General Counsel's Memorandum 38934 in the summer of 1982. In that Memorandum, the Chief Counsel recommended that a typical universal life policy be viewed for tax purposes as a combination of term insurance and a savings arrangement.

Partly in reaction to this situation and partly to obtain a degree of certainty on the point, the life insurance industry supported the enactment of Code §101(f) as part of the "stopgap" legislation in TEFRA. That subsection provided for the first time, a statutory definition of "life insurance contract" for federal income tax purposes, albeit on a temporary basis (expiring after 1983) and applicable only to a limited class of policies (those with "flexible premiums"). Among other things, Code §101(f) confirmed that the universal life policy was eligible to be treated as an integrated contract of life insurance for tax purposes. It also addressed the concerns associated with the sufficiency of the risk element in such policies by imposing maximum premium and minimum risk limitations, designed to require the presence of at least a minimum risk amount and thereby foreclose the availability of life insurance tax treatment to policies used primarily for investment purposes.[91] The provision was expressly made temporary and limited in scope because prompt action was needed with respect to the universal life policy, while a more far-reaching effort was anticipated in a succeeding Congress.

As it happened, Code §101(f) established the conceptual basis for what became, pursuant to Act §221, a definitional provision applicable to all forms of life insurance — new Code §7702. As the Report of the House Ways and Means Committee observed:

> "In light of the significant tax advantages associated with life insurance products, the committee undertook a review of those products and their treatment. ... [I]n recent years, companies have begun emphasizing investment oriented products that maximize the advantages of the deferral provided in the Code. When compared to traditional products, these products offer greater initial investments or higher investment returns or both. In response the committee adopted a definition of life insurance that treats as currently taxable investments, those life insurance policies that provide for much larger investments or buildups of cash value than traditional products." [92]

2. New Section 7702 in Detail

a. The Scope of the New Definition

New Code §7702 begins by stating that, for all purposes of the Code, a "life insurance contract" is any

contract which is a life insurance contract under applicable state law and which meets the mathematical tests of either paragraph (1) or paragraph (2).[93] For this purpose, a contract:

> "Does not include that portion of any contract that is treated under State law as providing any annuity benefits other than as a settlement option. Thus, although a life insurance contract may provide by rider for annuity benefits, the annuity portion of the contract is not part of the life insurance contract for tax purposes and such annuity benefits may not be reflected in computing the guideline premiums. Thus, an insurance arrangement written as a combination of term life insurance with an annuity contract, or with a premium deposit fund, is not a life insurance contract for purposes of the guidelines because all of the elements of the contract are not treated under state law as providing a single integrated death benefit. As a result, only the term portion of any such contract can meet the tests and be treated as life insurance proceeds upon the insured's death. However, any life insurance contract that is treated under state law as a single, integrated life insurance contract and that satisfies these guidelines will be treated for federal tax purposes as a single contract of life insurance and not as a contract that provides separate life insurance and annuity benefits." [94]

b. Satisfying the "Cash Value Accumulation Test"

The first of the two alternative tests, denominated the "cash value accumulation test" of Code §7702(a)(1) and (b), is directed primarily to "traditional" policies which have cash values that accumulate in a predictable fashion in relation to the death benefit provided.[95] To meet this test, the "cash surrender value" of a contract, *by the contract's own terms,* must not at any time be capable of exceeding the "net single premium" at that time with respect to the "future benefits" under the contract (including any additional coverage purchased by means of dividends or excess interest credits). For this purpose "cash surrender value" is defined in Code §7702(f)(2)(A) as the cash value of the contract determined without regard to any surrender charge, policy loan, or "reasonable" termination dividend.[96] Further, as specified in Code §7702(b), the "net single premium" is to be computed using an interest assumption — the greater of an annual effective rate of 4 percent or the rate or rates "guaranteed" on issuance of the contract — and the mortality charges specified in the contract (if such charges are not explicitly stated, then the mortality charges implicit in the annual statement reserve for the contract are to be used). Significantly in this regard, the Report of the Senate Finance Committee states that the "rate or rates guaranteed on the issuance of the contract" means the rate or rates reflected in the contract's nonforfeiture values assuming use of the method in the Standard Nonforfeiture Law.[97] Finally, the term "future benefits" is defined in Code §7702(f)(4) to mean death benefits and endowment benefits; under this test, these are the actual benefits guaranteed from year to year. Any "additional" benefits are not taken into account as future benefits, but, as discussed further below, the separately specified *charges* for "qualified additional benefits" are treated as future benefits in computing the net single premium (and the guideline premiums, as described next).

c. Satisfying the "Guideline Premium" and "Cash Value Corridor" Requirements

As an alternative to the cash value accumulation test, a contract may qualify under the two-part test of Code §7702(a)(2), (c), and (d). Both elements of this test must be met. The "guideline premium limitation" of this test is intended to distinguish contracts under which the policyholder makes traditional levels of premium payments (*i.e.*, within the "guidelines"), as in the case of a whole life policy, from those under which larger investments are made by the policyholder for savings purposes.[98] The "cash value corridor" aspect of the test regulates the minimum relationship between the cash value and the death benefit, regardless of the effect of the guideline premium limit. This two-part test, which is expected to be used primarily in connection with flexible premium policies, applies only if the cash value accumulation test is not met.

A contract will satisfy the requirements of the guideline premium limitation if, in fact (rather than by the terms of the contract), the sum of the "premiums paid" under the contract does not at any time exceed the greater of the "guideline single premium" or the sum of the "guideline level premiums" at that time. For this purpose, the sum of the "premiums paid" is defined in Code §7702(f)(1) as the total of the actual premium payments less (1) distributions (such as dividends) to which Code §72(e) applies, (2) any amounts (such as overpayments) returned "with interest" within 60 days of the end of the policy year in order to comply with the guideline premium limit (interest on such returned amounts is currently includible in the recipient's gross income), and (3) any other amount specified in regulations.[99] The "guideline single premium" is defined in Code §7702(c)(3) as the premium at issue for the future benefits at issue (subject to "adjustments") under the contract, computed on the basis of (1) the mortality charges specified in the contract (or, if none is specified, those used in determining the annual statement reserve for the contract), (2) other charges specified in the contract,[100] and (3) an interest rate which is the greater of an annual effective rate of 6 percent or the minimum rate or rates guaranteed on issuance of the contract. The "guideline level premium" under Code §7702(c)(4) is the annual premium version of the guideline single premium, computed assuming a premium payment period extending at least to age 95 and substituting "4 percent" for "6 percent" as the minimum interest assumption.

The "cash value corridor" requirement of Code §7702(d) will be satisfied if the death benefit under the contract at any time in fact at least equals the then "applicable percentage" of the contract's cash surrender value. This figure is 250 percent until the insured attains age 40, and then declines through nine age brackets, as follows:

If the insured's age at the beginning of the policy year is:		Then the applicable percentage decreases ratably for each full year:

45	50	215	185

70	75	115	105

d. Computation of "Future Benefits"

The so-called "computational rules," the purpose of which is to provide assumptions and preclude manipulation in the calculations under the tests, appear in Code §7702(e). Subsection (e)(1) requires that in making the determinations under the statute, first, the amount of the death benefit (and any qualified additional benefits) is deemed not to increase (*i.e.*, the premium computations are made assuming level benefits in the future). Second, the contract's maturity date (including the date on which any endowment benefit is paid) is to occur no earlier than when the insured attains age 95 and no later than age 100.[101] Third, any endowment benefit (or sum of endowment benefits, including the cash surrender value as of the maturity date) is deemed not to exceed the least amount payable as a death benefit at any time under the contract. Code §7702(b)(2)(C) specifically provides that, in applying the first and third of these rules under the cash value accumulation test, the "no increase" assumptions control the net single premium computation at each duration based only on the then level of benefits, without regard to any lower past benefits; this is not the case under the guideline premium test, absent an "adjustment" (as described below).[102]

As a result of these rules, a contract's cash value at its maturity date, as developed from the net single premium or the guideline premiums on the required interest, mortality, and (under the guideline premium test) expense assumptions, cannot exceed the level (or decreased) amount of the death benefit permitted to be assumed under the first computational rule — with any excess interest or dividends adding a greater maturity amount. Arrangements with a greater degree of "investment orientation" are generally not permitted, meaning that (among others) the single premium policy with a guaranteed increasing face amount, the endowment-at-age-65, and the retirement income endowment contract will no longer be classified as "life insurance contracts" for tax purposes.

Code §7702(e)(2) provides an alternative to the first computational rule permitting the funding of a death benefit equal to the cash surrender value at death plus a level amount of pure insurance protection (the so-called return-of-cash-value or "option 2" death benefit). Under this alternative, for purposes of computing the guideline level premium (but not the guideline single premium), an increasing death benefit may be recognized to the extent necessary to prevent a decrease in this level pure insurance amount. A comparable provision applies under the cash value accumulation test, where the "net level reserve" for this increasing death benefit is substituted for the net single premium.

e. Adjustments

A change in the terms of a contract may permit or necessitate an adjustment of the guideline premiums or the net single premium previously computed for a contract. Under Code §7702(f)(7)(A), such computations are to be prescribed in regulations. According to the Report of the Senate Finance Committee, the guideline premiums may be adjusted only when a policyholder initiates a change in benefits or when a scheduled change occurs that the guideline premiums could not previously reflect because of the computational rules. Such adjustments are based on the benefit changes when they occur and are added to the prior guideline premiums. The net single premium, on the other hand, is to be adjusted whenever any change in benefits occurs, and it is entirely recomputed at the insured's then attained age.[103]

Pursuant to Code §7702(b)(7)(B), any change in the terms of a contract which results in a reduction of the future benefits under the contract is to be treated as an exchange for purposes of Code §1035. The purpose of this significant new rule is to tax the policyholder in such an instance to the extent of any cash received (or to the extent of the gain in the contract, if less) in accordance with the "boot" rules of Code §1031(b). Hence, if a partial surrender is made, the cash distributed with it may be taxable.[104]

f. Additional Benefits

Under Code §7702(f)(5), the charges for "qualified additional benefits" are taken into account in determining the guideline premiums or net single premium. These benefits are defined as: (1) guaranteed insurability benefits, (2) accidental death or disability benefits, (3) "family" term coverage, (4) disability waiver benefits, and (5) any other benefits prescribed by regulation. According to the Committee Reports, the guideline level premiums may be computed so as to reflect the actual period that any qualified additional benefits are in effect, producing "bi-level" premiums but avoiding post-funding.[105] Additional benefits which do not meet the definition of qualified additional benefits and which are not "prefunded" (*i.e.*, cannot be funded by withdrawals or subtractions from the contract's cash value) are disregarded in computing premiums and future benefits under Code §7702.[106]

g. Variable Contracts

Under Code §7702(f)(9), in the case of a variable life insurance contract as defined in new Code §817, the determinations under Code §7702(a) are not made "at any time" but, rather, only when the death benefit changes. Nevertheless, these determinations must occur at least once a year (and, if they are made only once a year, they must be made at the same time each year). Further, since a variable life contract typically contains no interest rate guarantee with respect to nonforfeiture values, the rate to be used for purposes of Code §7702(b) and (c) is the minimum 4 percent rate (6 percent for the guideline single premium).[107]

h. Contracts Which Fail to Meet the Definition

If a contract fails to satisfy one of the alternative tests due to reasonable error, the IRS is authorized under Code §7702(f)(8) to waive the failure if it is shown that satisfactory steps are being taken to remedy the error. If, despite this, a contract still fails the tests, then under Code §7702(g), only the difference between the net surrender value and the face amount of the contract will be subject to the death benefit exclusion of Code §101(a). For such a "failed" contract, the "income on the contract" will be treated as ordinary income received or accrued by the policyholder during the taxable year. The term "income on the contract" is defined as the amount by which the increase in the "net surrender value" of the contract (*i.e.*, its cash value less any surrender charge) during the taxable year, together with the cost of life insurance protection provided during the year, exceeds the amount of premiums paid (less any policyholder dividends received during the taxable year). If the cost of insurance is not identified in the contract, then it is to be determined for this purpose under regulations. Income on the contract for all prior years will be treated as received by the policyholder in the year a contract fails to meet the definition. According to the Committee Reports, income treated as received under a failed contract will be subject to the withholding and recordkeeping requirements applicable to commercial annuities. Finally, a contract that fails to meet the definition will nevertheless be treated as an "insurance contract" for company tax purposes, thus ensuring that the premium payments will continue to be included in the issuing company's taxable income and that the company will, at a minimum, continue to qualify as an insurance company for purposes of Subchapter L.

i. Regulations

As under Code §101(f), Code §7702(i) provides authority for the issurance of such legislative regulations "as may be necessary or appropriate to carry out the purpose" of the new statute.

3. Effective Date and Transitional Rules

Generally, under Act §221(d), the provisions of Code §7702 apply to contracts issued after December 31, 1984. According to the Report of the Senate Finance Committee, a new contract issued after that date in exchange for a pre-1985 contract will be considered as newly issued for this purpose, as will a post-1984 change made in a pre-1985 contract that affects the values of the contract.[108] With respect to group insurance, the date taken into account is the first date on which a participant is covered under the contract. Because Code §7702 generally does not take effect until 1985, temporary Code §101(f) is extended to apply to "flexible premium" contracts sold before January 1, 1985.

Several special rules that vary the general effective date should be noted. First, under Code §7702(i), contracts which require at least 20 "non-decreasing" annual premiums, and are sold pursuant to a plan of insurance filed with at least one state insurance commissioner before September 28, 1983, will be deemed to meet the requirements of Code §7702 in 1985 and years thereafter if they can meet the cash value accumulation test by substituting "3 percent" for "4 percent" as the minimum interest rate. (According to the Committee Reports, the purchase of paid-up additions will not violate the 20-pay requirement so long as the additions are "modest and reasonable as compared with the basic benefit provided under the contract.") Second, a special advance effective date, under Act §221(d)(2), applies Code §7702 to contracts issued after June 30, 1984, that provide increasing death benefits and which have "premium funding more rapid than 10-year level premium payments." This provision does not apply to (1) contracts which satisfy the provisions of Code §101(f) (whether or not they are flexible premium contracts), (2) contracts which would satisfy Code §7702 by substituting certain alternative interest or maturity date assumptions, and (3) so-called "irreplaceable life" policies.[109]

B. Distributions from Annuity Contracts

In TEFRA, Congress made a number of changes in the tax treatment of annuity contracts to limit the perceived attractiveness of such products as short-term investment vehicles. First, changes were made in the rules of Code §72(e) to provide that amounts received under an annuity contract before the "annuity starting date" would first be viewed as withdrawals of income credited to the contract to the extent of such investment income (a "LIFO" rule). Also, any loan against the cash value of an annuity contract, or an assignment or pledge of such a contract, was to be treated as an amount "not received as an annuity" and thus subject to the LIFO rule governing withdrawals. These provisions applied with respect to contracts entered into, and amounts allocable to investments made, after August 13, 1982. The pre-TEFRA rules continued to apply to withdrawals of any earnings on investments from contributions made before August 14, 1982, and to contracts purchased in connection with qualified plans.

Second, Congress added Code §72(q), which imposed a penalty tax on certain "premature" distributions from an annuity contract. The penalty, which was effective for distributions after December 31, 1982, is equal to five percent of the amount includible in income, to the extent such amounts are allocable to an investment made within 10 years before the receipt of the distribution (the so-called "10 year look-back rule"). This penalty does not apply, however, to a distribution that is (1) made after the policyholder reaches age 59½; (2) made to a beneficiary on or after the death of the annuitant; (3) attributable to the policyholder becoming disabled; (4) one of a series of substantially equal periodic payments for life or at least five years; (5) from a qualified pension plan; or (6) allocable to an investment before August 14, 1982. The Conference Report accompanying TEFRA provided that annuity policies received in a tax-free exchange under Code §1035 would retain the character of the contract given up in the exchange for purposes of applying the new penalty tax and LIFO provisions.[110]

Act §222 amends Code §72(q) to eliminate the 10 year look-back rule. Thus, the five percent penalty tax will now be applicable to the amount of any "premature" distribution that is includible in income, whether or not the amount is allocable to an investment made during the preceding 10 years. The other exceptions to the application of the penalty tax fashioned in TEFRA, however, will continue to apply. For example, distributions made after the policyholder attains age 59½, or made in a series of substantially equal

© 1984 Tax Management Inc., a subsidiary of The Bureau of National Affairs, Inc.

periodic payments for life or at least five years, will not be subject to the five percent penalty tax. The new law also makes a "technical" modification to Code §72(q): for purposes of applying the 10 year look-back rule, an investment in a multiple premium annuity contract (entered into before January 19, 1985) will be deemed to have been received on January 1 of the year of the investment.

Further, Act §222 adds new Code §72(s) which provides that, for an annuity contract to be treated as such under the Code, it must contain language specifying certain methods of distribution in the event of the contract-holder's death.[111] Under this new rule, the contract must provide that, if the contract-holder dies before the annuity starting date, the entire interest will be distributed within five years after the date of death of the contract-holder, or will be annuitized within one year after the date of death over a period equal to the life of the designated beneficiary (or over a period not exceeding the life expectancy of such beneficiary). In the event that the contract-holder dies after the annuity starting date but before the entire interest in the contract has been distributed, the contract must provide that the remaining portion of such interest will be distributed at least as rapidly as the distribution method in effect as of the time of the contract-holder's death. The new distribution requirements of Code §72(s) do not apply, however, in the case of a spousal beneficiary who, in effect, steps into the shoes of the deceased contract-holder.

Code §72(q), as amended, and Code §72(s) apply with respect to an annuity contract issued after the day which is six months after the date of enactment of the new law (*i.e.*, a contract issued after January 18, 1985).[112] In contrast to TEFRA, the new law generally does not permit an annuity contract received in a tax-free exchange under Code §1035 to retain the character of the contract given up in the exchange for purposes of applying the new rules. As noted in the Conference Report:

> "The new provisions will be effective for contracts issued more than 6 months after enactment. For these purposes, an annuity contract issued in exchange for another will be considered a new contract subject to the new penalty and distribution at-death rules. The grandfather provisions granted in TEFRA for amounts invested in or credited to investments in annuity contracts prior to August 13, 1982, continue in effect for purposes of applying the distribution of income-first rules applicable to annuity contracts." [113]

C. *Group-Term Life Insurance*

Code §79(a), as originally enacted in 1964, generally permits an employer to purchase up to $50,000 of group-term life insurance for an employee without causing the cost of such coverage to be included in the employee's gross income. The cost of any greater amount of coverage is imputed to the employee under the so-called "Table I" rates as set forth in Regs. §1.79-3(d)(2). Even this inclusion, however, has not been applied to employees who have terminated due to retirement or disability. Hence, an employer could provide an unlimited amount of group-term life insurance to these terminated employees without causing the imputation of income under Code §79. Under Code §79(d) (as added by TEFRA), in the event that a group-term life insurance plan is discriminatory in favor of active key employees, the exclusion for the cost of the first $50,000 of group-term coverage is not available to such key employees.

Act §223 further amends Code §79 to extend the Code §79(a) $50,000 limitation to retired employees.[114] In addition, correcting apparent technical shortcomings in the nondiscrimination rule added by TEFRA, the Act applies that rule to retired employees as well as active employees and, in the case of a discriminatory plan, denies use of the favorable Table I rates as the measure of the income to be included for tax purposes. Further, a conforming amendment is made to Code §83(e) to clarify that the cost of group-term life insurance will be included in the income of a retired employee for the year in which the insurance coverage is provided, whether or not the benefit vests upon retirement.

In general, these amendments apply to all taxable years beginning after December 31, 1983. The new rules are not applicable, however, to individuals covered by a plan in existence on January 1, 1984 (or by any comparable successor plan) who have attained age 55 on or before January 1, 1984, and who were either employed during 1983 by the employer having the plan or who retired from employment with such employer on or before January 1, 1984. On the other hand, in the case of an existing group-term plan which is discriminatory (as defined in Code §79(d)) after December 31, 1986, the amendments will apply to any individual retiring after that date, irrespective of the fact that such individual was "grandfathered" under the above-described rule.

D. *Exchanges Under Section 1035*

Prior to the 1984 Act, Code §1035 provided that no gain or loss would be recognized on the exchange of a life insurance contract, endowment contract, or annuity contract for a similar contract. For purposes of this rule, however, the contracts subject to the rule were defined as being contracts issued by a *life insurance company* taxed under Part I of Subchapter L. Act §224 alters this definition to include under Code §1035 any contract issued by *an insurance company* taxed under Subchapter L of the Code.[115] The provision is retroactively effective, as if it had been included in the Code when originally enacted in 1954.

[5] The three-phase system, including computation of a company's "taxable investment income," could be regarded as simply providing a mechanism for determining how much of a company's gain from operations would be taxed currently, and how much of it would be deferred. From this standpoint, a life insurance company (generally a mutual company) was said to be "in phase I" if its total income or gain from operations

before the limited deductions for policyholder dividends and "special" items exceeded its taxable investment income but, because of the limit on such deductions, its taxable gain from operations could not be reduced much below that taxable investment income figure. In contrast, a company (generally a stock company) was said to be "in phase II positive" if its gain from operations, even after claiming full deductions for the otherwise limited items, still exceeded its taxable investment income. (As noted, tax on one-half of the excess was deferred.) On the other hand, a company (again, generally a stock company) whose taxable investment income exceeded its gain from operations *before* claiming the limited deductions was said to be "in phase II negative." Such a company clearly was taxed on its "total income."

[6] The Committee Reports specifically note that certain language changes in new Code §803 are not to be construed as having any substantive impact. For example, S. Rep. No. 169, *supra*, states at 529:

> "The use of the term 'indemnity reinsurance' in the bill, instead of 'reinsurance ceded' under present law, is not intended to be a substantive change from present law. Likewise, the reference to 'insurance and annuity contract' rather than to 'insurance and annuity contracts (including contracts supplementary thereto)' is not a substantive change from present law. A general provision, applicable to the life insurance company part of the Code only, states that any reference to insurance and annuity contracts includes any contracts supplementary thereto (new sec. 818(d))."

[7] Although the former Code §809(d)(1) reference to "supplementary contracts" has been deleted, new Code §818(d) provides that all references to "insurance and annuity contracts" automatically include any "contracts supplementary thereto."

[8] This controversy, and its temporary resolution in TEFRA, was described in Chapter 52 of T.M. Portfolio No. 982.

[9] Under new Code §805(a)(4)(B), the Code §246(b) limitation is computed in a manner similar to that under former Code §809(d)(8)(B), which limited the aggregate dividends received deduction to 85 percent of the company's "gain from operations," as modified. In turn, the new law limits that aggregate deduction to 85 percent of "LICTI," computed without regard to the special life insurance company deduction, the small life insurance company deduction, the operations loss deduction, any capital loss carryback, and the dividends received deductions. As under the 1959 Act, no limit applies in a loss year.

> "[T]he conferees believe that the distinction drawn between passive investment activities and an active conduct of a trade or business will be more administrable and provide more guidance and certainty for the industry as it further refines the 'traditional investment' standard . . ."

[14] Note that the characterization of an activity as an insurance or a noninsurance business applies solely for purposes of computing the special and small life insurance company deductions. *See* Rep. No. 861, *supra*, at 1047-1048.

[15] Consider, for example, the conflicting interests facing both insurers and the IRS depending on whether a particular noninsurance business is experiencing income or is incurring a loss (subject to the restriction of new Code §806(c)(3)(C)).

[16] Alabama, Arkansas, Oklahoma, and Texas.

[17] As provided in new Code §818(e), a special rule applies to corporations joining in the filing of a consolidated federal income tax return. Under this rule, no items of income or loss of nonlife members of the affiliated group joining in the return are taken into account for purposes of computing tentative LICTI.

[18] To address the situation of a life company member of an affiliated group that cannot join in the filing of a consolidated return but that has a loss, thereby (effectively) causing the reduction of the group's overall tentative LICTI twice by virtue of the same loss, under new Code §806(d)(5) regulations are to be issued to "eliminate any excessive detriment or benefit (from year to year) arising from the operation of the controlled group tentative LICTI computation . . ." S. Rep. No. 169, *supra*, at 532. In the alternative, under new Code §806(d)(4), a life insurance company member of a controlled group which does not file a consolidated return may elect to have its loss from operations in any year not taken into account for purposes of determining the group special life insurance company deduction. If such an election is made, the electing company is restricted in its use of that loss from operations. As noted in S. Rep. No. 169, *supra*, at 532-533:

> "Where this election is made, a limitation is imposed on the ability to utilize losses of the electing loss company against nonlife company income. This limit is equal to 80 percent of the life company losses that, but for the election, would have reduced the controlled group's tentative income. Life company losses subject to the 80 percent limitation will be considered to be used in full when applied against nonlife company income; that is, there will be no carryover of the remaining 20 percent of life company loss."

[20] "Assets" include all assets of the company, both admitted and nonadmitted. For purposes of this rule, assets are valued at their adjusted bases, except that real property and stock are taken at their fair market value. In the case of an interest in a partnership or trust, the interest itself is not treated as an asset; however, the life insurance company is treated as owning its share of the underlying assets held by the partnership or trust. *See* new Code §806(b)(3).

[21] New Code §817, discussed *infra*, provides special rules in this regard for variable contracts.

[22] H.R. Rep. No. 432, *supra*, at 1413; *see also* S. Rep. No. 169, *supra*, at 539.

[23] *See, e.g.*, H.R. Rep. No. 432, *supra*, at 1403, n. 7, 1413 and 1414.

[24] *See, e.g., id.* at 1414.

[25] This figure is cross-referenced from new Code §807(d)(1) to new Code §809(b)(4)(B). There is no instruction to reduce this figure by the amount of any deficiency reserves.

[26] H. R. Rep. No. 432, *supra*, at 1414; S. Rep. No. 169, *supra*, at 540.

[27] *Id.*

[28] An exception is made in this respect by Act §217(n), which permits a company to use the net level method for noncancellable A&H contracts for which it has held net level annual statement reserves since the end of 1982. *See* Rep. No. 861, *supra*, at 1052 (which refers to year-end "1983").

[29] The issue date of a contract is the date appearing on the policy form. In the case of reinsurance, the issue date is taken as that of the reinsured policy, not of the reinsurance contract. *See* H. R. Rep. No. 432, *supra*, at 1415; S. Rep. No. 169, *supra*, at 540-541. Group contracts are treated as issued on the date the master plan is issued; however, if a benefit is guaranteed to a participant after that date, the issue date with respect to that benefit is the date the benefit is guaranteed. *See* new Code §807(e)(2).

[30] S. Rep. No. 169, *supra*, at 541; Rep. No. 861, *supra*, at 1052.

[31] The effect of any State nonforfeiture laws on interest rates for reserves is to be ignored.

[32] H.R. Rep. No. 432, *supra*, at 1416; *see also* S. Rep. No. 169, *supra*, at 542. The Report of the House Ways and Means Committee specifically identifies "credit life insurance" as a type of insurance for which an adjustment to the standard table would be appropriate. *See* H.R. Rep. No. 432, *supra*, at 1415, n.15.

[33] For pre-1948 contracts for which there were no standard tables when those contracts were issued, the tables used to compute annual statement reserves may be used. *See* new Code §807(d)(5)(C).

[34] H.R. Rep. No. 432, *supra*, at 1429.

[35] Again, this discussion is relevant only to items that qualify as "life insurance reserves."

[36] The Committee Reports note that a "guaranteed insurability" benefit is intended to include a "guaranteed annuability" benefit.

[37] In line with the "de minimis" rationale, the Committee Reports note that a disability income provision, other than one that provides for income payments to carry the premium or some other incidental expense of the insured, is not intended to fall within the enumerated supplemental benefits. *See, e.g.*, H.R. Rep. No. 432, *supra*, at 1417, n.17.

[38] Hence, this provision is not intended to apply with respect to benefits eligible to be provided under a policy employing an "account value" computation, since the funding for such benefits would presumably already be reflected in the net surrender value of such policy. The Committee Reports note, however, that use of a loan provision to pay premiums or charges for supplemental benefits is not to be construed as violating this requirement. *See, e.g.*, H.R. Rep. No. 432, *supra*, at 1418.

[39] The Report of the House Ways and Means Committee notes in this regard that:

> "For example, the committee expects that regulations could provide that a provision for the systematic borrowing based on the net surrender value of the contract to pay both the basic premium and the substandard charge will be considered to disqualify the substandard risk in certain situations. However, loan provisions that are not

© 1984 Tax Management Inc., a subsidiary of The Bureau of National Affairs, Inc.

actually used on a regular and automatic basis would not result in disqualification of the substandard risks."
H.R. Rep. No. 432, *supra*, at 1418.

[40] In limited circumstances, "tax" reserves with respect to certain contracts covering foreign risks issued by a noncontiguous foreign country branch of a domestic life insurance company may be at least equal to the reserves required by the foreign country. *See* new Code §807(e)(4).

[41] In the case of a group contract (the issue date of which is taken to be that defined in Code §807(e)(2)) for which the issue date is unknown, the date is to be approximated in accordance with regulations. The Conference Report indicates that such regulations are to approximate the issue date based on the pattern of business growth. *See* Rep. No. 861, *supra*, at 1053.

[42] Furthermore, the new law, in essence, forgives for taxable years beginning after 1983 the balance of any former Code §810(d) income adjustment attributable to a pre-1984 taxable year reserve weakening. *See* Act §216(b)(2)(A). With respect to any pre-1984 taxable year reserve strengthening, which under former Code §810(d) would have resulted in a deduction spread ratably over 10 years, the new law permits the company to continue taking the spread deductions *to the extent* the total post-1983 deductions do not exceed the fresh start adjustment attributable to the contracts with respect to which the reserve strengthening occurred. However, to the extent the spread deduction is disallowed by this rule, any directly related premium is excluded from the company's income. *See* Act §216(b)(2)(B) and (C).

[43] Via a "technical and conforming" amendment to Code §832(b), the new law reserve computation rules are applicable to nonlife insurance companies. Likewise, the "fresh start" rules apply to those companies.

[44] For this purpose, the "reserve strengthening" rule is defined (inferentially) to include the establishment of reserves on a stronger basis for year-end 1983 than was used for comparable contracts for year-end 1982.

[45] This "cut-off" with respect to former Code §818(c) elections does not apply if more than 95 percent of the reserves that would be revalued in accordance with such an election is attributable to risks under contracts issued by the taxpayer under a plan of insurance first filed after March 1, 1982, and before September 28, 1983 — an exception designed to allow newly-organized companies to secure the advantage of such an election.

[46] S. Rep. No. 169, *supra*, at 567.

[47] H.R. Rep. No. 432, *supra*, at 1421.

[48] The Conference Report points out that the reference to voluntary reserves "is not limited to reserves for potential or unaccrued liabilities relating to insurance contracts." The Report specifically notes that a reserve "for Federal taxes may be in whole or in part a voluntary reserve," and contemplates the provision of additional guidance through regulations. *See* Rep. No. 861, *supra*, at 1058.

[49] It is interesting to note that new Code §809(b)(6), on its face, is limited to dividends "payable in *the following* taxable year." (Emphasis added.) It is possible that a company might establish a reserve for dividends payable 13 months after the close of the taxable year, which might be interpreted to fall outside the ambit of this provision. Such a result apparently was not intended, since the thrust of Code §809(b)(6) was to limit the exclusion from mutual company "equity" of 50 percent of the reserve for policyholder dividends only with respect to those to be paid during the following year.

[50] The Conference Report indicates that, in compiling the list of the 50 largest stock life insurers, the Secretary of the Treasury will have authority to exclude companies which are "aberrational." *See* Rep. No. 861, *supra*, at 1058. In computing stock earnings rates, as well as in determining the "average mutual earnings rate," Code §809(h)(1) requires that any stock life insurance company 80 percent or more owned by one or more mutual life insurance companies be classified as a mutual rather than as a stock life insurance company.

[51] Thus, each company's actual equity base for a taxable year, as computed under Code §809(b), is used in both the initial computation and the recomputation.

[52] For these purposes, new Code §809(h)(1), consistently with other provisions of the Code, defines "control" as ownership of 80 percent or more of both the "total combined voting power" and "total value" of the shares of another company.

[53] 433 U.S. 148 (1977).

[54] H.R. Rep. No. 432, *supra*, at 1428.

[55] *See, e.g., id.* at 1429.

[56] This would include investments in municipal bonds, the interest on which is tax-exempt under Code §103, and corporate equity investments giving rise to dividends as to which the company is entitled to an 85 or 100 percent intercorporate dividends received deduction under Code §§243-246.

[57] Thus, the common disputes under the 1959 Act about what expenses were deductible in computing net investment income will not arise under the new law. "Gross investment income" is defined exactly as it was under former Code §804(b), and includes tax-exempt interest. *See* new Code §812(d). (However, *see* the discussion of 100 percent dividends, below.) Note that the definition of a "noninsurance" business for purposes of the special and small life insurance company deductions *does not* apply for purposes of determining "gross investment income." Instead, the same interpretation as that applicable under the 1959 Act should apply.

[58] The addition of excess interest to the numerator of the fraction may be viewed as an extension of the treatment of "qualified guaranteed interest" under the 1959 Act (as amended by TEFRA).

[59] Hence, the inclusion of "interest paid" with respect to such liabilities under former Code §804 (though not non-policyholder indebtedness) is carried forward into the new law.

[60] S. Rep. No. 169, *supra*, at 558-559.

[61] S. Rep. No. 169, *supra*, at 529-530.

[62] Rep. No. 861, *supra*, at 1045. The Senate version of the new law included an exception to the "tracing" rule, that would have permitted 100 percent dividends from insurance subsidiaries (primarily property/casualty insurers) to avoid proration regardless of the subsidiaries' tax-favored earnings. The provision was deleted in Conference.

[63] The Committee Reports observe that foreign source investment income attributable to domestic required reserves is income effectively connected with the conduct of a United States business, and they specifically note, without comment, the holding in *Great-West Life Assurance Co. v. United States*, 82-1 USTC ¶9374 (Ct. Cl. 1982), that Canadian source passive investment income is not exempt from U.S. tax under the U.S.-Canada tax treaty. *See, e.g.*, S. Rep. No. 169, *supra*, at 562.

[64] While new Code §813 alters somewhat the 1959 Act method for calculating the minimum level of surplus, the Report of the Senate Finance Committee notes:

> "The bill requires the calculation of required surplus in a manner similar to the calculation of the 'minimum figure' under present law. The Secretary of the Treasury is to calculate the percentage used in the taxpayer's calculation in a manner similar to the manner of present law."

S. Rep. No. 169, *supra*, at 563.

[65] New Code §813(b) provides a special rule for the determination of a foreign mutual life insurance company's equity base for purposes of Code §809, essentially increasing that base by the company's surplus "deficit."

[66] In this regard, the Committee Reports specifically state that the reference to "reserves" in the former Code §815(d) limitation, as carried forward into the new law, is to be taken to mean "reserves computed in a manner consistent with the provisions of the 1959 Act." *See* H.R. Rep. No. 432, *supra*, at 1411; S. Rep. No. 169, *supra*, at 537.

[67] The policyholders' share of this deduction, which had also been an addition item under the 1959 Act, was eliminated under the new law "in order to prevent some of the double counting that existed under the 1959 Act." *See* H.R. Rep. No. 432, *supra*, at 1411; S. Rep. No. 169, *supra*, at 537.

[71] New Code §817(g) does provide that a variable annuity contract, as defined therein, is to be treated as an annuity contract, preserving a rule similar to that of former Code §801(g). Also, subsection (h) of new Code §817, and new Code §72(s), introduce requirements of a definitional nature for annuity contracts.

[76] To the extent that fund shares or units are owned by a company's general account or, for that matter, by any other party, the availability of the "look through" will be dependent on regulations.

[77] *See* Rep. No. 861, *supra*, at 1055.

[78] Because Code §817(h), by its terms, applies only to nonqualified contracts, it may be viewed as reversing Rev. Rul. 81-225 insofar as that ruling affected separate accounts involving qualified plans.

[84] For example, under former Code §809(c)(1), indemnity reinsurance consideration paid by the ceding company reduced its premium income and under former Code §809(d)(7), assumption reinsurance consideration paid by the ceding company was deductible.

[85] S. Rep. No. 169, *supra*, at 556.

[86] Precisely when a risk is first considered reinsured is not explained in the statute, though Rep. No. 861, *supra*, notes at 1065 that "a risk is not considered reinsured prior to the time it arises under the contracts covered by the reinsurance agreement."

[87] Rep. No. 861, *supra*, at 1062-1065.

[88] For example, in *Helvering v. LeGierse*, 312 U.S. 531 (1941), the Supreme Court concluded that "historically and commonly insurance involves risk shifting and risk distribution." In that case, the Court denied an estate tax exclusion for insurance where the simultaneous issuance of a life insurance contract and a nonrefundable annuity contract on an 80-year-old insured foreclosed, as a practical matter, the insurer's assumption of any mortality risk.

The *LeGierse* definition of insurance has consistently been applied in the interpretation of the phrase "life insurance contract" in Code §101(a)(1). The IRS somewhat expanded the definition in Rev. Rul. 66-322, 1966-2 C.B. 123, where it held that a retirement income endowment contract, in which the cash surrender value exceeded the face amount of the contract, would be treated as providing life insurance because the contract, for substantial periods in the past, had involved an insurance risk. However, in *Evans v. Comr.*, 56 T.C. 1142 (1971), the Tax Court disagreed with this conclusion, holding that a contract would be treated as life insurance only during such time as a risk element was present in the contract.

[90] PLR 8132119.

[91] The specific rules of Code §101(f) are described in Chapter 1 of T.M. Portfolio 982.

[92] H.R. Rep. No. 432, *supra*, at 1399.

[93] While this definition is directed to commercial life insurance policies, it presumably does not adversely affect life insurance arrangements such as those considered in *Ross v. Odom*, 401 F.2d 464 (5th Cir. 1968), and *Treganowan v. Comr.*, 183 F.2d 288 (2nd Cir. 1950).

It should also be noted that, under new Code §7702(h), endowment contracts are equated with life insurance contracts.

[94] H.R. Rep. No. 432, *supra*, at 1443; S. Rep. No. 169, *supra*, at 572. To clarify that paid-up additions are considered to be part of the "basic" contract for purposes of the new Code §7702 effective date and transition rules, the Report of the Senate Finance Committee continues at 572:

> "For example, for purposes of this definition, a whole life insurance contract that provides for the purchase of paid-up or deferred additions will be treated as a single life insurance contract."

[95] This test is derived, in part, from Code §101(f)(1)(B). It now appears as the first of the two tests because of the expectation that it will be applicable to a broader class of contracts. The cash value accumulation test under Code §7702 differs from Code §101(f)(1)(B) test in that: (1) the net single premium may now reflect amounts for qualified additional benefits, (2) it may also now fund a return-of-cash-value death benefit, and (3) the maturity date under the computational rules of Code §7702(e) applies equally to the cash value accumulation test and the guideline premium test. Further discussion of these rules appears below.

[96] S. Rep. No. 169, *supra*, at 573, defines a "reasonable termination dividend" with reference to the historical practice of the industry, under which termination dividends "have been modest in amount." It also indicates that the cash value of a contract is interpreted as the amount to which a policyholder is entitled upon surrender and against which the policyholder may borrow, and specifically states that the term "cash surrender value" will not include the refund of unearned premiums under a credit life insurance policy.

[97] S. Rep. No. 169, *supra*, at 574.

[98] H.R. Rep. No. 432, *supra*, at 147. The guideline premium test under Code §7702 differs from the Code §101(f)(1)(A) test as follows: (1) the guideline level premium under Code §7702 is defined as the level amount payable to age 95 or beyond (eliminating the minimum 20-year provision contained in Code §101(f)); (2) the applicable percentage "corridor" is increased over that of Code §101(f); and (3) the computational rules no longer permit either the assumption of endowments before age 95 or the funding of return-of-cash-value or "option 2" death benefits on a single premium basis.

[99] This third reduction element was included to permit otherwise taxable disbursements (such as those made in connection with a partial surrender) to reduce the "premiums paid." As under Code §101(f), Code §7702(f)(6) provides that a premium payment which would cause the sum of the premiums paid to exceed the guideline premium limitation will not result in disqualification of the contract if such payment is required to prevent termination of the contract with no cash value on or before the end of the taxable year.

[100] Such charges include "loading" but presumably do not include surrender charges. A charge not identified as such in the contract is taken to be "zero."

[101] The Committee Reports indicate that this rule merely "deems" the maturity date to fall between ages 95 and 100, rather than requiring that the contract so provide.

[102] Compare Code §7702(c)(3)(C).

[103] S. Rep. No. 169, *supra*, at 577-578.

[104] This provision should not apply in the case of a policy loan where, under the terms of a contract, a loan is a lien against the death benefit but does not specifically reduce it.

[105] *See, e.g.*, S. Rep. No. 169, *supra*, at 575, n.24.

[106] It is unclear whether a second or third life covered under a "joint life" policy would be considered subject to the additional benefit rules, though nothing in Code §7702 or its history suggests that there should be a problem with the continued provision of joint life coverage.

[107] The Committee Reports refer to the triggering death benefit change as one in "amount," distinguishing it from a change in the duration of the death benefit. This is intended to provide parity of treatment as between "traditional" and "universal" variable life products. *See, e.g.*, S. Rep. No. 169, *supra*, at 572-573. Also, recall that new Code §817(h) provides "diversification" requirements that the funds underlying a variable life contract must meet in order for the contract to be treated as complying with the tests of Code §7702.

[108] S. Rep. No. 169, *supra*, at 579.

[109] Special transitional relief, specific to the situations of several companies, is also provided under Act §221(d)(2)(C) and (3).

[110] Rep. No. 760, 97th Cong., 2d Sess. 647.

[111] New Code §72(s) thus applies to both qualified and nonqualified contracts.

[112] For contracts issued before January 19, 1985, and for investments made after January 18, 1985, on contracts existing as of that date, the 10-year look-back rule (as modified) will continue to apply.

[113] Rep. No. 861, *supra*, at 1077-1078.

[114] The exclusion with respect to disabled employees is retained.

[115] According to S. Rep. No. 169, *supra*, at 581, this change recognizes that the focus of the exchange rule should be on the character and benefits of the contract rather than the tax status of the company issuing the contract.

LEGISLATIVE HISTORY OF THE TAX REFORM ACT OF 1984 (SUMMARY)

The Tax Reform Act of 1984, introduced as H.R. 4170 on October 20, 1983, was comprised of 13 previously introduced bills on which separate hearings had been held: H.R. 699, H.R. 2476, H.R. 2831, H.R. 3096, H.R. 3110, H.R. 3173, H.R. 3475, H.R. 3525, H.R. 3592, H.R. 3593, H.R. 3805, and H.R. 4065. The Ways and Means Committee Report on H.R. 4170 (H.R. Rep. 98-432, Vol. I and II) was filed the following day, October 21, 1983.

Some of the major provisions of the original version H.R. 4170 were derived from:

H.R. 3110, introduced May 24, 1983, which included tax-exempt entity leasing provisions. Hearings were held before the House Ways and Means Committee on June 8, 1983, and July 26 and 27, 1983.

H.R. 3475, the Tax Simplification and Improvement Act of 1983, introduced June 30, 1983. Hearings were held before the House Ways and Means Committee on July 25, 1983.

H.R. 1635, introduced on February 24, 1983, and H.R. 1176, introduced on February 2, 1983, which contained tax-exempt bond provisions. Hearings were held before the House Ways and Means Committee on June 15-16, 1983.

H.R. 3525, introduced July 12, 1983, which contained provisions relating to the tax treatment of fringe benefits. Hearings were held before House Ways and Means Subcommittee on Select Revenue Measures on August 1, 1983.

H.R. 4065, the Life Insurance Tax of 1983, introduced October 5, 1983. Hearings were held before the House Ways and Means Subcommittee on Select Revenue Measures on May 10-11, and July 28, 1983.

Progress on H.R. 4170 in the First Session of the 98th Congress proved slow. After being reported by the Ways and Means Committee, the bill was sent to the House Rules Committee where it was subject to political maneuvering over the proposed limitations on tax-exempt bonds. On November 15, 1983, a compromise on the rules for debate on the floor was reached. But on November 17, 1983, the House rejected the rule (H. Res. 376) by a vote of 214-204.

Senator Robert Dole (R-Kan.), Chairman of the Senate Finance Committee, at the same time was attempting to assemble a "deficit reduction" package that would include tax increases and spending reductions in government programs. Although a mark-up on November 16 and 18, 1983, failed to produce specific legislation, the Senate Finance Committee did agree to the need for a deficit reduction proposal.

President Reagan's 1984 State of the Union address in January proved to be a catalyst for Congressional action on a "down payment on the deficit."

On February 22 and 28, 1984, hearings were held before the House Ways and Means Committee on proposals advocated by the Treasury Department on tax shelters and other tax reform provisions. These proposals were the subject of a Ways and Means mark-up on April 29, and March 1, 1984. The revised bill produced a significantly broader revenue raising measure than the original H.R. 4170. This was then added as an amendment in the nature of a substitute to H.R. 4170; a supplemental report (H.R. Rep. 98-432, Part 2) was filed on March 5, 1984.

The House of Representatives passed the bill on April 11, 1984, and the legislation was sent to the Senate for consideration.

On February 23, 1984, as the House worked on its version of the tax bill, the Senate Finance Committee began mark-up of a broad-based deficit reduction plan. This included, among other provisions, revenue raising and spending reduction recommendations from Title I of S. 2062, the Omnibus Reconciliation Act of 1983, which had been approved by the Finance Committee on October 31, 1983, in compliance with the budget process. S. 2062 was favorably reported by the Senate Budget Committee on Nocember 4, 1983 (S. Rep. No. 98-300).

The Finance Committee mark-up continued through much of March and concluded on March 21, 1984, with the adoption of the plan by a vote of 21-0. In anticipation of attaching the Committee-passed language as a Committee Amendment to a House-passed vehicle, the Senate Finance Committee took the unusual step of issuing its statutory and legislative history language as a Senate "Print," rather than a Report. (S. Prt. 98-169, Vol. I and II) on April 2, 1984. Debate began April 5, 1984, on H.R. 2163, the Sport Fishing Restoration Revenue Act of 1983.

On April 12, 1984, the statutory language of this print was added as a Senate Finance Committee amendment, with floor amendments, to H.R 2163. Debate continued in the Senate on other non-tax related amendments to the bill and concluded with passage of H.R. 4170 in lieu of H.R. 2163 on May 17, 1984 (this procedure was made possible by the passage in the House, in the intervening period, of H.R. 4170, and enabled the differences between the two proposals to be settled in Conference). In anticipation of a conference on the bill, the Senate also agreed to a conference and named its conferees.

The Senate version of H.R. 4170, the Deficit Reduction Act of 1984, (DRA) was then returned to the House on May 23, 1984, whereupon the House insisted on its version of H.R. 4170, the Tax Reform Act of 1984, and agreed to a conference.

The Conference Committee began consideration of the bill on June 6, 1984, and concluded its action on June 22, 1984. The Conference report (H.R Rep. 98-861) was filed by the Committee on June 23, 1984. The House and Senate approved the Conference version on June 27, 1984. On the same day, the House agreed to H. Con. Res. 328, directing the Clerk to make certain corrections in the enrollment of H.R. 4170. On June 29, 1984, the Senate agreed to the Resolution, with amendments in which the House concurred. President Reagan signed the Deficit Reduction Act of 1984 into law on July 18, 1984. The DRA became Public Law No. 98-369.

"SEC. 1286. TAX TREATMENT OF STRIPPED BONDS.

"(a) INCLUSION IN INCOME AS IF BOND AND COUPONS WERE ORIGINAL ISSUE DISCOUNT BONDS.—If any person purchases after July 1, 1982, a stripped bond or a stripped coupon, then such bond or coupon while held by such purchaser (or by any other person whose basis is determined by reference to the basis in the hands of such purchaser) shall be treated for purposes of this part as a bond originally issued on the purchase date and having an original issue discount equal to the excess (if any) of—

"(1) the stated redemption price at maturity (or, in the case of coupon, the amount payable on the due date of such coupon), over

"(2) such bond's or coupon's ratable share of the purchase price.

For purposes of paragraph (2), ratable shares shall be determined on the basis of their respective fair market values on the date of purchase.

"(b) TAX TREATMENT OF PERSON STRIPPING BOND.—For purposes of this subtitle, if any person strips 1 or more coupons from a bond and after July 1, 1982, disposes of the bond or such coupon—

"(2) is purchased after December 31, 1957, and before July 2, 1982, and the purchaser does not receive all the coupons which first become payable after the date of the purchase,

then the gain on the sale or other disposition of such bond by such purchaser (or by a person whose basis is determined by reference to the basis in the hands of such purchaser) shall be considered as ordinary income to the extent that the fair market value (determined as of the time of the purchase) of the bond with coupons attached exceeds the purchase price. If this subsection and section 1271(a)(2)(A) apply with respect to gain realized on the sale or exchange of any evidence of indebtedness, then section 1271(a)(2)(A) shall apply with respect to that part of the gain to which this subsection does not apply.

"(2) has a contiguous country life insurance branch, and

"(3) makes the election provided by subsection (g) with respect to such branch,

"(b) CONTIGUOUS COUNTRY LIFE INSURANCE BRANCH.—For purposes of this section, the term contiguous country life insurance branch means a branch which—

"(1) issues insurance contracts insuring risks in connection with the lives or health of residents of a country which is contiguous to the United States,

"(2) has its principal place of business in such contiguous country, and

For purposes of this section, the term 'insurance contract' means any life, health, accident, or annuity contract or reinsurance contract or any contract relating thereto.

"(c) SEPARATE ACCOUNTING REQUIRED.—Any taxpayer which makes the election provided by subsection (g) shall establish and maintain a separate account for the various income, exclusion, deduction, asset, reserve, liability, and surplus items properly attributable to the contracts described in subsection (b). Such separate accounting shall be made—

"(1) in accordance with the method regularly employed by such company, if such method clearly reflects income derived from, and the other items attributable to, the contracts described in subsection (b), and

"(2) in all other cases, in accordance with regulations prescribed by the Secretary.

"(d) RECOGNITION OF GAIN ON ASSETS IN BRANCH ACCOUNT.—If the aggregate fair market value of all the invested assets and tangible property which are separately accounted for by the domestic life insurance company in the branch account established pursuant to subsection (c) exceeds the aggregate adjusted basis of such assets for purposes of determining gain, then the domestic life insurance company shall be treated as having sold all such assets on the first day of the first taxable year for which the election is in effect at their fair market value on such first day. Notwithstanding any other provision of this chapter, the net gain shall be recognized to the domestic life insurance company on the deemed sale described in the preceding sentence.

"(2) REPATRIATION OF INCOME.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), any amount directly or indirectly transferred or credited from a branch account established pursuant to subsection (c) to one or more other accounts of such company shall, unless such transfer or credit is a reimbursement to which paragraph (1) applies, be added to the income of the domestic life insurance company.

"(B) LIMITATION.—The addition provided by subparagraph (A) for the taxable year with respect to any contiguous country life insurance branch shall not exceed the amount by which—

"(i) the aggregate decrease in the tentative LICTI of the domestic life insurance company for the taxable year and for all prior taxable years resulting solely from the application of subsection (a) of this section with respect to such branch, exceeds

"(ii) the amount of additions to tentative LICTI pursuant to subparagraph (A) with respect to such contiguous country branch for all prior taxable years.

"(C) TRANSITIONAL RULE.—For purposes of this paragraph, in the case of a prior taxable year beginning before January 1, 1984, the term 'tentative LICTI' means life insurance company taxable income determined under this part (as in effect for such year) without regard to this paragraph.

"(f) OTHER RULES.—

"(1) TREATMENT OF FOREIGN TAXES.—

"(A) IN GENERAL.—No income, war profits, or excess profits taxes paid or accrued to any foreign country or possession of the United States which is attributable to income excluded under subsection (a) shall be taken into account for purposes of subpart A of part III of subchapter N (relating to foreign tax credit) or allowable as a deduction.

"(B) TREATMENT OF REPATRIATED AMOUNTS.—For purposes of sections 78 and 902, where any amount is added to the life insurance company taxable income of the domestic life insurance company by reason of subsection (e)(2), the contiguous country life insurance branch shall be treated as a foreign corporation. Any amount so added shall be treated as a dividend paid by a foreign corporation, and the taxes paid to any foreign country or possession of the United States with respect to such amount shall be deemed to have been paid by such branch.

"(2) UNITED STATES SOURCE INCOME ALLOCABLE TO CONTIGUOUS COUNTRY BRANCH.—For purposes of sections 881, 882, and 1442, each contiguous country life insurance branch shall be treated as a foreign corporation. Such sections shall be applied to each such branch in the same manner as if such sections contained the provisions of any treaty to which the United States and the contiguous country are parties, to the same extent such provisions would apply if such branch were incorporated in such contiguous country.

"(g) ELECTION.—A taxpayer may make the election provided by this subsection with respect to any contiguous country for any taxable year. An election made under this subsection for any taxable year shall remain in effect for all subsequent taxable years, except that it may be revoked with the consent of the Secretary. The election provided by this subsection shall be made not later than the time prescribed by law for filing the return for the taxable year (including extensions thereof) with respect to which such election is made, and such election and any approved revocation thereof shall be made in the manner provided by the Secretary.

"(h) SPECIAL RULE FOR DOMESTIC STOCK LIFE INSURANCE COMPANIES.—At the election of a domestic stock life insurance company which has a contiguous country life insurance branch described in subsection (b) (without regard to the mutual requirement in subsection (b)(3)), the assets of such branch may be transferred to a foreign corporation organized under the laws of the contiguous country without the application of section 367 or 1491. Subsection (a) shall apply to the stock of such foreign corporation as if such domestic company were a mutual company and as if the stock were an item described in subsection (c). Subsection (e)(2) shall apply to amounts transferred or credited to such domestic company as if such domestic company and such foreign corporation constituted one domestic mutual life insurance company. The insurance contracts which may be transferred pursuant to this subsection shall include only those which are similar to the types of insurance contracts issued by a mutual life insurance company. Notwithstanding the first sentence of this subsection, if the aggregate fair market value of the invested assets and tangible property which are separately accounted for by the domestic life insurance company in the branch account exceeds the aggregate adjusted basis of such assets for purposes of determining gain, the domestic life insurance company shall be deemed to have sold all such assets on the first day of the taxable year for which the election under this subsection applies and the net gain shall be recognized to the domestic life insurance company on the deemed sale, but not in excess of the proportion of such net gain which equals the proportion which the aggregate fair market value of such assets which are transferred pursuant to this subsection is of the aggregate fair market value of all such assets.

"(2) the amount of direct and indirect distributions during such year to shareholders from such account.

"(b) ORDERING RULE.—For purposes of this section, any distribution to shareholders shall be treated as made—

"(A) which are computed or estimated on the basis of recognized mortality or morbidity tables and assumed rates of interest, and

"(B) which are set aside to mature or liquidate, either by payment or reinsurance, future unaccrued claims arising from life insurance, annuity, and noncancellable accident and health insurance contracts (including life insurance or annuity contracts combined with noncancellable accident and health insurance) involving, at the time with respect to which the reserve is computed, life, accident, or health contingencies.

"(2) RESERVES MUST BE REQUIRED BY LAW.—Except—

"(A) in the case of policies covering life, accident, and health insurance combined in one policy issued on the weekly premium payment plan, continuing for life and not subject to cancellation, and

"(B) as provided in paragraph (3),

in addition to the requirements set forth in paragraph (1), life insurance reserves must be required by law.

"(3) ASSESSMENT COMPANIES.—In the case of an assessment life insurance company or association, the term 'life insurance reserves' includes—

"(1) life insurance reserves,

"(2) unearned premiums, and unpaid losses (whether or not ascertained), not included in life insurance reserves, and

"(3) all other insurance reserves required by law.

"(d) ADJUSTMENTS IN RESERVES FOR POLICY LOANS.—For purposes only of determining under subsection (a) whether or not an insurance company is a life insurance company, the life insurance reserves, and the total reserves, shall each be reduced by an amount equal to the mean of the aggregates, at the beginning and end of the taxable year, of the policy loans outstanding with respect to contracts for which life insurance reserves are maintained.

"(e) GUARANTEED RENEWABLE CONTRACTS.—For purposes of this part, guaranteed renewable life, accident, and health insurance shall be treated in the same manner as noncancellable life, accident, and health insurance.

"(f) AMOUNTS NOT INVOLVING LIFE, ACCIDENT, OR HEALTH CONTINGENCIES.—For purposes only of determining under subsection (a) whether or not an insurance company is a life insurance company, amounts set aside and held at interest to satisfy obligations under contracts which do not contain permanent guarantees with respect to life, accident, or health contingencies shall not be included in reserves described in paragraph (1) or (3) of subsection (c).

"(1) by subtracting therefrom an amount equal to the sum of the amounts added from time to time (for the taxable year) to the reserves separately accounted for in accordance with subsection (c) by reason of appreciation in value of assets (whether or not the assets have been disposed of), and

"(2) by adding thereto an amount equal to the sum of the amounts subtracted from time to time (for the taxable year) from such reserves by reason of depreciation in value of assets (whether or not the assets have been disposed of).

The deduction allowable for items described in paragraphs (1) and (6) of section 805(a) with respect to variable contracts shall be reduced to the extent that the amount of such items is increased for the taxable year by appreciation (or increased to the extent that the amount of such items is decreased for the taxable year by depreciation) not reflected in adjustments under the preceding sentence.

"(b) ADJUSTMENT TO BASIS OF ASSETS HELD IN SEGREGATED ASSET ACCOUNT.—In the case of variable contracts, the basis of each asset in a segregated asset account shall (in addition to all other adjustments to basis) be—

"(1) increased by the amount of any appreciation in value, and

"(2) decreased by the amount of any depreciation in value,

to the extent such appreciation and depreciation are from time to time reflected in the increases and decreases in reserves or other items referred to in subsection (a) with respect to such contracts.

"(c) SEPARATE ACCOUNTING.—For purposes of this part (other than section 809), a life insurance company which issues variable contracts shall separately account for the various income, exclusion, deduction, asset, reserve, and other liability items properly attributable to such variable contracts. "(B) in the case of a life insurance contract, the amount of the death benefit (or the period of coverage) is adjusted on the basis of the investment return and the market value of the segregated asset account.

If a contract ceases to reflect current investment return and current market value, such contract shall not be considered as meeting the requirements of paragraph (3) after such cessation.

"(e) PENSION PLAN CONTRACTS TREATED AS PAYING ANNUITY.—A pension plan contract which is not a life, accident, or health, property, casualty, or liability insurance contract shall be treated as a contract which provides for the payments of annuities for purposes of subsection (d).

"(f) OTHER SPECIAL RULES.—

"(1) LIFE INSURANCE RESERVES.—For purposes of subsection (b)(1)(A) of section 816, the reflection of the investment return and the market value of the segregated asset account shall be considered an assumed rate of interest.

"(2) ADDITIONAL SEPARATE COMPUTATIONS.—Under regulations prescribed by the Secretary, such additional separate computations shall be made, with respect to the items separately accounted for in accordance with subsection (c), as may be necessary to carry out the purposes of this section and this part.

For purposes of the preceding sentence, beneficial interests in a regulated investment company or in a trust shall not be treated as 1 investment if all of the beneficial interests in such company or trust are held by 1 or more segregated asset accounts of 1 or more insurance companies.

"(2) SAFE HARBOR FOR DIVERSIFICATION.—A segregated asset account shall be treated as meeting the requirements of paragraph (1) for any quarter of a taxable year if as of the close of such quarter—

(C) 10-YEAR SPREAD INAPPLICABLE WHERE NO 10-YEAR SPREAD UNDER PRIOR LAW.—In the case of any item to which section 807(f) of such Code applies by reason of subparagraph (A) or (B), such item shall be taken into account for the first taxable year beginning after December 31, 1983 (in lieu of over the 10-year period otherwise provided in such section) unless the item was required to have been taken into account over a period of 10 taxable years under section 810(d) of such Code (as in effect on the day before the date of the enactment of this Act).

(B) EXCEPTION FOR CERTAIN CONTRACTS ISSUED UNDER PLAN OF INSURANCE FIRST FILED AFTER MARCH 1, 1982, AND BEFORE SEPTEMBER 28, 1983.—Subparagraph (A) shall not apply to any election under such section 818(c) if more than 95 percent of the reserves computed in accordance with such election are attributable to risks under life insurance contracts issued by the taxpayer under a plan of insurance first filed after March 1, 1982, and before September 28, 1983.

(5) RECAPTURE OF REINSURANCE AFTER DECEMBER 31, 1983.—If (A) insurance or annuity contracts in force on December 31, 1983, are subject to a conventional coinsurance agreement entered into after December 31, 1981, and before January 1, 1984, and (B) such contracts are recaptured by the reinsured in any taxable year beginning after December 31, 1983, then—

I. TAX FREEZE; TAX REFORMS GENERALLY

A. TAX FREEZE AND RELATED PROVISIONS

1. Postponement of finance lease provisions

Present law

Overview

The law contains rules (pre-safe harbor lease rules) to determine who owns an item of property for tax purposes when the property is subject to an agreement which the parties characterize as a lease. Such rules are important because the owner of the property is entitled to claim tax benefits including cost recovery deductions and investment tax credits with respect to the property. The pre-safe harbor rules attempt to distinguish between true leases, in which the lessor owns the property for tax purposes, and conditional sales or financing arrangements, in which the user of the property owns the property for tax purposes. These rules generally are not written in the Internal Revenue Code. Instead they evolved over the years through a series of court cases and revenue rulings and revenue procedures issued by the Internal Revenue Service. Essentially, the law is that the economic substance of a transaction, not its form, determines who is the owner of property for tax purposes. Thus, if a transaction is, in substance, simply a financing arrangement, it is treated that way for tax purposes, regardless of how the parties choose to characterize it. Under the pre-safe harbor lease rules, lease transactions cannot be used solely for the purpose of transferring tax benefits. They have to have nontax economic substance.

The Economic Recovery Tax Act of 1981 (ERTA) provided a new set of rules which represented a major departure from the pre-safe harbor rules. These provisions were intended to be a means of transferring tax benefits rather than a means of determining which person is in substance the owner of the property. Under these rules (safe-harbor lease rules), certain transactions involving tangible personal property were treated as leases for Federal income tax purposes regardless of their nontax economic substance. The pre-safe harbor leasing rules continued to apply for transactions not qualifying under the safe-harbor lease rules or when the safe harbor was not elected.

The Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) generally repealed safe-harbor leasing. In its place, TEFRA substituted a liberalized form of pre-safe harbor leasing called finance leasing. The finance lease rules essentially provide that certain parts of the pre-safe harbor rules are not taken into account in determining whether an agreement with respect to a limited class of property is a lease for tax purposes. Thus, the pre-safe harbor rules apply when finance lease rules are unavailable, and, except to the extent not taken into account under the finance lease rules, they apply when the finance lease rules are available.

Pre-safe harbor leasing rules

Underlying principles

In general, the determination of lease treatment under the pre-safe harbor leasing rules requires a case-by-case analysis based on all the facts and circumstances. Although the determination of whether a transaction is a lease is inherently factual, a series of general principles is embodied in court cases, revenue rulings, and revenue procedures. These principles are used in determining the character of transactions not eligible for the safe-harbor lease rules.

For a transaction to be a lease under these rules, the lessee generally cannot hold title to or have a significant equity interest in the property. However, the fact that the lessor has title does not guarantee that the lessor is the owner for Federal income tax purposes. Both the courts and the IRS look to additional criteria in determining whether a transaction is a lease. These criteria focus on the substance of the transaction rather than its form. The courts do not disregard the form of a transaction simply because tax considerations are a significant motive so long as the transaction also has a bona fide business purpose and the lessor retains sufficient burdens and benefits of ownership.[1]

To be entitled to depreciation deductions as the owner of the property, the lessor has to show that the property is being used by it for a business or other income-producing purpose. To have a business purpose, the person claiming ownership (i.e., the lessor) at least has to have a reasonable expectation that he will derive a profit from the transaction independent of tax benefits.[2] This requirement precludes lease treatment for a transaction intended merely to reduce the user's costs by utilizing the lessor's tax base. For a sale-leaseback, other nontax business motives have been considered in determining the substance of the transaction.

The fact that the lessor in a lease financing transaction can show a profit or business purpose, however, does not automatically result in lease treatment under pre-safe harbor lease rules, since a profit or business motive could also exist in a financing arrangement. In addition, the lessor has to retain meaningful benefits and burdens of ownership.[3] Thus, lease treatment has been denied under pre-safe harbor lease rules if the user has the option to acquire the property at the end of the lease for a price that either is nominal in relation to the value of the property at the time when the option can be exercised (as determined at the time the parties entered into the agreement) or which is relatively small when compared with the total payments required to be made.

Where the residual value of the property to the lessor is nominal, the lessor has been viewed as having transferred full ownership of the property for the rental fee. Where the purchase option is more than nominal but relatively small in comparison with fair market value, the lessor may still be viewed as having transferred full ownership if the likelihood that the lessee will exercise the bargain purchase option is great.[4] Furthermore, if the lessor can force the lessee to purchase the property at the end of the lease (a put), the transaction might also be denied lease treatment under pre-safe harbor lease rules if the put eliminates the risk borne by owners of property that there may be no market for the property at the end of the lease.

Objective guidelines used in structuring transactions

The question of exactly what burdens and benefits of ownership have to be retained by the lessor under pre-safe harbor lease rules created some confusion and difficulty for people trying to structure leases that, at least in part, were motivated by tax considerations. To give taxpayers guidance in structuring leveraged leases (i.e., where the property is financed by a loan from a third party), the Internal Revenue Service in 1975 issued Revenue Procedure 75-21, 1975-1 C.B. 715, and a companion document, Revenue Procedure 75-28, 1975-1 C.B. 752 (the guidelines). If the requirements of the guidelines are met and if the facts and circumstances do not indicate a contrary result, the Service will issue an advance letter ruling that the transaction is a lease and that the lessor is the owner for Federal income tax purposes.

The guidelines generally apply only to leveraged leases of equipment. The general principles described above continue to govern nonleveraged leases and leases of real property. The guidelines are not a definitive statement of legal principles and are not intended for audit purposes. If less than all requirements of the guidelines are met, a transaction might still be considered a lease if, under all the facts and circumstances, the transaction is a lease under the general principles discussed previously. However, in practice, many taxpayers have taken into account the guidelines' requirements in structuring transactions. The guidelines may be viewed as a type of safe harbor.

The specific requirements for obtaining a ruling under the guidelines are as follows:

1. *Minimum investment.*—The lessor must have a minimum 20 percent unconditional at-risk investment in the property. This rule represents an attempt to ensure that the lessor experiences some significant loss if the property declines in value. By limiting the degree of nonrecourse leverage, this guideline also limits the pool of potentially

transferable tax benefits from such transactions.

2. *Purchase options.*—In general, the lessee may not have an option to purchase the property at the end of the lease term unless, under the lease agreement, the option can be exercised only at fair market value (determined at the time of exercise). This rule precludes fixed price purchase options, even at a bona fide estimate of the projected fair market value of the property at the option date. In addition, when the property is first placed in service by the lessee, the lessor cannot have a contractual right to require the lessee or any other party to purchase the property, even at fair market value.

The fair market value purchase option requirement fulfills three purposes related to the determination of the economic substance of the transaction. First, it ensures that the lessor bears the risk implicit in ownership,that no market or an unfavorable market will exist at the end of the lease. Second, it ensures that the lessor has retained an equity interest in the property. Any fixed price option represents a limitation on the lessor's right of full enjoyment of the property's value. Third, it limits the ability of the parties to establish an artificial rent structure to avoid the cash flow test (described below). However, several courts have held that the mere existence of a fixed price purchase option does not prevent lease treatment so long as the lessor retains other significant burdens and benefits of ownership.[6]

Safe harbor leasing rules

The safe-harbor leasing provisions of ERTA were intended to permit owners of property who were unable to use depreciation deductions and investment credits to transfer those benefits to persons who were able to use them, without having to meet the pre-safe harbor lease requirements for characterizing the transaction as a lease. The safe-harbor leasing provisions operated by guaranteeing that, for Federal income tax purposes, qualifying transactions were treated as leases and that the nominal lessor was treated as the owner of the property, even though the lessee was in substance the owner of the property and the transaction otherwise would not have been considered a lease.[7]

3. *Lessee investment precluded.*—Neither the lessee nor a party related to the lessee may furnish any part of the cost of the property. The rationale is that a lessee investment may suggest that the lessee is in substance a co-owner of the property.

4. *No lessee loans or guarantees.*—As a corollary to the prior rule, the lessee must not loan to the lessor any of the funds necessary to acquire the property. In addition, the lessee must not guarantee any lessor loan.

5. *Profit and cash flow requirements.*—The lessor must expect to receive a profit from the transaction and have a positive cash flow from the transaction independent of tax benefits. These guidelines are based on the requirement, as previously mentioned, that lease transactions must have a business purpose independent of tax benefits.

6. *Limited use property.*—Under Revenue Procedure 76-30, 1976-2 C.B. 647, property that can be used only by the lessee (limited use property) is not eligible for lease treatment. The rationale is that if the lessee is the only person who could realistically use the property, the lessor has not retained any significant ownership interest.

The Tax Equity and Fiscal Responsibility Act of 1982 generally repealed safe-harbor leasing.

Finance lease provisions

TEFRA provided rules (finance leasing rules) which in two respects liberalized the pre-safe harbor leasing rules with respect to certain property. Under the finance leasing rules, the fact that (1) the lessee has an option to purchase the property at a fixed price of 10 percent or more of its original cost to the lessor or (2) the property is readily usable only by the lessee (limited use property) is not taken into account in determining whether the agreement is a lease.

A qualified agreement must be a lease determined without taking into account the fact that it contains a 10-percent fixed price purchase option or that the property is limited use property. Thus, the transaction must have economic substance independent of tax benefits. The lessor must reasonably expect to derive a profit independent of tax benefits. In addition, the transaction, without taking into account the fact the agreement contains a fixed price purchase option or that the property is limited use property, must not otherwise be considered a financing arrangement or conditional sale.

The finance lease rules generally apply to agreements entered into after December 31, 1983, but three restrictions apply in 1984 and 1985. First, no more than 40 percent of property placed in service by a lessee during any calendar year beginning before 1986 may qualify for finance lease treatment. Second, a lessor may not use finance lease rules to reduce its tax liability for any taxable year by more than 50 percent. This 50-percent lessor cap does not apply to property placed in service after September 30, 1985 (in taxable years beginning after that date). Third, the investment tax credit for property subject to a finance lease and placed in service on or before September 30, 1985, is only allowable ratably over 5 years, rather than entirely in the year the property is placed in service.

An exception to the general rule is provided for agreements relating to farm property. Finance lease rules are available for up to $150,000 of a lessee's farm property, for agreements entered into after July 1, 1982, and before 1984. Furthermore, the 40-percent lessee cap, 50-percent lessor cap, and 5-year spread of investment credit are inapplicable to this farm property.

No regulations have been issued under the finance lease provisions.

House bill

The House bill postpones for four years the effective dates of the finance lease rules. Thus, these rules generally apply only to agreements entered into after December 31, 1987, and the three restrictions currently scheduled to apply in 1984 and 1985 apply in 1988 and 1989. First, the 40-percent lessee cap is extended to cover property placed in service by a lessee during any calendar year beginning before 1990. Second, the 50-percent lessor cap is extended through September 30, 1989. Third, the 5-year spread of investment credit for property subject to a finance lease is extended to cover property placed in service on or before September 30, 1989. Present law rules relating to the availability of finance leasing for up to $150,000 of a lessee's farm property are extended to cover agreements entered into before 1988.

The House bill provides transitional rules which exempt certain property from the 4-year postponement described above. Under these rules, the postponement does not apply to property if, before March 2, 1984, (1) a binding contract to acquire or construct the property was entered into by the lessee, (2) the property was acquired by the lessee, or (3) construction of the property was begun by or for the lessee.

The House bill prohibits the Treasury from issuing, before 1988, regulations relating to the determination of whether a transaction is a lease. The prohibition does not apply to regulations which carry out the purposes of the bill with respect to tax-exempt entity leasing or of section 210 of TEFRA (relating to agreements covering certain motor vehicles).

Senate amendment

The Senate amendment is generally the same as the House bill. However, the Senate amendment substitutes March 7, 1984, for March 2, 1984, in the transitional rules, and does not include a provision prohibiting the Treasury from issuing leasing regulations. In addition, the Senate amendment exempts the following property from the 4-year postponement of finance leasing rules: (1) up to $150 million of a qualified lessee's automotive manufacturing property and (2) property that is part of a coal-fired cogeneration facility for which certification and construction permit applications were filed on specified dates.

Conference agreement

The conference agreement generally follows the Senate amendment.

In the Tax Equity and Fiscal Responsibility Act of 1982, Congress permitted lease treatment, beginning in 1984, for agreements which would be appropriately treated as leases under current administrative rules and practices were it not for the fact that the agreement contained a fixed price purchase option or pertained to limited use property. The conference agreement postpones these relaxations of current administrative guidelines, and the conferees intend that those guidelines should not be relaxed by administrative action.

The conference agreement does not include the provision of the House bill which generally would have prohibited the Treasury Department from issuing leasing regulations before 1988. The conferees reached this decision on the basis of an understanding that the Treasury Department does not intend to liberalize significantly current administrative rules and practices for determining whether an agreement is a lease or a financing arrangement. The conferees also took into account the fact that a prohibition could have precluded perfecting modifications that may be shown to be necessary but that would not operate to liberalize current administrative guidelines in this area.

The conferees are concerned that agreements represented as leases are being used to transfer the tax benefits of ownership from persons who cannot utilize them to nominal lessors who can, when in substance the nominal lessor does not have a significant at-risk investment in the property itself. Current administrative rules and procedures are designed to check such tax benefit transfers. Therefore, the primary objective of the conferees is that there be no relaxation of administrative rules and practices that would result in lease treatment for financing transactions in which the purported lessor does not have a significant ownership interest in the property. While recognizing that in some cases special factors may need to be taken into account, the conferees believe that current administrative rules and practices, when applied to the broad range of conventional lease financing transactions, produce a satisfactory and ap-

propriate differentiation between leases and financing arrangements.

2. Postponement of increase in amount of used property eligible for investment tax credit

Present law

The maximum amount of a taxpayer's investment in used property that is eligible for the regular investment tax credit in a taxable year is $125,000. In the case of a married individual who files a separate return, the limit is $62,500. These limits are scheduled to increase to $150,000 and $75,000, respectively, for taxable years beginning after 1984.

House bill

The House bill maintains the maximum amount of used property eligible for the investment credit at its current level of $125,000 per year until taxable years beginning after 1987, when this limit is increased to $150,000.

Senate amendment

The Senate amendment is the same as the House bill.

Conference agreement

The conference agreement follows the House bill and Senate amendment.

3. Postponement of increases in amount of property eligible for expensing

Present law

A taxpayer (other than a trust or estate) may elect, in lieu of capital cost recovery under the Accelerated Cost Recovery System, to deduct the cost of qualifying property in the taxable year it is placed in service. In general, qualifying property must be acquired by purchase for use in a trade or business and must otherwise be eligible for the investment tax credit. No investment credit is allowable for the portion of the cost of property expensed under this rule.

For taxable years beginning in 1983, the dollar limitation on the amount that can be expensed is $5,000 a year. This limitation is scheduled to increase to $7,500 for taxable years beginning in 1984 and 1985, and to $10,000 for taxable years beginning after 1985. In each case, the limitation that applies to a married individual who files a separate return is one-half the dollar limitation described above.

House bill

The House bill postpones for four years the scheduled increases in the maximum amount of property that can be expensed. Thus, the dollar limitation on the amount that can be expensed will remain at $5,000 for taxable years beginning before 1988, increase to $7,500 for taxable years beginning in 1988 or 1989, and increase to $10,000 for taxable years beginning after 1989.

Senate amendment

The Senate amendment is the same as the House bill.

Conference agreement

The conference agreement follows the House bill and Senate amendment.

4. Net interest exclusion

Present law

The Economic Recovery Tax Act of 1981 provides for an exclusion of 15 percent of net interest received, for up to $3,000 of net interest ($6,000 on a joint return). Net interest is generally interest received by the taxpayer in excess of interest paid (other than mortgage interest or business interest) by the taxpayer for which an income tax deduction is allowed.

The net interest exclusion is scheduled to take effect for taxable years beginning after 1984.

House bill

The House bill repeals the net interest exclusion.

Senate amendment

The Senate amendment postpones the effective date of the net interest exclusion to taxable years beginning after 1987.

Conference agreement

The conference agreement follows the House bill.

5. Postponement of increase in foreign earned income exclusion

Present law

The maximum amount of income earned abroad that is excludible from an individual's taxable income is $80,000 for 1983. This amount is scheduled to increase in $5,000 annual increments to a permanent level of $95,000 in 1986.

House bill

The House bill freezes the maximum amount of the foreign earned income exclusion at $80,000 until 1988 and increases it in $5,000 increments to $95,000 in 1990.

Senate amendment

The Senate amendment is the same as the House bill.

Conference agreement

The conference agreement follows the House bill and the Senate amendment.

6. Defer scheduled reductions in maximum gift and estate tax rates

Present law

The Economic Recovery Tax Act of 1981 (ERTA) enacted reductions in the maximum gift and estate tax rates, to take effect over a four-year period. The maximum rates before ERTA were 70 percent. Under ERTA, the maximum rates are 60 percent for gifts made and individuals dying in 1983; 55 percent in 1984, and 50 percent thereafter.

House bill

The House bill retains the 60-percent maximum gift and estate tax rates through 1987. The rate will be reduced to 55 percent in 1988 and 50 percent in 1989 and thereafter.

The provision applies to gifts made, and estates of individuals dying, after December 31, 1983.

Senate amendment

No provision.

Conference agreement

The conference agreement follows the House bill with a modification that the maximum tax rate is 55 percent through 1987. The rate will decline to 50 percent for estates of individuals dying, and gifts made, after December 31, 1987.

7. Windfall profit tax rate on newly discovered oil

Present law

Present law imposes an excise tax on the production of domestic crude oil. Differing tax rates and base prices apply to oil, generally depending upon its classification on one of three tiers.

Tier 1 oil (previously controlled oil) generally is taxed at a 70-percent rate; tier 2 oil (stripper oil and naval petroleum oil) generally is taxed at a 60-percent rate. A 50-percent rate applies to up to 1,000 barrels a day of tier 1 oil production by independent producers. In the case of tier 2 stripper oil, production by independent producers generally is exempt from tax.

Tier 3 oil is newly discovered oil, heavy oil, and incremental tertiary oil. Prior to 1982, all tier 3 oil was subject to tax at a 30-percent rate. Starting in 1982, the rate on newly discovered oil was reduced to 27-1/2 percent and to 25 percent in 1983. Under present law, the rate of windfall profit tax on newly discovered oil is 22.5 percent for 1984, 20 percent for 1985, and 15 percent for 1986 and later years.

House bill

Under the House bill, the rate of windfall profit tax on newly discovered oil would not be reduced to 22-1/2 percent in 1984. Instead, the tax rate would remain at 25 percent through 1987 and then be reduced to 22-1/2 percent for 1988, 20 percent for 1989, and 15 percent for 1990 and later years.

The provision applies with respect to domestic crude oil removed from the premises on which it was produced after December 31, 1983.

Senate amendment

No provision.

Conference agreement

The conference agreement follows the House bill with an amendment providing that the windfall profit tax rate applicable to newly discovered oil will be 22.5 percent for 1984 through 1987, 20 percent for 1988, and 15 percent for 1989 and subsequent years.

8. Percentage depletion for secondary and tertiary production after 1983

Present law

In the Tax Reduction Act of 1975, Congress retained the percentage depletion allowance for limited quantities of oil and gas production. For oil production, effective January 1, 1984, the rate has declined to a permanent level of 15 percent and is limited to 1,000 barrels per day.

The 1975 amendment continued this percentage depletion allowance for secondary and tertiary production at a 22-percent rate but (because of an error) only through 1983.

Under the 1975 amendments, if an interest in any proven oil or gas property is transferred to another owner after 1974, no percentage depletion allowance applies to the property after the transfer unless one of the exceptions provided for in section 613(c)(9), or (10) applies. The proposed Treasury regulations, published in 1977, stated that the transfer restrictions would not apply to percentage depletion for secondary and tertiary production. This exception to the transfer rule resulted from the same 1975 drafting error that caused termination of that percentage depletion after 1983.

House bill

The House bill corrects the technical errors that occurred in the Tax Reform Act of 1975 with respect to depletion on secondary and tertiary depletion. The bill eliminates the distinction between primary and secondary or tertiary production after 1983. Thus, independent producers may claim percentage depletion in 1984 at a rate of 15 percent on up to 1,000 barrels of all their production. In addition, starting in 1984, percentage depletion on secondary and tertiary production will not be available after 1983 for production from proven properties transferred since 1974 unless one of the exceptions provided for in section 613A(c)(9) applies to the transfer.

Senate amendment

The Senate amendment is the same as the House bill.

The conference agreement follows the House bill and the Senate amendment.

9. Modification of excise tax rates on cigarettes and distilled spirits

a. Cigarette excise tax

Present law

Present law imposes an excise tax on cigarettes manufactured in or imported into the United States. The rate of tax on small cigarettes is 16 cents per pack of 20 cigarettes. Higher rates apply to so-called "large" cigarettes, which are cigarettes weighing more than 3 pounds per thousand. Nearly all taxable cigarettes are small cigarettes. On October 1, 1985, the present tax rates are scheduled to decline by one-half.

House bill

The House bill provides an excise tax equal to 12 cents per pack of 20 cigarettes after September 30, 1985, and before January 1, 1988. A corresponding adjustment to the tax rate for large cigarettes is made.

Senate amendment

No provision.

Conference agreement

The conference agreement follows the Senate amendment.

b. Distilled spirits excise tax

Present law

Present law imposes an excise tax at a rate of $10.50 per proof gallon on distilled spirits produced in or imported into the United States. A proof gallon is a U.S. gallon of liquid one-half of the volume of which consists of ethyl alcohol of a specified gravity.

House bill

The House bill increases the excise tax on distilled spirits by $3.75, to $14.25 per proof gallon, after September 30, 1985, and before January 1, 1988.

Senate amendment

The Senate amendment increases the excise tax on distilled spirits by $2.00, to $12.50 per proof gallon, effective after December 31, 1984.

Conference agreement

The conference agreement follows the House bill and the Senate amendment with modifications. Under the agreement, the increase in the tax rate is $2.00 per proof gallon as under the Senate amendment, and the increase is effective on October 1, 1985, as under the House bill.

The conference agreement clarifies and expands the Treasury Department regulatory authority to prescribe the time for payment of the special imposed on certain floor stocks held for sale on October 1, 1985, and to exempt certain small businesses from that tax. Under the agreement, the floor stocks tax generally will be due on April 1, 1986. Additionally, certain special de minimis provisions are included for small and middle sized wholesale and retail dealers. The de minimis exception provides the following:

(1) All persons holding distilled spirits for sale on October 1, 1985, are required to conduct a wine gallon inventory.

(2) Dealers whose wine gallon volume inventory is less than 500 gallons are exempt from the floor stocks tax.

(3) Dealers with an inventory of 500 liquid gallons or more are required to conduct a proof gallon inventory and to pay floor stocks tax on that inventory, but these dealers will receive a credit against the tax equal to $800 (the approximate tax on 500 wine gallons).

(4) All dealers whose gross sales from all products in the preceding taxable year did not exceed $500,000 are allowed to pay the floor stocks tax in three installments, one-third on each of April 1, 1986, July 1, 1986, and October 1, 1986.

10. Modification of time and manner of paying excise taxes on cigarettes and alcohol products

Present law

Time of payment

Cigarette and alcohol excise taxes generally are paid with respect to semimonthly periods; the taxes are due the following number of days after the last day of the semimonthly period when the taxable product is removed from bonded premises:

Cigarettes	25 days
Domestically produced and bulk imported distilled spirits	30 days
Bottled imported distilled spirits	15 days
Wine and beer	15 days

Method of payment

Present law generally requires payment of the cigarette and alcohol product excise taxes to accompany a return for each semimonthly period. There is no requirement of payment by electronic funds transfer.

House bill

No provision.

Senate amendment

Time of payment

The Senate amendment requires payment of the excise taxes on cigarettes and all alcohol products 14 days after the close of each semimonthly period. If the 14th day is a Saturday, Sunday, or Federal holiday, payment is required on the last preceding business day. This provision is effective with respect to semimonthly periods ending on and after June 30, 1984.

Method of payment

The Senate amendment requires payment of the excise taxes on cigarettes and all alcohol products by means of electronic funds transfer to a Federal reserve bank in the case of taxpayers whose gross tax liability with respect to the product involved was $5 million or more during the preceding calendar year. This provision is effective with respect to payments due on and after June 30, 1984.

Conference agreement

The conference agreement follows the House bill as to the time of payment and the Senate amendment as to the method of payment. The Senate amendment is modified, however, to delay the effective date of the electronic funds transfer provision until September 30, 1984.

11. Extension of excise tax on communications services

Present law

A 3-percent excise tax is imposed on amounts paid for local telephone service, toll (long-distance) telephone service, and teletypewriter exchange service. The tax is scheduled to terminate on January 1, 1986.

House bill

The House bill extends the 3-percent tax on communications services for two years, or through December 31, 1987.

Senate amendment

The Senate amendment is the same as the House bill.

Conference agreement

The conference agreement follows the House bill and the Senate amendment.

B. Leasing Provisions

1. Tax-exempt entity leasing

a. General rule

Present law

The rules for determining who is entitled to the tax benefits associated with the ownership of property generally are not written in the Internal Revenue Code. Rather, they are embodied in a series of court cases and in revenue rulings and revenue procedures issued by the IRS. Essentially, these rules focus on the economic substance of a transaction, not its form, for determining who is entitled to the tax benefits of the ownership of property. Thus, in a purported lease or similar arrangement, the person claiming ownership for Federal income tax purposes must show that he has sufficient economic indicia of ownership. The applicable rules are discussed at length in the committee reports.

In general, the tax benefits of ownership of property include depreciation or accelerated cost recovery deductions and investment tax credits. Generally, ACRS or other depreciation deductions and investment credits are allowed only for property used for a business or income-producing purpose. The accelerated cost recovery system generally permits taxpayers to depreciate qualifying property on an accelerated basis over relatively short periods. For most property, the ACRS recovery period is shorter than the actual useful life of the property. Investment credits permit taxpayers to reduce their tax liability by a percentage of their investments in eligible property. Eligible property includes certain depreciable personal property. Special rules apply to certain energy property and to certain rehabilitations of older buildings or certified historic structures.

As a general rule, ACRS or other depreciation deductions and investment credits are not available for property owned by governmental units and tax-exempt organizations since they are not generally taxable. Moreover, no investment credit is allowed for property leased to or otherwise used (though not owned) by a tax-exempt organization in its exempt function or by a governmental unit (nontaxable use restriction). The nontaxable use restriction does not affect the allowance of ACRS deductions and certain other tax benefits. As a result, tax-exempt entities, by leasing property, may indirectly enjoy tax benefits that they could not have enjoyed had they owned the property instead.

Property used by a foreign government or person is not subject to the nontaxable use restriction. However, if the property is used predominantly outside the United States, in general, ACRS deductions are reduced and no investment credit is allowed. There are a number of exceptions to this rule (sec. 48(a)(2)(B) and sec. 168(f)(2)(D)).

House bill

Numerous changes are made in the tax treatment of property leased to or otherwise used by a tax-exempt entity, as defined in the bill. The bill provides rules for determining cases in which property is to be treated as used by a tax-exempt entity for certain purposes, including cases in which property subject to a so-called service contract or other arrangement with or on behalf of a tax-exempt entity is to be treated as leased to that entity. The bill also provides rules for determining the tax treatment of property which is not tax-exempt use property under the general rules of the bill but which is owned by a partnership or other pass-through entity which has a tax-exempt entity as a partner or other beneficiary.

The provision is generally effective with respect to property place in service by the taxpayer after May 23, 1983, and to property placed in service by the taxpayer before May 24, 1983, and used by a tax-exempt entity pursuant to a lease entered into or renewed after May 23, 1983. Numerous transition rules are provided.

Senate amendment

The Senate amendment generally follows the House bill with several exceptions. In addition, the Senate amendment provides that the rules for distinguishing service contracts and other arrangements from leases are applicable for all income tax purposes. The Senate amendment also provides rules for determining the tax treatment of property leased to thrift institutions.

The provision generally has the same effective date as the provision in the House bill. However, the Senate amendment provides different transition rules.

Conference agreement

The conference agreement is discussed below.

b. Definition of tax-exempt entity

Present law

For purposes of the nontaxable use restriction applicable with respect to the investment credit, tax-exempt entities generally include organizations (other than farmers' cooperatives) exempt from income taxes (other than with respect to property used predominantly in an unrelated trade or business the income from which is subject to tax under sec. 511). Tax-exempt entities also include the United States, any State or political subdivision thereof, most international organizations, and any agency or instrumentality of any of the foregoing.

House bill

For all purposes of the bill, the term "tax-exempt entity" includes, in addition, U.S. possessions. The term also includes foreign governments, international organizations, any agency or instrumentality of any of the foregoing, and any person who is not a U.S. person (collectively, "foreign persons or entities"), but only with respect to property 50 percent or less of the gross income from the use of which for the taxable year is subject to U.S. income tax. The term also includes organizations which were tax-exempt at any time during the 5-year period ending on the date such organization first used the property involved.

The House bill also provides that a fully taxable corporate instrumentality of the United States or any State or political subdivision thereof is not to be treated as a tax-exempt entity only if a majority of its board of directors is not selected by the United States or any State or political subdivision thereof.

Senate amendment

The Senate amendment follows the House bill with certain exceptions. First, no foreign person or entity is treated as a tax-exempt entity with respect to property more than 20 percent of the gross income from the use of which is subject to U.S. income tax. For this purpose, income currently included under Subpart F in the income of a U.S. shareholder of a controlled foreign corporation is to be treated as subject to U.S. income tax.

Second, certain organizations (e.g., rural electric cooperatives) formerly exempt from tax under section 501(c)(12) at any time during the 5-year period preceding their first use of the property involved are not treated as tax-exempt entities if they agree to be fully taxable for the period beginning with the taxable year the property involved is placed in service and ending with the close of the 15th taxable year following the last taxable year of the recovery period for the property involved.

And third, fully taxable corporate instrumentalities of the United States or any State or political subdivision thereof are not treated as tax-exempt entities.

Conference agreement

The conference agreement generally follows the Senate amendment. However, the conference agreement follows the House bill with respect to the (1) 50 percent threshold in the case of property used by a foreign person or entity, and (2) the treatment as tax-exempt entities of corporate instrumentalities of the United States or any State or political subdivision thereof. In addition, property leased to the Federal Home Loan Mortgage Corporation (which is made a taxable entity by the bill) is not to be treated as leased to a tax-exempt entity under the 5-year lookback rule.

Finally, under the conference agreement, certain former section 501(c)(12) organizations (e.g., rural electric cooperatives) are not subject to the 5-year lookback rule only if, in addition to complying with the Senate amendment, they comply with a transitional requirement added by the conference agreement. Under that requirement, the organization must elect to pay taxes on the exempt arbitrage profits it earns or has earned on that portion of the proceeds of any tax-exempt obligations associated with financing (e.g., acquisition or construction financing) by the organization of the property ultimately leased. The requirement is imposed because, in general, the conferees do not believe it appropriate that an organization should, as a tax-exempt entity, be able to earn arbitrage profits on tax-exempt obligations issued to finance property and then, after becoming a taxable entity, be entitled to benefit from tax provisions, through leasing property, available to the owner of the property. This is especially true in the case of cooperatives, which tend to have substantial tax planning flexibility.

This requirement applies with respect to all such exempt arbitrage profits, regardless of when earned, but only to the extent they are attributable to a period during which the organization was exempt from taxation. Under the conference agreement, those profits are taxed to the organization for the first taxable year in which it uses the property under the lease. They are treated as a separate basket of taxable income and taxed as such under section 11. No deductions are allowed against that separate basket of income. Neither are any credits allowed with respect to resulting tax liability.

"Exempt arbitrage profits" are the aggregate amount determined under the principles of sections 103(c)(6)(D)(i) and (ii) (relating to certain arbitrage profits), as amended by the bill, except that for this purpose, sections 103(c)(6)(F)(i)(II) (relating to certain earnings on a bona fide debt service fund) and 103(c)(6)(F)(ii) (relating to earnings on certain temporary investments) are disregarded. Furthermore, the principles of section 103(c)(6)(D)(i) are applicable for this purpose regardless of that section's general effective date. (Generally, that section applies to bonds issued after December 31, 1984.)

If new section 103(c)(6)(D)(i) in fact is applicable to the tax-exempt obligations there are, for purposes of this requirement, no exempt arbitrage profits. In general, if new section 103(c)(6)(D)(i) is applicable, certain arbitrage profits must be rebated to the United States. In such a case, taxation of "exempt arbitrage profits" is inappropriate.

c. Tax-exempt use property

Present law

For purposes of the investment credit (other than the rehabilitation credit), property used by a tax-exempt entity is treated as tax-exempt use property.

House bill

Personal property leased to or otherwise used by a tax-exempt entity is treated as tax-exempt use property. This rule applies for all credit purposes and for purposes of the depreciation provisions of the bill. Qualified films (as defined in sec. 48(k)(1)(B)) distributed to foreign persons or entities are not to be treated as used by such persons or entities.

Real property is treated as tax-exempt use property to the extent of disqualified uses, but only if the disqualified uses of the property exceed 20 percent of all uses of the property. A disqualified use is a lease to a tax-exempt entity if (1) the tax-exempt entity participates in financing the property through the issuance of tax-exempt obligations, (2) the use is pursuant to a lease containing a fixed or determinable purchase or sale option or the equivalent thereof, (3) the use is pursuant to a lease having a term exceeding 80 percent of the property's useful life, or (4) the use occurs after a sale by, lease from, or other transfer by the tax-exempt entity of property used by the tax-exempt entity prior to the transfer.

Senate amendment

The Senate amendment follows the House bill with four exceptions. First, real property is not treated as tax-exempt use property unless disqualified uses exceed 50 percent (35 percent in the case of disqualified use by a single tax-exempt entity). Second, the amendment treats real property used by a tax-exempt entity pursuant to a lease as a disqualified use if the lease term exceeds 20 years. Third, property leased by a tax-exempt entity within 3 months of the date it is placed in service by such tax-exempt entity (or a related party) is not treated as used in a disqualified use under the use after transfer rule. And fourth, sound recordings, as well as qualified films, distributed to foreign persons or entities are not treated as leased to them.

Conference agreement

The conference agreement generally follows the Senate amendment. However, under the conference agreement, real property is treated as tax-exempt use property to the extent of disqualified uses, but only if the disqualified uses of the property exceed 35 percent of all uses of the property. Furthermore, under the conference agreement, in the case of personal property, tax-exempt use property generally is only that portion of any tangible property leased to a tax-exempt entity. However, the 35-percent rule is not applicable with respect to personal property.

The conference agreement clarifies that, for purposes of the provision's depreciation rules, property owned by a tax-exempt entity is not to be treated as tax-exempt use property. Rather, only property leased to a tax-exempt entity is to be treated as used by that entity. For this purpose, the term "lease" includes any grant of a right to use property by one person to another. However, the conferees do not intend by this rule to preclude from treatment as tax-exempt use property any property not otherwise tax-exempt use property which is owned by a partnership or other pass-through entity which has a tax-exempt partner or other beneficiary. See the discussion of partnerships and other pass-through entities. Furthermore, property owned and used by a tax-exempt entity (or a related entity) for more than 3 months prior to a transfer of it by the tax-exempt entity (or a related entity) is to be treated as used by that entity before the transfer. (The general rule that only property "leased" to a tax-exempt entity is "used" by that entity for purposes of the bill's depreciation rules is not intended to change the rule of present law that a tax-exempt owner-lessor of property is not

able to pass on any credit to a lessee. See Treas. Reg. sec. 1.48-4(a)(1)(i).)

The conference agreement also clarifies that tax-exempt use property does not include any portion of a property if such portion is predominantly used by a tax-exempt entity directly, or for purposes of the bill's partnership rules, through a partnership of which the tax-exempt entity is a partner in an unrelated trade or business the income of which is subject to tax under section 511. For purposes of this rule, the conferees intend that property will not be treated as predominantly used by the tax-exempt entity in an unrelated trade or business the income of which is subject to tax under section 511 merely because the property is debt-financed property under section 514.

The conferees wish to clarify an example in the committee reports. Assume that a U.S. corporation leases equipment to a foreign corporation not subject to U.S. tax and the foreign corporation subleases the equipment to a branch of a U.S. corporation. The property is tax-exempt use property even though all income earned by the U.S. branch with respect to the use of the property is subject to U.S. tax. This result occurs without regard to the business reasons for the initial lease between the U.S. corporation and the foreign corporation. However, this result would not occur if, in view of the economic substance of the overall arrangement, the transaction is properly treated for U.S. tax purposes as a lease directly from the U.S. corporation to the U.S. branch, and not as a lease to and sublease from the foreign corporation.

d. Tax treatment of tax-exempt use personal property

Present law

No investment credit is allowed with respect to personal property leased to or otherwise used by a tax-exempt entity. Furthermore, in general, no investment tax credit is allowed with respect to personal property used predominantly outside the U.S. However, in general no restrictions are imposed with respect to the depreciation of personal property used by a tax-exempt entity, although restrictions are generally imposed on the depreciation of property used predominantly outside the U.S.

House bill

No investment credit is allowed with respect to personal property used by a tax-exempt entity. In addition, tax-exempt use personal property is to be depreciated on the straight-line method over the greater of (1) the property's ADR midpoint life (12 years if the property has no ADR midpoint life), or (2) the lease term. Under the House bill, investment credit may be recaptured with respect to property which becomes tax-exempt use sometime after having been placed in service. In addition, under the House bill, regulations are to be prescribed for the depreciation of property that either becomes or ceases being tax-exempt use property sometime after having been placed in service by the taxpayer.

Under the House bill, the Treasury is authorized to prescribe midpoint lives for personal property presently having no midpoint lives.

Senate amendment

The Senate amendment follows the House bill except that tax-exempt use personal property is to be depreciated on the straight-line method over the greater of (1) its ADR midpoint life (12 years in the absence of such a life), or (2) 125 percent of the lease term. In addition, no general authority is granted the Treasury to prescribe midpoint lives for property presently having none. Finally, the Senate amendment provides special rules for property used by foreign persons or entities. Under those rules: property placed in service before January 1, 1984, and used by a foreign person or entity under a lease entered into before January 1, 1984, is generally exempt from the provision; property placed in service in 1984, and used by a foreign person or entity under a lease entered into in 1984, is entitled to 50 percent of any investment credit otherwise allowable and may be depreciated under the 175-percent declining balance method over the longer of (1) its ADR midpoint life (12 years in the absence of such a life), or (2) 125 percent of the lease term; and other property used by a foreign person or entity is entitled to no investment credit but may be depreciated under the 150-percent declining balance method over its ADR midpoint life (12 years in the absence of such a life).

Conference agreement

The conference agreement generally follows the House bill except that tax-exempt use personal property cannot be depreciated over a period shorter than 125 percent of the lease term. Furthermore, under the conference agreement, the bill generally does not apply to property placed in service before January 1, 1984, and used by a foreign person or entity under a lease entered into before January 1, 1984, merely because of that lease.

The conferees wish to make it clear that if personal property is used by a tax-exempt entity (and the use is not pursuant to a short-term lease, as defined by the bill), investment credits are not available. This result follows even if the investment credit would be available under present law by virtue of section 48(a)(2)(B) (relating to exceptions from the denial of investment credit for certain property used predominantly outside the U.S.). For example, an aircraft leased to a foreign person or entity does not give rise to any investment credit even if it is operated to and from the U.S., if not more than 50 percent of the income derived by the foreign person or entity from the use of the aircraft is taxable in the U.S. Similarly, the bill's rules with respect to tax-exempt use property override section 168(f)(2) (relating to recovery deductions with respect to property used predominantly outside the U.S.). However, for a special rule for certain leases of aircraft to foreign persons or entities, see below under the discussion of the short-term lease exception.

e. Tax treatment of tax-exempt use real property

Present law

There are no restrictions on the depreciation of real property merely because it may be used by a tax-exempt entity. In addition, no rehabilitation credits are lost merely because such property may be used by a tax-exempt entity.

House bill

To the extent real property is tax-exempt use property, it must be depreciated on the straight-line method over the greater of (1) 40 years, or (2) 125 percent of the lease term. In addition, the rehabilitation credit is denied for tax-exempt use real property, but only to the extent the property is financed with tax-exempt obligations.

Senate amendment

The Senate amendment follows the House bill except that the rehabilitation credit is denied for all tax-exempt use property. For purposes of the rehabilitation credit, property which is reasonably expected to become tax-exempt use property is treated as tax-exempt use property. In addition, the Senate amendment's special rules for personal property used by foreign persons or entities apply to real property used by foreign persons or entities as well, treating the property's ADR midpoint life as 40 years.

Conference agreement

The conference agreement generally follows the House bill, with two exceptions. First, the rehabilitation credit is denied for all tax-exempt use real property (but only such property) subject to the bill's general depreciation provisions. For this purpose, property which is reasonably expected to become tax-exempt use property is treated as tax-exempt use property, as under the Senate amendment. And second, the bill does not apply to real property placed in service before January 1, 1984, and used by a foreign person or entity under a lease entered into before January 1, 1984.

f. Depreciation of certain short-lived property

Present law

No special provision.

House bill

The House bill's depreciation provisions do not apply to certain high-technology property (i.e., computers and peripherals, high-technology telephone station equipment, and high-technology medical equipment) (1) leased to a tax-exempt entity for 5 years or less (if the lease term exceeds 5 years, the property must be depreciated under the straight-line method over 5 years), or (2) used predominantly outside the United States. These rules are not applicable if the property was previously used by the tax-exempt entity (or a related entity), was financed with tax-exempt obligations, or is used by the United States or any agency or instrumentality thereof.

The Treasury is directed to determine whether the present ADR midpoint lives for such property are appropriate and to report its conclusions to Congress by July 1, 1984.

Senate amendment

The Senate amendment's depreciation provisions do not apply to property having an ADR midpoint life of 6 years or less so long as the lease term does not exceed 75 percent of the property's ADR midpoint life (5 years in the case of property having an ADR midpoint life of 6 years). While high-technology medical equipment is treated as having an ADR midpoint life of 6 years for purposes of this provision, the Treasury, prospectively only, may prescribe by regulations that it has a midpoint life of more than 6 years.

Conference agreement

The conference agreement generally follows the House bill except that the provision requiring the Treasury to report regarding ADR midpoint lives is eliminated. Furthermore, under the conference agreement, only property owned and used by a tax-exempt entity (or a related entity) for more than 3 months prior to a transfer of it by the tax-exempt entity (or a related entity) is to be treated as having been used by the tax-exempt entity before the transfer. Finally, in the case of property used predominantly outside the U.S. under a lease with a term of more than 5 years, the bill's general depreciation rules apply. That is, such property is depreciable on a straight-line basis over the longer of its ADR midpoint life or 125 percent of the lease term.

In addition, the conference agreement authorizes the Treasury to provide, by prospective regulations only, that any high-technology telephone station equipment or medical equipment (both as generally defined in the bill) is to be depreciated under the bill's general depreciation rules rather than the special rules for short-lived property. The conferees intend that the Treasury

so provide only if it determines that such property cannot reasonably be expected to become technologically obsolete substantially before the expiration of its physical useful life.

g. Short-term lease exception

Present law

Property leased to a tax-exempt entity pursuant to a casual or short-term lease (determined under all the facts and circumstances) is not subject to investment credit denial.

House bill

The House bill makes no change in the regular investment credit rule of present law. However, it provides that no rehabilitation credit is to be denied for property leased to a tax-exempt entity under a lease with a term of less than 1 year.

In addition, the bill's depreciation provision does not apply to personal property when the lease term is less than (1) 1 year, or (2) 30 percent of the property's ADR midpoint life. However, in no case will this exception apply if the lease has a term exceeding three years. For real property, the bill's depreciation provision does not apply if the lease term is less than 3 years.

Senate amendment

The regular investment credit provision of the Senate amendment generally does not apply if the lease term is less than 6 months. However, in the case of certain offshore oil and gas drilling equipment leased for a term not in excess of 2.25 years (1.8 years in the case of certain containers and related equipment), the regular investment credit provision of the amendment does not apply. No rehabilitation credit is to be denied for property used pursuant to a lease having a term not exceeding 3 years.

The depreciation provision does not apply to personal property leased pursuant to a lease having a term not exceeding one year or, if longer, 30 percent of the property's midpoint life. However, in no case will this exception apply if the lease has a term exceeding 3 years. For real property, the depreciation provision does not apply if the use is pursuant to a lease having a term not in excess of 3 years.

Conference agreement

The conference agreement generally follows the House bill except that for purposes of the rehabilitation credit, a lease is a short-term lease only if its term is less than 3 years. Furthermore, the conference agreement generally follows the Senate amendment with respect to investment credits (other than the rehabilitation credit). In addition, the conference agreement adopts the special investment credit rules in the Senate amendment regarding certain offshore oil and gas drilling equipment and containers and related equipment.

The conference agreement provides a special investment credit rule for certain aircraft leased to a foreign person or entity before January 1, 1990. Under section 47(a)(7), use under certain leases predominantly outside the U.S. of certain aircraft will not trigger investment credit recapture until the aircraft has been so used for more than 3-½ years. Absent a special rule, under the bill, leases of such aircraft to a foreign person or entity for 6 months or more would generally trigger investment credit recapture. Under the conference agreement, leases described in section 47(a)(7) to a foreign person or entity of aircraft described in section 47(a)(7) will not trigger investment credit recapture if those leases do not exceed three years. However, if such aircraft is thereafter disposed of or otherwise ceases to be section 38 property, investment credit recapture will be determined by disregarding the term of the lease to the foreign person or entity.

h. Lease term

Present law

No special Code provision.

House bill

For purposes of the House bill, the term of a lease includes all options to renew as well as certain successive leases.

Senate amendment

The Senate amendment generally follows the House bill. However, in the case of real property, the lease term does not include renewal options at fair rental values.

Conference agreement

The conference agreement generally follows the Senate amendment. However, the committee report indicates that the length of a lease term is also to be determined under all the facts and circumstances. See, e.g., *Hokanson v. Commissioner*, 84-1 USTC Par. 9217 (9th Cir. 1984). The conferees intend that the *Hokanson* rule and similar rules take precedence over the rule regarding fair rental renewal options with respect to real property so that, under all the facts and circumstances, the term of a fair rental value renewal option may be treated as a part of the original lease term.

The conference agreement also clarifies that successive leases which are part of the same transaction (or a series of related transactions) with respect to the same or substantially similar property are to be treated as one lease.

i. Thrift institutions

Present law

Property owned by a thrift institution is limited to one-half of any investment tax credit (including any rehabilitation credit) otherwise available because special bad debt deductions available to such an institution effectively reduce the rate of tax applicable to its income. There is no special provision regarding credits with respect to property leased to a thrift institution.

House bill

No provision.

Senate amendment

The lessor of property to a thrift institution is entitled to no greater a credit with respect to such property than the thrift institution would have been entitled to had it owned the property.

Conference agreement

The conference agreement generally follows the Senate amendment. (For this purpose, property used by a thrift institution under a short-term lease (as defined in the bill) is not subject to the rule.) However, the conference agreement permits a thrift institution to avoid this rule by electing to waive its rights to claim deductions for additions to bad debt reserves under any method other than the experience method. Any such election would be irrevocable and would apply for all taxable years of the electing thrift institution (and any successor engaged in substantially similar activities) beginning with the taxable year for which made.

j. Service contracts

Present law

No special Code provision. However, case law (*Xerox Corp. v. U.S.*, 656 F. 2d 659 (Ct. Cl. 1981)), revenue rulings, and private letter rulings (which are not to be cited as precedent) provide guidance in distinguishing leases and other arrangements from service contracts. In general, property subject to a service contract with a tax-exempt entity is not treated as used by that entity in determining eligibility for the investment credit.

House bill

For all purposes of the provision, property subject to a so-called service contract or other arrangement with a tax-exempt entity is treated as leased to that entity if the arrangement more nearly resembles a lease of the property. In determining whether a so-called service contract or other arrangement with a tax-exempt entity more nearly resembles a lease of the property involved, all relevant factors are to be taken into account, including whether (1) the service recipient is in physical possession of the property, (2) the service recipient controls the property, (3) the service recipient has a significant economic or possessory interest in the property, (4) the service provider bears any significant economic risk if there is nonperformance, (5) there is concurrent use of the property by the service provider to provide significant service to others, and (6) the contract price under the service contract or other arrangement substantially exceeds the rental value of the property.

Special rules are provided with respect to certain waste-to-energy property.

Senate amendment

The Senate amendment generally follows the House bill. However, the Senate amendment provides a different set of special rules applicable to contracts for the provision of solid waste, energy, energy conservation or energy management, and clean water facilities. In general, such contracts are not to be treated as leases unless the service recipient (1) bears significant financial burdens if there is nonperformance, (2) operates the facility, (3) receives significant financial benefits if operating costs are less than projected, or (4) has a fixed or determinable purchase price option (other than at fair market value) or may be required to purchase the facilities.

The factors used to distinguish service contracts and other arrangements from leases are applicable for all income tax purposes.

Conference agreement

The conference agreement generally follows the Senate amendment. However, the conference agreement makes it clear that a contract which purports to be a service contract is to be treated as a lease (rather than a conditional sale or similar arrangement) only if such contract is more properly to be treated as a lease under all the facts and circumstances, including those enumerated in the bill. The Senate committee report contains an example regarding applicability of the general service contract rules (i.e., those not applicable with respect to certain facilities) in the case of certain school buses (Example (6)). The conferees agree with that example. Under the conference agreement, the special rules under the Senate amendment relating to certain facilities are not applicable to any contract or arrangement for the provision of energy conservation or energy management services. However in the case of a binding contract with respect to any such services entered into before May 1, 1984, present law (rather than the bill's general services contract rules) applies.

Under the conference agreement, low-income residential property operated by or for an organization described in section 501(c)(3) or section 501(c)(4) is not subject to the service contract or other arrangement rules of the bill. Thus, for example, the leasing of units in such property to occupants is not treated as use by or on behalf of such an organization. For purposes of

this rule, low-income residential property means property described in section 1250(a)(1)(B)(i), (ii), (iii), or (iv), but only if 80 percent or more of the units are leased to low-income tenants, determined in a manner consistent with section 167(k)(3)(B).

k. Partnerships and other pass-through entities

Present law

No special Code provision.

House bill

Property which is not used by a tax-exempt entity may be owned by a partnership or other pass-through entity having both taxable and tax-exempt entities as partners or other beneficiaries. Unless all allocations to each tax-exempt entity partner or other beneficiary are qualified allocations, such partner's proportionate share of the pass-through entity's property is treated as tax-exempt use property for all purposes of the provision.

For purposes of this rule, a qualified allocation means any allocation to a tax-exempt entity which is consistent with such entity's being allocated the same percentage share of each item of income, gain, loss, deduction, credit, and basis of the partnership during the period such entity is a partner or beneficiary. Furthermore, no allocation is qualified unless it meets the substantial economic effect test of section 704(b). However, items allocated under section 704(c) (relating to contributed property) are not taken into account.

A tax-exempt entity partner's or other beneficiary's proportionate share of property of a pass-through entity equals such partner's or other beneficiary's share of the pass-through entity's distributions or items of income or gain (excluding gain allocated under section 704(c)), whichever produces the highest result. If the tax-exempt entity partner's or other beneficiary's share of distribution or items of income or gain (excluding gain allocated under section 704(c)) varies during the period it is a partner or other beneficiary, its share of any such item shall be the highest share it may receive.

Senate amendment

The Senate amendment generally follows the House bill.

Conference agreement

The conference agreement generally follows the House bill and the Senate amendment but makes certain clarifications and additions. For example, the conference agreement amends the rule regarding the determination of a tax-exempt entity partner's proportionate share of partnership property to exclude references to such entity's share of partnership distributions.

The conferees wish to clarify that this rule applies notwithstanding any other provision of the bill. For example, assume that a partnership owns a building which is leased to a taxable entity. The partnership has one tax-exempt entity as a partner, and its proportionate share is 10 percent. Unless the partnership's allocations to the tax-exempt entity are qualified, 10 percent of the building is tax-exempt use property, notwithstanding the 35-percent threshold otherwise applicable in the case of real property. However, this rule does not apply to the extent the property is predominantly used by the tax-exempt entity, through the partnership, in an unrelated trade or business the income of which is subject to tax under section 511 (determined without regard to the debt-financed income rules of section 514).

The conferees also wish to clarify the consequences of property being treated as tax-exempt use property under this rule. If a portion of a partnership's depreciable property is tax-exempt use property, allowable depreciation deductions with respect to that property will be reduced. The partnership's total depreciation deductions will be allocated under the partnership agreement among one or more of the partners in accordance with the provisions of section 704(b).

In addition, the conferees wish to clarify that property may be tax-exempt use property under both the general provisions of the bill and the special partnership provision. For example, a tax-exempt entity may be a partner in a partnership owning a building 60 percent of which is leased to a tax-exempt entity under a long-term lease. Sixty percent of the building is tax-exempt use property under the general provisions. The status of the other 40 percent would depend on whether the allocations with respect to it are qualified.

The conferees also wish to clarify that the reference to allocations of basis in determining whether an allocation is a qualified allocation pertains to allocations of basis of oil and gas properties under section 613A(c)(7)(D) and "section 38 property" under the investment credit rules.

The conference agreement authorizes the Treasury to prescribe regulations dealing with the effect of guaranteed payments (as defined in sec. 707(c)) under this rule. Under those regulations, priority cash distributions to partners that constitute guaranteed payments should not disqualify an otherwise qualified allocation so long as the priority cash distributions are reasonable in amount (e.g., equal to the most appropriate Federal rate) and are made to all partners in proportion to their capital in the partnership. On the other hand, the conferees expect that the regulations will prevent partnerships from avoiding the qualified allocation rules by making disproportionately large guaranteed payments to its tax-exempt partners for the use of their capital.

The conference agreement also authorizes the Treasury to prescribe regulations pursuant to which, in appropriate cases, particular items may be excluded or segregated in determining whether there is a qualified allocation. One example that has come to the conferees' attention involves a U.S. corporation and a foreign country are equal partners in a partnership created under the laws of that foreign country. Under those laws, the U.S. corporation's share of the partnership's profits are taxed, but not the foreign government's share. However, the tax is imposed on and paid by the partnership rather than the U.S. corporation partner directly. Under the partnership agreement, all partnership items are allocated equally between the two partners except that the tax expense is allocated to the U.S. corporation, and cash distributions to the partners reflect that allocation. Assuming those allocations possess substantial economic effect, the conferees do not intend that the partnership agreement be treated as containing an unqualified allocation.

Another situation those regulations might address involves a partnership which, in substance, consists of several partnerships formed to explore for, develop, and produce oil and gas. Typically, a partner in such a partnership may select to what extent he wishes to participate in a particular well, and his interest in the income, gain, loss, deduction, credit, and basis may differ from well-to-well. For example, a partner, consistent with the partnership agreement, may contribute 75 percent of the cost of one well and 50 percent of the cost of a second well and be allocated 75 percent of all tax items from the first well and 50 percent of all tax items from the second. If instead of using one partnership to invest in several wells, a separate partnership were used for each well, the allocation formula used for each well could be different from the others and yet each could satisfy the qualified allocation rules. The conferees anticipate that the regulations will grant relief in this and similar non-abusive situations.

Similarly, the conferees expect that the regulations will provide that an allocation will not disqualify an otherwise qualified allocation on the basis that it does not have substantial economic effect in cases where such allocation is not governed by the substantial economic effect rules (e.g., an allocation of basis of an oil and gas property) or cannot, by its nature, satisfy those rules (e.g., an allocation of credits, deductions attributable to nonrecourse debt, and percentage depletion in excess of basis), provided such allocation complies with the relevant section of the Code or the regulations (e.g., section 613A(c)(7)(D) and proposed regulations section 1.704-1(b)(4)).

Furthermore, the regulations might provide a procedure for taxpayers to seek rulings that an allocation will be treated as qualified in cases not specifically addressed by the regulations.

The conference agreement also provides other special rules for partnerships and other pass-through entities. First, property leased to a foreign partnership or other foreign pass-through entity is not, solely by reason of that lease, to be treated as tax-exempt use property. Second, property leased to any partnership or other pass-through entity, domestic or foreign, having as a partner or other beneficiary a tax-exempt entity is to be treated as leased to each such partner or other beneficiary in an amount equal to its proportionate share of such property (as determined under the conference agreement). Unless the taxpayer establishes otherwise, it is to be presumed for purposes of this rule that all partners of a foreign partnership (and all beneficiaries of any other foreign pass-through entity) are foreign persons or entities.

Finally, rules similar to the foregoing are to apply in the case of tiered partnerships and other tiered pass-through entities.

l. International Maritime Organization and International Satellite Communications Organization

Present law

Intelsat and Inmarsat, which, as foreign partnerships, are international organizations, are not treated as international organizations for purposes of the investment credit nontaxable use restriction under section 48(a)(5).

House bill

The House bill contains special rules applicable to Intelsat and Inmarsat.

Senate amendment

The Senate amendment is the same as the House bill.

Conference agreement

The conference agreement eliminates the special rules for Intelsat and Inmarsat. They are unnecessary in view of the general rules regarding partnerships and other pass-through entities described above, which apply to Intelsat and Inmarsat as well as other partnerships or pass-through entities.

The conferees request the Treasury to conduct a study of the satellite industry and to report the findings to Congress by no later than April 1, 1985. The conferees request that the study focus on the following issues. First, whether and to what extent domestic satellite companies are now able to, and in the future may be expected to be able to, compete successfully with foreign satellite operations for both domestic and foreign business. Second, whether domestic

satellite companies are now able to, and in the future may be expected to be able to, compete with each other on fair and equitable terms. Third, what role do tax benefits play in permitting satellite companies to compete with each other on fair and equitable terms. And fourth, whether Federal tax laws should be changed, and, if so, in what respect, to assure fair and open competition among all satellite companies.

m. Related parties

Present law

No special Code provision.

House bill

The House bill contains numerous rules relating to the treatment of tax-exempt entities and related parties as one entity for various purposes. The bill also defines related parties.

Senate amendment

The Senate amendment generally is the same as the House bill.

Conference agreement

The conference agreement follows the House bill and the Senate amendment.

n. General effective date

House bill

The bill is generally effective with respect to property placed in service by the taxpayer after May 23, 1983, and to property placed in service by the taxpayer before that date which is leased to a tax-exempt entity pursuant to a lease entered into after that date.

Senate amendment

The Senate amendment follows the House bill except that for property used by the U.S. Postal Service, May 23, 1983, is changed to October 31, 1983.

Conference agreement

The conference agreement follows the Senate amendment. In addition, the conference agreement provides that certain improvements to property are not to be treated as separate property for purposes of the general effective date rules or the transitional rules. Under this provision, if the bill does not apply to the property improved, it will not apply to the improvements either. Improvements covered are those which would not be substantial improvements under section 168(f)(1)(C)(ii) if 20 percent were substituted for 25 percent.

o. Transition rules

(1) Leases, subleases, and renewals

House bill

The provision does not apply if the tax-exempt use is pursuant to (a) a lease entered on or before May 23, 1983 (or a sublease under such a lease), or (b) any renewal or extension of a lease entered into on or before May 23, 1983, pursuant to an option in such a lease exercisable by the tax-exempt entity.

Senate amendment

The Senate amendment is the same as the House bill except that for property used by the U.S. Postal Service, May 23, 1983, is changed to October 31, 1983.

Conference agreement

The conference agreement follows the Senate amendment.

(2) Binding contracts

House bill

The provision does not apply to property leased to a tax-exempt entity if such lease is pursuant to certain binding contracts which, on May 23, 1983, required acquisition, construction, reconstruction, or rehabilitation of the property involved and its use by the tax-exempt entity.

Senate amendment

The Senate amendment follows the House bill.

Conference agreement

The conference agreement follows the House bill and the Senate amendment. The conferees wish to clarify that, for purposes of this rule, a written contract award made by the United States or an agency or instrumentality thereof on or before May 23, 1983, is to be treated as a binding contract.

(3) Binding contracts and firm plans, etc.

House bill

The provision does not apply to certain property acquired or constructed (or subject to a binding contract to acquire or construct) if (a) a contract entered into before January 1, 1984, requires the tax-exempt entity to use the property, or (b) on May 23, 1983, there was a firm written plan for the tax-exempt entity to enter into a contract for its use.

Senate amendment

No provision.

Conference agreement

The conference agreement generally follows the House bill with modifications.

Under the conference agreement, for property used by a tax-exempt entity (other than a foreign person or entity), the provision does not apply to property that (1) the taxpayer (or a predecessor in interest in or under the contract) or the tax-exempt entity was required to acquire, construct, reconstruct, or rehabilitate pursuant to a contract that was binding on May 23, 1983 (or has commenced, but not completed, construction, reconstruction, or rehabilitation by that date), (2) the taxpayer or the tax-exempt entity acquired after June 30, 1982, and before May 24, 1983, or (3) the taxpayer or the tax-exempt entity completed construction, reconstruction, or rehabilitation of which after December 31, 1982, and before May 24, 1983, but only if, in any such case, such tax-exempt entity enters into a binding contract to use the property before January 1, 1985. Requirement (1), above, is not satisfied if the tax-exempt entity used the property before May 24, 1983.

(4) Governmental action, etc.

House bill

The provision does not apply in certain cases where there was certain governmental action with respect to the project involved on or before May 23, 1984, specified sums were spent on the project involved on or before that date, and a contract requiring the tax-exempt entity to use the property was entered into before January 1, 1984.

Senate amendment

No provision.

Conference agreement

The conference agreement follows the House bill with modifications.

The provision does not apply in certain cases where there was governmental action with respect to the property involved on or before November 1, 1983, and a contract requiring the tax-exempt entity to use the property is entered into before January 1, 1985.

In determining whether sufficient governmental action occurred on or before November 1, 1983, the conferees intend that this provision be interpreted in a manner consistent with the similar provision in the House bill. However, in addition to the actions that are described in the report of the Committee on Ways and Means, the following actions constitute significant governmental action: the enactment of a State law authorizing the sale, lease, or construction of the property; the appropriation of funds for the property or authorization of a feasibility study or a development services contract with respect to it; the approval of financing arrangements by a regulatory agency; the enactment of a State law designed to provide funding for a project; or the endorsement of the application for a certification of need with respect to a medical facility by a regulatory agency other than the agency empowered to issue such a certificate.

(5) Certain property

House bill

The provision does not apply to certain mass commuting vehicles, certain boilers and turbines of rural electric cooperatives, and certain sewage or solid waste facilities with respect to which a ruling request was filed on or before May 23, 1983.

Senate amendment

The Senate amendment is the same as the House bill.

Conference agreement

The conference agreement follows the House bill and the Senate amendment.

(6) Specified projects

House bill

No provision.

Senate amendment

The Senate amendment specifies certain projects with respect to which the provision is not to apply.

Conference agreement

The conference agreement generally follows the House bill with modifications.

Under the conference agreement, transitional rules are provided for specific projects involving (1) substantial rehabilitations or new construction of buildings where a qualifying action occurred before November 1, 1983, and (2) the rehabilitations of certain educational facilities with respect to which there was substantial reliance on present law.

Under the conference agreement, the provision does not apply to property described in section 168(c)(1)(D) (relating to 15-year real property) if:

(a) the property is leased to a university and houses a basketball arena and university offices, and, on June 16, 1983, the Board of Administrators of the university adopted a resolution approving the rehabilitation of the property in connection with an overall campus development program,

(b) the property is leased to a charitable organization, the organization acquired the property on August 21, 1981, and, on June 12, 1982, an arson fire caused substantial damage to the property, delaying the planned rehabilitation,

(c) the property is leased to a corporation described in section 501(c)(3) (relating to certain organizations exempt from tax), pursuant to a contract that was entered into on August 2, 1983, and under which the corporation first occupied the property on December 22, 1983,

(d) the property is leased to an educational institution and used as an arts and humanities center, an architect was engaged to design a planned renovation in November of 1982, a demolition contract was entered into in December of 1983, and a renovation contract was entered into in March of 1984,

(e) the property was acquired by a college in October of 1981 for use as a dormitory, renovation plans were delayed because of a zoning dispute, and, in May of 1982, the court of highest jurisdiction in the State in which the college is located resolved the zoning dispute in favor of the college,

(7) Express appropriations

House bill

No provision.

Senate amendment

The provision is not to apply to certain property leased to or used by the United States if, among other things, an express appropriation for rentals was made for the 1983 fiscal year before May 23, 1983.

Conference agreement

The conference agreement follows the Senate amendment.

(8) Containers

House bill

No provision.

Senate amendment

Containers and certain related equipment placed in service before 1984, and used by foreign persons or entities before 1984, are exempted from investment credit recapture by reason of use by foreign persons or entities until 1985.

Certain partnerships organized before October 21, 1983, are exempted, with respect to certain property, from the rules regarding the treatment of property owned or to be acquired by partnerships having taxable and tax-exempt entities as partners.

Senate amendment

The Senate amendment exempts, with respect to certain property, additional partnerships.

Conference agreement

The conference agreement generally follows the Senate amendment but expands the transitional rules applicable with respect to property owned by a partnership. Thus, for example, the provisions do not apply to property placed in service by a partnership before October 21, 1983.

(10) Service contracts for all income tax purposes; thrift institutions; rehabilitation credits

Senate amendment

The provision's service contract rules, insofar as they relate to persons other than tax-exempt entities, are generally not effective for arrangements entered into before November 5, 1983.

Conference agreement

The conference agreement generally follows the Senate amendment. In addition, the rule regarding thrift institutions is made generally effective with respect to leases entered into after November 5, 1983. A special transitional rule is also provided with respect to the rehabilitation credit.

(11) Certain sewage facilities

House bill

A special transition rule applies to certain sewage facilities.

Senate amendment

No provision.

The conference agreement includes the House bill provision.

(12) Property used by foreign persons or entities

House bill

No special provision.

Senate amendment

No special provision.

Conference agreement

For property used by foreign persons or entities (other than certain aircraft for which a special rule is provided), the provision does not apply to property that (1) the taxpayer or the tax-exempt entity was required to acquire, construct, reconstruct, or rehabilitate pursuant to a contract that was binding on May 23, 1983 (or has commenced but not completed the activity by that date), (2) the taxpayer or the tax-exempt entity acquired after December 31, 1982, and before May 23, 1983, or (3) construction, reconstruction, or rehabilitation of which was completed after December 31, 1982, and before May 24, 1983, but only if in any such case, such foreign person or entity entered into a binding contract to use the property before January 1, 1984. Requirement (1), above, is not satisfied if the foreign person or entity used the property before May 24, 1983.

Under a special rule for wide-body, four-engine, commercial passenger aircraft, the provisions do not apply to aircraft with respect to which the foreign person or entity entered into a written binding contract to acquire the aircraft on or before November 1, 1983, and which is placed in service prior to January 1, 1986.

2. Treatment of certain motor vehicle operating agreements as leases

Present law

Nominal lease agreements covering motor vehicles often contain terminal rental adjustment clauses. A terminal rental adjustment clause generally permits or requires an upward or downward adjustment in rent to make up for any difference between the value of the vehicle at the end of the lease term as projected when the lease was entered into and its actual value at the end of the lease term.

The Internal Revenue Service has taken the position, and one court has agreed, that the presence of a terminal rental adjustment clause in a nominal motor vehicle lease causes the transaction to be treated as a conditional sale, rather than a lease, for tax purposes. If the transaction is a conditional sale, the nominal lessor is entitled to no depreciation deductions or investment tax credits with respect to the vehicle. Nor is the nominal lessee entitled to any rent deductions.

TEFRA prohibits the IRS from denying, with respect to nominal leases entered into before the issuance of regulations, lease treatment for certain nominal motor vehicle leases merely by reason of the fact that those nominal leases contain terminal rental adjustment clauses. In November, 1982, proposed regulations were issued to the effect that nominal leases of motor vehicles would be treated as conditional sales rather than leases if they contained terminal rental adjustment clauses.

House bill

No provision.

Senate amendment

The presence of a terminal rental adjustment clause in a nominal motor vehicle lease shall not be taken into account in determining whether the transaction is to be characterized as a lease for tax purposes. The provision applies whether the lessee uses the motor vehicle for business or personal purposes. However, the provision does not apply if the nominal lessor finances its ownership of the vehicle with nonrecourse debt.

The provision is effective for agreements entered into before, on, or after the date of enactment.

Conference agreement

Under the conference agreement, a qualified motor vehicle operating agreement containing a terminal rental adjustment clause is treated as a lease if, but for that clause, it would be treated as a lease. The provision applies only to qualified agreements with respect to a motor vehicle (including a trailer). No lessee under a qualified agreement is, under the agreement, to be treated as the tax owner of any property for any period during which such agreement is in effect.

To be a qualified agreement, the nominal lessor must be personally liable for the repayment of all amounts borrowed to finance the acquisition of the motor vehicle involved or must pledge property, other than property subject to the agreement or property directly or indirectly financed by indebtedness secured by property subject to the agreement, as security for all amounts borrowed to finance the acquisition of the motor vehicle involved. In addition, the nominal lessee must certify, in a separate written statement separately signed, under the penalties of perjury, that it intends that

more than 50 percent of the use of the property involved will be in a trade or business of the nominal lessee. That signed certification must also state, clearly and legibly, that the nominal lessee has been advised that it will not be treated as owner of the property for Federal income tax purposes. Furthermore, the nominal lessor must not know that the nominal lessee's certification is inaccurate in any material respect.

The nominal lessor is treated as the tax owner of the property involved under a qualified agreement so long as the agreement, but for the terminal rental adjustment clause, is properly characterized as a lease for tax purposes, regardless of the actual use of the motor vehicle by the nominal lessee. The nominal lessee is not to be treated as the tax owner of the property involved under a qualified agreement even if under the agreement, but for the terminal rental adjustment clause, the nominal lessee would be treated as the tax owner. As a result, the nominal lessee is not entitled to depreciation or interest deductions under the agreement which might be available to it if it were treated as the tax owner of the property. Any rent deductions for the nominal lessee are determined under general Code provisions, including provisions added by the bill.

A special rule is provided for lessee-dealers.

The provision is effective for leases entered into after 90 days after the date of enactment. The TEFRA provision is made inapplicable to agreements entered into 90 days after the date of enactment. The Treasury is not to issue regulations under the TEFRA provision with respect to leases entered into before 90 days after the date of enactment.

No inference is intended that a motor vehicle operating agreement containing a terminal rental adjustment clause is, merely by reason of the presence of that clause, to be treated as a lease for tax purposes. Nor is any inference intended that any nominal lease agreement, involving property other than a motor vehicle, which contains a provision similar to a terminal rental adjustment clause is to be treated as a lease for tax purposes.

C. Treatment of Bonds and Other Debt Instruments

1. Definitions and technical amendments

Present law

Under present law, the retirement of a debt obligation that is issued by a corporation or governmental unit and is a capital asset is treated as a sale or exchange.

Present law also provides rules requiring the annual inclusion and deduction of original issue discount (OID). OID is defined as the difference between the issue price of an obligation and its stated redemption price at maturity. OID is allocated over the term of an obligation through a series of adjustments to the issue price for each "bond period" (defined below). The adjustment to the issue price for each bond period is determined by multiplying the adjusted issue price (*i.e.*, the issue price as increased by adjustments prior to the beginning of the bond period) by the obligation's yield to maturity, and then subtracting the interest payable during the bond period.

Exception for short-term government obligations

An exception to the rule requiring annual inclusion is provided for acquisition discount with respect to government obligations with a maturity of one year or less. Acquisition discount is defined as the excess of the stated redemption price at maturity over the taxpayer's basis for the obligation. Treasury regulations provide a similar exception for OID with respect to obligations other than government obligations.

Definition of "bond period"

Except as otherwise provided by regulations, the accrual period for determining the amount of OID that is allocable to a period is an annual period ending on each anniversary of the date on which the bond was issued. Thus, the yield to maturity of a bond is determined on the basis of annual compounding.

Acquisition premium

When a taxpayer purchases a bond for a price that exceeds the adjusted issue price, the excess (or premium) is allowed as an offset to the remaining OID on a straight-line basis over the remaining term of the bond. Under this rule, the amount of premium allowable as an offset may exceed the OID accrued in some years.

Definition of "purchase"

The term "purchase" is defined to exclude the purchase of a bond the basis of which is determined by reference to the basis of the bond in the hands of the transferor or under section 1014(a) (relating to property acquired from a decedent).

Definition of "issue price"

The issue price of bonds registered with the Securities and Exchange Commission ("SEC") is the initial price to the public at which a substantial amount of the debt instruments were sold.

Stripped bonds

For purposes of the rules that require the annual inclusion of OID, a stripped bond (*i.e.*, a bond issued with interest coupons where there is a separation in ownership between the bond and any unpaid coupon) or a stripped coupon (any coupon related to a stripped bond) is treated as a bond originally issued by a corporation on the purchase date, and as having OID equal to (i) the stated redemption price at maturity or the amount payable on the due date of such coupon, respectively, over (ii) such bond's or coupon's ratable share of the purchase price (determined by reference to their respective fair market values on the purchase date).

House bill

Various technical amendments are made to the OID provisions. In addition, clarifying amendments are made to specific provisions of present law.

Retirement of a debt obligation

The retirement of a debt obligation is treated as a sale or exchange without regard to whether the instrument is a capital asset.

Short-term obligations

The statutory exception from the periodic inclusion rules for government short-term obligations is extended to nongovernment obligations.

Definition of bond period

The accrual period with respect to which OID is computed and compounded is defined as each six-month period determined by reference to the maturity date of the bond and the date six months before such maturity date (or the shorter period from the date of issue). This treatment corresponds to the prevalent method of calculating yield to maturity in the financial community (based on semiannual compounding).

Acquisition premium

Acquisition premium is amortized by reducing the OID that would otherwise accrue by a constant fraction determined at the time of purchase. The numerator of the fraction is the total amount of premium to be amortized and the denominator is the aggregate amount of unaccrued OID at the time of purchase. This rule is intended to prevent situations in which the amortization of the acquisition premium exceeds accrual of OID and to provide better matching between the two.

Definition of purchase

The acquisition of a bond from a decedent is treated as a purchase for purposes of the OID provisions, including the rules applicable to stripped bonds and stripped coupons.

Definition of issue price

The issue price rule applicable to bonds registered with the SEC is extended to all publicly traded issues (other than bonds issued for property). The bill authorizes the issuance of regulations to require the furnishing of the amount of OID, the issue date, and other appropriate information. A penalty of one percent of the issue price is imposed for failures to comply without reasonable cause; the maximum penalty with respect to any one issue of bonds is not to exceed $50,000.

Stripped bonds

Under a technical amendment, a stripped bond or stripped coupon is treated as originally issued on the purchase date; the statutory reference to issuance by a corporation is deleted.

Senate amendment

The Senate amendment is the same as the House bill.

Conference agreement

The conference agreement follows the House bill, with a technical amendment relating to stripped bonds.

Stripped bonds

The provision that creates OID with respect to stripped bonds applies for all purposes of part V of subchapter P of chapter 1 of the Code (relating to special rules for bonds and other debt instruments, as added by the bill).

2. Market discount

Present law

Capital gain treatment is accorded to the appreciation in value attributable to market discount on an obligation issued by a corporation or governmental unit and held for more than one year. In many cases, interest on indebtedness incurred to purchase or carry a market discount bond is deductible currently against ordinary income, even though the income eventually generated by the investment is taxed on a deferred basis at capital gain rates.

House bill

Accrued market discount characterized as ordinary income

The House bill provides that, generally, gain on disposition of a market discount bond is recognized as interest income. The term "market discount bond" is defined to mean any bond having market discount, subject to exceptions for (1) certain short-term bonds with fixed maturities, (2) bonds the interest on which is exempt from tax without regard to the identity of the holder, and (3) U.S. savings bonds. Market discount is defined as the excess of the stated redemption price of a bond over the adjusted basis immediately after its acquisition by the taxpayer. The interest-characterization provision applies to obligations issued after the date of enactment.

Deferral of interest deductions

The House bill limits a taxpayor's ability to take current deductions for interest on indebtedness incurred or continued to purchase or carry a market discount bond. The taxpayer's net direct interest expense is al-

lowed as a deduction only to the extent that the expense exceeds the amount of market discount allocable to the days during the taxable year on which the taxpayer held the bond. The term "net direct interest expense" is defined as the excess of the interest paid or accrued by the taxpayer over the interest (including OID) included in gross income for the taxable year with respect to a market discount bond. Deferred interest expense is allowed as a deduction for the taxable year in which the taxpayer disposes of the market discount bond. The interest-deferral provision applies to obligations acquired after the date of enactment.

Senate amendment

The Senate amendment includes the same provisions as the House bill, with two modifications.

Accrued market discount characterized as ordinary income

For market discount bonds that are subject to the interest-deferral rule but not the interest-characterization rule (because the bond was issued before the date of enactment but acquired after such date), gain on disposition is recognized as interest income to the extent of the disallowed interest expense that is allowed as a deduction at that time.

Deferral of interest deductions

Under a special rule for financial institutions, the interest-deferral rule is applied by treating a portion of all interest paid or accrued as being attributable to market discount bonds, allocated by reference to the ratio of the basis of market discount bonds to the basis of all assets held by the financial institution.

Conference agreement

The conference agreement follows the Senate amendment with two modifications.

Accrued market discount characterized as ordinary income

Definition of market discount bond.—The conferees intend that regulations to be prescribed by the Secretary will clarify that the term "market discount bond" does not include an obligation that was demand debt when issued.

Deferral of interest deductions

The conferees intend that interest the deduction for which is deferred as interest on indebtedness incurred or continued to purchase or carry market discount bonds will not be taken into account for purposes of computing the disallowance of interest under section 265(2) (relating to interest on indebtedness incurred or continued to purchase or carry tax-exempt securities).

Short sales.—Under the conference agreement, the deduction of short sale expense is deferred where short sales of property are used to generate funds for the purchase of market discount bonds. This rule will apply in the same manner as the new rule that treats short sale expense as interest for purposes of section 265(2).

Election with respect to deferred interest expense.—The conference agreement provides an election under which deferred interest expense with respect to a market discount bond can be deducted in a taxable year prior to the year in which such bond is disposed of in cases where, subsequently, there is net interest income from the bond. If the election is made, any deferred interest expense with respect to a market discount bond is treated as paid or accrued to the extent that interest included in gross income exceeds interest that was actually paid or accrued with respect to the bond for a taxable year. Any deferred interest expense that remains after application of the elective provision is deductible on disposition of the market discount bond. The election is to be made on a bond-by-bond basis.

3. Discount on short-term obligations

Present law

There is a statutory exception to the rule requiring the periodic inclusion of acquisition discount on short-term government obligations payable without interest at a fixed maturity not exceeding one year. A similar exception is provided by Treasury regulations for OID on short-term obligations other than government obligations. In many cases, interest on indebtedness incurred to purchase or carry obligations eligible for an exception can be deducted currently against ordinary income to generate a one-year tax deferral.

House bill

Definition of short-term obligation

The term "short-term obligation" is defined as any bond, debenture, note, certificate, or other evidence of indebtedness that has a fixed maturity date not more than one year from the date of issue.

Mandatory accrual of OID or acquisition discount

Under the House bill, taxpayers are required to accrue OID or acquisition discount currently with respect to short-term obligations that (i) are held by a taxpayer using an accrual method of accounting, (ii) held by a bank, (iii) held primarily for sale to customers in the ordinary course of the taxpayer's trade or business, or (iv) identified by the taxpayer as being part of a hedging transaction. This provision is effective for obligations acquired after the date of enactment.

Short-term obligations other than government obligations

Taxpayers who acquire short-term obligations other than government obligations can elect to apply the rules described above to acquisition discount on such obligations rather than OID.

Deferral of interest deductions

The House bill also limits a taxpayer's ability to take current interest deductions on indebtedness incurred to purchase or carry obligations that are not subject to the rule for mandatory accrual. The interest-deferral rule does not apply if the taxpayer elects to accrue discount currently. The provision is effective for obligations acquired after the date of enactment.

Election

The House bill provides an election to accrue acquisition discount or OID currently for all short-term obligations held during the taxable year that includes the date of enactment. If this election is made, the application of the accrual rule is treated as a change in the taxpayer's method of accounting, subject to the rules of section 481 (relating to adjustments required by changes in method of accounting). Adjustments required by section 481 are to be taken into account over a ten-year period.

Senate amendment

The Senate amendment includes the provision in the House bill that limits the ability to take interest deductions on indebtedness attributable to obligations eligible for an exception. The Senate amendment does not, however, include the provision that requires certain taxpayers to accrue discount currently.

Special rule for certain financial institutions

The Senate amendment also contains a special rule for certain financial institutions, under which a portion of all interest paid or incurred is treated as being attributable to the purchase or carrying of obligations eligible for the exceptions; the portion treated under the special rule is determined by reference to the ratio of the basis of short-term obligations eligible for the exceptions to the basis of all assets held by the financial institution.

Election

The Senate amendment provides an election to apply the interest-deferral rule to all short-term obligations held during the taxable year that includes the date of enactment. If this election is made, taxpayers obtain a five-year pay-in period for additional tax liability attributable to income that was deferred from taxable years prior to the year that includes the date of enactment. Interest is charged on any unpaid installments.

Conference agreement

The conference agreement follows the House bill with several modifications.

Definition of short-term obligation

The conference agreement contemplates that a stripped coupon or a stripped bond may be treated as an evidence of indebtedness within the meaning of the definition of short-term obligation. Thus, because a stripped coupon or stripped bond is treated as originally issued on the purchase date, the mandatory accrual and interest-deferral rules will apply to a stripped coupon or stripped bond that is payable not more than one year from the date of purchase.

Mandatory accrual of OID or acquisition discount

The conference agreement expands the scope of the provision requiring current inclusion of OID or acquisition discount to any short-term obligation held by (i) a regulated investment company ("RIC"), (ii) a common trust fund maintained by a bank, (iii) a partnership, S corporation, trust, or other pass-through entity more than 20 percent of the value of which is owned—for 90 days or more of the entity's taxable year—by taxpayers who are subject to the rule for mandatory accrual, and (iv) any pass-through entity that is formed or availed of to avoid the application of the rule for mandatory accrual. If the more-than-20-percent test is satisfied during any 90-day period of a pass-through entity's taxable year, then the rule for mandatory accrual is applied with respect to obligations acquired on or after the first day of the entity's taxable year.

Taxpayers using a hybrid method of accounting.—The conferees intend that the rule for mandatory accrual will apply to short-term obligations held by any taxpayer who uses an accrual method of accounting in combination with any other method of accounting.

Optional accrual for RICs.—Under a provision of the House bill, RICs are permitted to elect to currently accrue discount with respect to short-term government obligations. This election is available for taxable years beginning after December 31, 1978. Because the conference agreement applies the rule for mandatory accrual to all short-term obligations acquired by RICs after the date of enactment, the optional accrual rules will only apply for taxable years beginning after December 31, 1978, and ending prior to the taxable year that includes the effective date of the rule for mandatory accrual.

Deferral of interest deductions

The conferees intend that interest on indebtedness incurred or continued to purchase or carry short-term obligations subject to the interest deferral rule not be taken into account for purposes of comput-

ing the disallowance of interest under section 265(2).

Short-term obligations other than government obligations

The conferees intend that the election to apply the rules described above to acquisition discount rather than OID apply regardless of whether the obligation was acquired after original issue.

Election

The conference agreement provides an election to accrue discount for all short-term obligations held during the taxable year that includes the date of enactment. The election is available only to taxpayers subject to the rule for mandatory accrual of discount on short-term obligations. The conference agreement clarifies that this election is available only with respect to the taxpayer's first taxable year ending after the date of enactment. If the election is made, the application of the accrual rule is treated as a change in the taxpayer's method of accounting. The net adjustments to income required by section 481 are to be made over a five-year period beginning with the year for which the election is made (the "spread period"). The net adjustments will normally be the income that would be included in the taxable year including the date of enactment under cash basis accounting but that is not included under accrual basis accounting.

The amount of the adjustment to be taken into account in the first year of the spread period (the taxable year including the date of enactment) is the sum of (1) one-fifth of the net adjustments, and (2) the excess (if any) of (a) the cash basis income over the accrual basis income over (b) one-fifth of the net adjustments. The term "cash basis income" means the cumulative amount of acquisition discount or OID with respect to short-term obligations that would be includible in gross income for the current taxable year and the preceding taxable years in the spread period if the rule for mandatory accrual were not applicable. "Accrual basis income" is defined as the cumulative amount of acquisition discount or OID includible in gross income for the current taxable year and the preceding taxable years in the spread period under the rule for mandatory accrual. The requirement that the first year income inclusion be no less than the excess of cash basis over accrual basis income prevents the transition rule from producing a tax reduction relative to present law (which would arise where the excess of cash basis income over accrual basis income exceeds one-fifth of the net adjustments). The conferees intend that the 5-year spread be a mitigation of the tax increase provided by the bill, not a tax reduction.

For each year after the first year of the spread period, the amount of the adjustment to be taken into account is the sum of (1) the balance of the net adjustments divided by the number of taxable years remaining in the spread period (including the year for which the determination is being made), and (2) the excess (if any) of (a) the cash basis income over the accrual basis income over (b) one-fifth of the net adjustments, multiplied by five and minus the number of years remaining in the spread period (not including the year for which the determination is being made). In computing the excess of cash basis income over accrual basis income for a year subsequent to the first year of the spread period, such excess is reduced by any amount that gave rise to an income inclusion in excess of the amount of the net adjustment allocable to a prior year of the spread period. This formula is also intended to ensure that the five-year spread does not permit taxpayers to receive a tax reduction relative to present law.

The conferees intend that, in determining the net adjustments required under section 481 to prevent the omission of amounts, the cash basis income (as defined above) is computed as if such income had accrued in the preceding taxable year and, thereby, resulted in an increase in the basis of the related short-term obligations. Absent this treatment, there would be no omission from income to which section 481 could apply.

4. Original issue discount on tax-exempt obligations

Present law

Under Internal Revenue Service rulings, tax-exempt OID is apportioned among the original holder and subsequent holders of an instrument on a straight-line basis over the term of the obligation.

House bill

Tax-exempt OID is accrued in the same manner as that provided for OID on obligations issued by corporations and other juridical entities, under the economic constant interest method.

The provision is effective for obligations issued after September 3, 1982, and acquired after March 1, 1984.

Senate amendment

The Senate amendment is the same as the House bill.

Conference agreement

The conference agreement follows the House bill and the Senate amendment. In the case of tax-exempt obligations with a maturity of less than one year, interest will be computed in the same manner as for short-term taxable obligations.

D. Corporate Tax Provisions

1. Dividends received deductions for debt-financed portfolio stock

Present law

A corporate shareholder generally can deduct 85 percent of dividends received from other corporations. If the corporate shareholder is financing an investment in stock with borrowed funds, interest on the indebtedness is generally also deductible. Together, these rules permit corporations to deduct amounts paid or incurred to earn tax-favored dividend income.

House bill

The House bill reduces tax benefits with respect to certain dividend-paying stock the ownership of which is financed by debt. Generally, under the House bill, the corporate taxpayer must determine the percentage of the cost of an investment in stock which is financed with borrowed money. The amount of any dividends received deduction with respect to any dividends received on that stock which would otherwise be available is then reduced by that percentage. The rules are intended to determine what portion of the investment is debt-financed and to limit the availability of double deductions accordingly.

Under the House bill, the dividends received deduction is limited to a percentage determined by computing the product of 85 percent, and 100 percent minus the average portfolio indebtedness. Under regulations, the average portfolio indebtedness is the percentage obtained by dividing the average amount of the portfolio indebtedness with respect to the stock by the taxpayer's average adjusted basis in the stock during the base period. A special rule is provided for cases in which the taxpayer does not hold the portfolio stock for the entire base period. Under regulations, any reduction in the amount of the dividends received deduction is not to exceed the amount of any interest deduction (including any deductible short sale expenses) allocable to the dividend involved.

The term "debt-financed portfolio stock" means any stock of a corporation if, (a) as of the beginning of the ex-dividend date for the dividend involved, the taxpayer does not own (1) stock of such corporation possessing at least 50 percent of the total combined voting power of all classes of stock entitled to vote, and (2) at least 50 percent of the total number of shares of all other classes of stock of such corporation, and (b) at some time during the "base period" there is portfolio indebtedness with respect to such stock.

The term "base period" means, with respect to any dividend, the shorter of (1) the period between the ex-dividend date for the dividend involved and the ex-dividend date for the immediately preceding dividend, or (2) the one-year period ending on the day before the ex-dividend date for the dividend in question.

The term "portfolio indebtedness" means indebtedness directly attributable to investment in the portfolio stock. For this purpose, proceeds of any short sale are treated as indebtedness for the period between the short sale and the closing of the short sale.

To illustrate these rules, assume that Corporation A pays a dividend of $1 per share each quarter. The ex-dividend dates are January 15, April 15, July 15, and October 15. On January 16, 1985, Corporation B buys 1,000 shares of Corporation A for a total cost of $100,000. Assume further that Corporation B borrows 60 percent, or $60,000, of the purchase price, that the interest rate on the loan is 14 percent per year, and that the stock is portfolio stock. On April 15, 1985, when the $60,000 debt is still outstanding, Corporation B receives dividends on the stock totalling $1,000. Corporation B then sells the stock on April 16, 1985, for $100,000. Under present law, Corporation B would generally be entitled to a dividends received deduction of 85 percent of $1,000, or $850. Under the House bill, since 60 percent of the cost of the stock was debt-financed, 60 percent of the dividends received deduction is disallowed. As a result, Corporation B is entitled to a dividends received deduction of only 40 percent of $850, or $340. Since interest expense allocable to the dividend is $2,100 ($60,000 times 14 percent times 1/4), the special rule limiting the reduction to the amount of interest expense allocable to the dividend is not applicable.

The provision does not apply with respect to dividends eligible for the 100-percent dividends received deduction (generally determined under section 243(b)), or to dividends received by a small business investment company operating under the Small Business Investment Act of 1958.

The provision generally applies to stock the holding period for which commences after the date of enactment.

Senate amendment

The Senate amendment generally follows the House bill. However, proceeds of a short sale are not treated as indebtedness if no deduction is allowed to the party effecting the short sale for payments in lieu of dividends under section 263(h) (as added by the bill).

The provision generally applies to stock the holding period for which commences after the date of enactment. The conference agreement generally follows the House bill, except as noted below. The rule in the Senate amendment regarding proceeds of a short sale is viewed as no different from the rule in the House bill.

Conference agreement

The conference agreement generally follows the House bill, except as noted below. The rule in the Senate amendment regarding proceeds of a short sale is viewed as not different from the rule in the House bill.

Portfolio stock

Under the conference agreement, the term "portfolio stock" is redefined. Stock of a corporation is portfolio stock unless specifically excluded. Under the conference agreement, stock of a corporation is not portfolio stock if, as of the beginning of the ex-dividend date for the dividend involved, the taxpayer owns stock (1) possessing at least 50 percent of the total combined voting power of all classes of stock entitled to vote of such corporation, and (2) having a value equal to at least 50 percent of the value of all the stock (disregarding certain preferred stock) of such corporation.

In addition, stock of a corporation is not portfolio stock if, as of the beginning of the ex-dividend date for the dividend involved, (1) the taxpayer owns stock of such corporation possessing at least 20 percent of the voting power and value of all the stock (disregarding certain preferred stock) of such corporation, and (2) five or fewer corporate shareholders own, directly, stock of such corporation possessing at least 50 percent of the voting power and value of all the stock (disregarding certain preferred stock) of such corporation. This rule exempts certain corporate joint ventures from the provision.

Finally, stock of a bank or a bank holding company is not portfolio stock if, as of the beginning of the ex-dividend date for the dividend involved, the taxpayer (1) owns stock having a value equal to at least 80 percent of the value of all the stock (disregarding certain preferred stock) of the corporation, and (2) holds options to acquire stock possessing at least 50 percent of voting power of all classes of stock of such corporation.

Directly attributable

The reports of the House and Senate committees contain examples, which the conferees endorse, of indebtedness which is treated as directly attributable to investment in stock and of indebtedness which is generally not so treated. However, the conferees wish to clarify that indebtedness of a taxpayer is not directly attributable to portfolio stock held by a corporation all or substantially all of the stock of which is acquired by the taxpayer if the portfolio stock is held by the acquired company in the active conduct of a trade or business. This rule applies only in cases in which the practice of making portfolio stock investments is an integral part of the acquired corporation's trade or business. Thus, for example, if the taxpayer makes a 100 percent debt-financed acquisition of all of the stock of a life insurance company, and such company uses its capital and surplus to make investments in portfolio stock of other corporations, the provision is not to apply because the taxpayer is really acquiring an active business, not portfolio stock. In contrast, however, if the taxpayer makes a debt-financed acquisition of 100 percent of the stock of a mere investment company, the provision is applicable.

Also, the conferees wish to clarify that the provision may be applied where indebtedness is directly attributable to the carrying of portfolio stock as well as where the indebtedness is directly attributable to the acquisition of portfolio stock. Thus, assume that an acquisition of stock is entirely equity-financed. Assume also that the purchaser, at a later date, obtains funds through a borrowing secured by the portfolio stock in a case in which the purchaser could reasonably have been expected to sell the portfolio stock rather than incur the indebtedness. The provision is applicable.

Portfolio indebtedness

The conferees wish to clarify that purchase money indebtedness is treated as portfolio indebtedness for purposes of the provision. Thus, if a corporation buys stock, issuing its own debt obligation to the seller, that obligation is portfolio indebtedness.

The provision operates on the dividends received deduction instead of the interest deduction. However, under the conference agreement, the Treasury is granted authority to issue regulations providing, in lieu of reducing the dividends received deduction, for the disallowance of the interest deduction, or other appropriate treatment, where the obligor is a person other than the person receiving the dividend. The conferees anticipate that these regulations, for example, would apply in a case in which two corporations, A and B, acquire all of the stock of a third corporation, C, with A using debt to acquire 30 percent of the C stock and B using equity funds to acquire the remaining 70 percent. If the money borrowed by A is directly attributable to investment in dividend-paying portfolio stock by C, under such regulations, there would be no reduction in C's dividends received deduction. Rather, interest expense paid or accrued by A on the debt incurred to acquire the C stock would be disallowed, or other appropriate treatment (e.g., the equivalent of a recapture of interest deductions) provided. This result is more appropriate than a reduction in C's dividends received deduction because such a reduction would, in effect, penalize both A and B even though B's investment was not debt-financed.

2. Certain dividends from regulated investment companies

Present law

Domestic corporations are generally entitled to an 85-percent dividends received deduction with respect to dividends from other corporations. No similar deduction is available with respect to their interest income. Individuals are generally entitled to exclude from gross income up to $100 of dividend income. No similar rule applies with respect to their interest income.

Mutual funds, or regulated investment companies ("RICs"), are generally not subject to tax if they distribute their income to their shareholders. That income is generally taxed to the shareholders directly. If less than 75 percent of a RIC's gross income for a taxable year consists of dividends from domestic corporations, then its taxable distributions (other than capital gain distributions) to its shareholders are treated as dividend income in an amount based on the ratio of the RIC's gross income constituting dividend income to all its gross income for the year. However, if 75 percent or more of the RIC's gross income for a taxable year consists of dividends from domestic corporations, then all the RIC's such distributions for the year are treated as dividend income to its shareholders.

For purposes of the foregoing rules, it is not clear whether a dividend received by a RIC is treated as a dividend if the RIC, had it been a regular corporation, would not have been entitled to a dividends received deduction with respect to it. Furthermore, it may be unclear whether a RIC's short-term capital gain income from the sale of stock or securities is treated as gross income for this purpose. See Rev. Rul. 80-345, 1980-2 C.B. 204 (holding that it is to be treated as a part of gross income for this purpose).

House bill

With respect to corporate shareholders of a RIC, 100 percent, rather than 75 percent, of the RIC's gross income must constitute dividend income before all its distributions (other than capital gain distributions) are to be treated as dividend income eligible for the dividends received deduction in the hands of domestic corporate shareholders. Furthermore, for this purpose, no dividend received by a RIC is treated as a dividend unless, had the RIC been a regular corporation, it would have been entitled to a dividends received deduction with respect to it. If less than 100 percent of the RIC's gross income constitutes dividend income, the proration rule of present law applies.

The provision is effective for RIC taxable years beginning after the date of enactment.

Senate amendment

The Senate amendment follows the House bill with certain exceptions. First a 95-percent, rather than a 100-percent, threshold applies. Second, except for the rule requiring that the RIC be entitled to a dividends received deduction, the provision applies for purposes of the dividend exclusion for individuals as well as the dividends received deduction for corporations. Third, the amendment makes it clear that short-term capital gain from the sale of stock or securities is treated as gross income for purposes of the provision. Fourth, if the 95-percent threshold is not met, the amount of the RIC's distributions to be treated as dividends to its corporate shareholders is to be as designated by the RIC. However, the RIC cannot designate as dividends an amount in excess of its aggregate dividends for the taxable year involved which would have been eligible for a dividends received deduction had the RIC been an ordinary corporation.

The provision is effective for RIC taxable years beginning after the date of enactment.

Conference agreement

The conference agreement generally follows the Senate amendment with three exceptions. First, the conference agreement adopts the 100-percent threshold of the House bill for purposes of the dividends-received deduction for corporate shareholders (but accepts the 95-percent threshold of the Senate amendment for purposes of the dividend exclusion for individual shareholders). Second, the conference agreement provides that net short-term capital gains from dispositions of stock or securities in excess of long-term capital losses from dispositions of stock or securities are treated as gross income for purposes of the provision. Third, the basic designation requirement is extended to the dividend exclusion in cases in which less than 95 percent of the RIC's income consists of dividend income. The conferees intend that each share of stock of the RIC outstanding for the entire taxable year (or any portion thereof) have the same designation of income made with respect to it. That is, for example, the RIC cannot designate the same quarterly dividend as being from dividend income for some shareholders and from tax-exempt interest for others.

3. Corporate shareholder's basis in stock reduced by reason of extraordinary dividends

a. Basis

Present law

A corporation owning stock of another corporation generally is allowed a deduction equal to 85 percent of the amount of any distribution received with respect to that stock which qualifies as a dividend. Receipt of the dividend generally has no effect on the shareholder's basis in the stock. Under

section 301(c)(2), if the distribution is not a dividend, the shareholder's basis in the stock generally is reduced by the amount of the distribution. To the extent such amount exceeds the shareholder's basis in the stock, the excess is treated as gain from a sale of the stock. For these purposes, if the distribution is of property rather than cash, the amount of the distribution, in the case of certain corporate shareholders, is the lesser of (1) the property's fair market value, or (2) the property's adjusted basis in the hands of the distributing corporation, increased by any gain recognized to it on the distribution.

House bill

A corporate shareholder's basis in any share of stock which is held for one year or less is reduced by the non-taxed portion of any extraordinary dividend received with respect to that stock. Extraordinary dividends which, in amount, equal or exceed 10 percent (5 percent in the case of a share of stock preferred as to dividends) of the corporate shareholder's basis (determined without regard to the provision) in the share of stock with respect to which the dividend is received. All dividends received with respect to a share of stock which have ex-dividend dates within a period of 85 days are treated as one dividend. Furthermore, all dividends received with respect to a share of stock which have ex-dividend dates within a period of 365 days are treated as extraordinary if their amounts exceed 20 percent of the corporate shareholder's basis (determined without regard to the provision) in such share.

Solely for purposes of the provision, the amount of a dividend is, in the case of a distribution of property other than cash, its net fair market value. The non-taxed portion of the dividend is the amount of the dividend, as so determined, less any portion thereof includible in income which is not offset by a dividends received deduction.

A distribution which, had it qualified as a dividend, would have been treated as an extraordinary dividend, is to be treated as an extraordinary dividend even though the distributing corporation has no earnings and profits (or an amount of earnings and profits that is less than the amount of the distribution). In such a case, the amount of the distribution (as determined under the provision) is reduced by the amount of any reduction in stock basis resulting from the application of section 301(c)(2) of present law.

In determining whether the more than one-year holding period requirement has been satisfied, the general holding period suspension rules applicable to the dividends received deduction, as amended by the House bill, are applicable.

The Treasury is authorized to prescribe regulations applying the provision in the case of stock dividends, stock splits, reorganizations, and other similar transactions.

The provision is effective with respect to distributions after March 1, 1984.

Senate amendment

The Senate amendment follows the House bill except that the Senate amendment applies to distributions after the date of enactment.

Conference agreement

The conference agreement follows the House bill. In addition, the conference agreement clarifies that if the amount of the extraordinary dividend (as determined under the provision) exceeds the corporate shareholder's basis in the stock with respect to which the distribution was made, the excess will be taxed to the corporate shareholder under section 301(c)(3)(A). Furthermore, in determining whether the more than one-year holding period is satisfied, the bill makes provision for tolling the running of the holding period in certain instances. Finally, the conferees wish to make clear their intention that if a redemption distribution is treated as a distribution under section 301 rather than a sale or exchange of the redeemed shares under section 302(a), the distribution is treated as made, pro rata, with respect to stock of the shareholder which is not redeemed.

b. Suspension of holding period for dividends - received deduction

Present Law

The 85-percent dividends received deduction is disallowed unless the taxpayer satisfies a 16-day holding period with respect to the dividend-paying stock (91 days in the case of dividends on certain preferred stock). The 16-day and 91-day holding periods do not include periods during which the taxpayer reduces or eliminates the risk of loss on the underlying stock by entering into a short sale of, acquiring an option to sell, or entering into a binding contract to sell substantially identical stock or securities.

House bill

The House bill expands the scope of the provision that suspends the holding period of stock to include (1) any period during which the taxpayer is the grantor of an option to buy substantially identical stock or securities, subject to an exception for a qualified covered call (as defined for purposes of the provisions relating to tax straddles and (2) any period during which the taxpayer holds one or more other positions that substantially diminish the risk of loss from holding the stock.

Senate amendment

The Senate amendment generally is the same as the House bill except that (1) in lieu of the "substantial diminution" standard in the House bill, the holding period of stock is suspended during any period when the taxpayer has reduced the risk of loss from holding the stock by reason of holding one or more positions in substantially similar property, prospectively only, as regulations may provide, and (2) an exception is provided for broker dealers with respect to ordinary income or loss property.

Conference agreement

The conference agreement follows the House bill with several modifications.

Substantially similar or related standard

Under the conference agreement, the 85-percent dividends received deduction is disallowed unless the taxpayer satisfies a 46-day holding period requirement. The 46-day holding period does not include any period when the taxpayer reduces the risk of loss by reason of holding one or more other positions in substantially similar or related property. The conference agreement does not provide an exception for broker dealers.

The following transactions are examples of the types of transactions that are within the scope of the rule for substantially similar or related property: (1) a short sale of common stock when the taxpayer holds convertible preferred stock of the same issuer and the price changes of the convertible preferred stock and the common stock are related (the same result would obtain in the case of a short sale of a convertible debenture while holding convertible preferred stock into which the debenture is convertible or common stock, or a short sale of convertible preferred stock while holding common stock); and (2) the acquisition of a short position in a regulated futures contract ("RFC") on a stock index (or the acquisition of an option to sell the RFC or the stock index itself, or the grant of a deep-in-the-money option to buy the RFC or the stock index) while holding the stock of an investment company whose principal holdings mimic the performance of the stocks included in the stock index (or, alternatively, while holding a portfolio composed of stocks that mimic the performance of the stocks included in the stock index). The conference agreement contemplates that regulations setting forth the application of the rule for substantially similar or related property to the transactions identified above will be generally effective as of the date of enactment of the bill, but that such regulations will be applied to other transactions on a prospective basis. The conferees intend no inference regarding the circumstances under which the dividends received deduction would be disallowed under present law where taxpayers write in-the-money calls with respect to stock they hold. In addition, no inference is intended regarding what situations are covered under the present-law rule applicable to substantially identical stock or securities.

Ordinarily, common stock in one corporation would not be viewed as substantially similar or related to common stock of another corporation. Where stocks of similar companies are involved, however, a short sale of preferred stock of one corporation while holding preferred stock of the other corporation may result in application of the risk reduction rule.

The substantially similar standard is not satisfied merely because the taxpayer (1) holds a single instrument that is designed to insulate the holder from market risks (*e.g.*, adjustable rate preferred stock that is indexed to the Treasury bill rate), or (2) is an investor with diversified holdings and acquires an RFC or option on a stock index to hedge general market risks. The conferees intend that an investment in preferred stock coupled with an option to sell the stock will not be treated as a single instrument, for purposes of applying the substantially similar standard, without regard to whether the option trades separately from the stock.

4. Non-liquidating distributions by corporations of appreciated property

a. Recognition

Present law

A corporation generally does not recognize income on the distribution, with respect to its stock, of appreciated property. There are exceptions to this rule. First, such a distribution will generally trigger recapture income, as under section 1245 (relating to depreciable personal property). Second, the distribution of LIFO inventory generally will generate income in an amount equal to the LIFO reserve with respect to such inventory. Third, if a corporation distributes property which is subject to a liability, or the shareholder assumes a liability in connection with the distribution, gain is generally recognized to the distributing corporation to the extent the liability exceeds the adjusted basis of the distributed property in the hands of the distributing corporation. Fourth, if a corporation distributes property in a redemption to which sections 301 through 307 apply, gain is generally recognized in an amount equal to the excess of the distributed property's value over its adjusted basis in the hands of the distributing corporation. If gain is recognized to a distributing corporation in a redemption distribution, neither the LIFO inventory rule nor the liability rule applies.

However, gain is not always recognized to the distributing corporation with respect to redemption distributions to which sections

301 through 307 apply. For example, gain is not recognized with respect to redemption distributions to certain corporate shareholders. Furthermore, gain is not recognized with respect to redemption distributions to certain noncorporate shareholders if the distribution qualifies as a partial liquidation. Finally, sections 311(d)(2)(C) through (F) provide additional exceptions to the general rule that gain is recognized to the distributing corporation in a redemption distribution.

House bill

Under the House bill, gain (but not loss) is generally recognized to the distributing corporation on any non-liquidating distribution of appreciated property to which sections 301 through 307 apply as if such property had been sold by the corporation for its fair market value rather than distributed. The general rule applies whether or not the distribution qualifies as a dividend.

The general rule also applies whether or not the distribution is a redemption distribution. However, if the distribution is a redemption distribution, the present-law exceptions to gain recognition remain, with two exceptions. First, gain is recognized if the distribution in redemption is to a corporate shareholder unless such shareholder owns, at the time of the distribution, stock possessing at least 80 percent of the total combined voting power and at least 80 percent of the total number of all other classes of stock (disregarding certain preferred stock) of the distributing corporation. However, the corporate shareholder is not to be treated as an 80-percent or more shareholder for this purpose unless its basis in the distributed property is determined with reference to the property's adjusted basis in such property under section 301(d)(2). Second, gain is not recognized if the distribution (1) qualifies as a partial liquidation under section 302(b)(4) and is made to certain noncorporate shareholders, or (2) is a qualified dividend (described below).

If the distribution is not a redemption distribution, gain is recognized in full unless (1) the distribution is to an 80-percent or more corporate shareholder (as determined above), or (2) section 311(d)(2)(C) of present law (relating to certain distributions of stock or obligations of certain controlled corporations) applies.

In the case of a distribution which is not a redemption distribution, gain is not recognized to the distributing corporation with respect to property distributed to certain noncorporate shareholders to the extent the distribution is a qualified dividend. A qualified dividend is a distribution of property which is (1) a dividend, (2) of property used by the distributing corporation immediately before the distribution in the active conduct of a trade or business, and (3) not property described in section 1221(1) (relating to inventory and certain order property) or section 1221(4) (relating to certain accounts and notes receivable). Furthermore, the distribution must be with respect to qualified stock, as defined in section 311(e).

The rules relating to LIFO inventory and liabilities in excess of basis are to be applied before any of the other recognition provisions.

The provision is effective with respect to distributions declared after the date of enactment. A transitional rule is provided for distributions before February 1, 1986, by certain corporations of royalty trust property with respect to which a royalty trust proposal was submitted by certain groups.

Senate amendment

The Senate amendment generally is the same as the House bill. However, it is effective with respect to distributions declared after March 15, 1984. The provision does not apply to any distributions before February 1, 1986, by corporations referred to in the transitional rule under the House bill. Nor does it apply to certain distributions of partnership interests traded on a national securities exchange on March 7, 1984, by certain corporations owning more than 80 percent of such interests on March 7, 1984. Finally, it does not apply to certain distributions declared before the date of enactment of not more than 51 percent of the stock of corporations controlled by certain corporations pursuant to proposals considered before February 15, 1982.

Conference agreement

The conference agreement follows the Senate amendment with some exceptions.

Eighty-percent corporate shareholders

Under the conference agreement, the rule exempting the distributing corporation with respect to distributions to 80-percent corporate shareholders that take a basis in the distributed property determined under section 301(d)(2) is eliminated. Thus, an ordinary, non-liquidating distribution of appreciated property by a 100-percent subsidiary to its corporate parent is a taxable event to the distributing corporation. Generally, the corporate parent takes a fair market value basis in the distributed property (sec. 301(d)(2)).

Under present law, such a distribution would generally not be taxable to the distributing corporation, and the corporate parent would inherit the distributing corporation's adjusted basis in (and holding period for) the property. As a result, when the parent sells the property, gain "accruing" during the period of time the property was held by the subsidiary would be taxed to the parent, rather than the subsidiary, and the character of that gain (as capital or ordinary) would likely be determined with reference to the character of the property in the parent's, rather than the subsidiary's hands. In general, the conferees think that such a shifting of tax liability is inappropriate in the case of ordinary, non-liquidating distributions. Furthermore, the conferees do not believe that such a distribution should permit corporate taxpayers to be able to change the character of the income involved, as present law may permit. Furthermore, the theory of section 311 and the provision is that the distribution of appreciated property to a shareholder is a realization event and, therefore, an appropriate time to impose tax liability. The conferees are not persuaded that a different rule is appropriate merely because the shareholder may be an 80-percent corporate shareholder. If the two corporations are not filing a consolidated return, they should be treated as separate taxpayers, just as they are when one sells property to, or performs services for, the other. The conferees are also aware of cases under present law in which an acquiring corporation can sell, indirectly, built-in-loss assets of an acquired corporation and recognize the loss while selling, indirectly, built-in-gain assets of the acquired corporation without having to take any of that gain into income. Finally, the conferees are aware of transactions in which one corporation buys all the stock of another, has the acquired corporation distribute appreciated property to it, and then sells the stock and recognizes a tax loss. The conference agreement addresses these concerns.

The conferees anticipate that the Treasury will promptly consider what changes, if any, are necessary or appropriate under the consolidated return regulations by reason of this rule.

Effective dates

Under the conference agreement, the provision is generally effective for distributions declared on or after June 14, 1984. However, the rule applying the provision with respect to a distribution to an 80-percent corporate shareholder that takes a basis in the distributed property determined under section 301(d)(2) generally applies only to distributions after December 31, 1984. In addition, the rule applying the provision to such an 80-percent corporate shareholder does not apply to certain distributions before September 1, 1986. The September 1, 1986, rule applies only in the case of distributions by a corporation (or by any member of a group of corporations, of which such corporation was the common parent, which files a consolidated return for the period which includes June 14, 1986) (1) control of which, as defined in sec. 368(c), is acquired other than in a tax-free reorganization after January 1, 1984, but before January 1, 1985, and (2) a tender offer for the shares of which was commenced on May 23, 1984, and amended on May 24, 1984. Furthermore, the September 1, 1986, rule applies only if the distributing corporation and the distributee corporation are members of the same group filing consolidated returns for the period which includes the date of the distribution. Finally, the September 1, 1986, rule applies only if the distributed property consists of stock of a corporation which on June 14, 1984, was a member of the affiliated group of which the corporation referred to in (1) above was the common parent.

Under the conference agreement, if the distributing corporation and the distributee corporate shareholder are part of the same affiliated group of corporations filing a consolidated return for the period which includes the date of distribution, the aggregation rules of Treas. reg. section 1.1502-34 are applicable in determining whether the 80-percent corporate shareholder exception applies.

The conferees intend that in the case of a redemption distribution to a corporate shareholder, that shareholder is not to be treated as an 80-percent corporate shareholder unless it is an 80-percent corporate shareholder after the distribution, as well as before (applying the rule of Treas. reg. sec. 1.1502-34).

The conference agreement also retains two of the three transitional rules contained in the Senate amendment.

b. Holding period for property distributed by one corporation to another

Present law

Section 301(d)(2) provides rules to determine the basis in the hands of certain corporate shareholders of property distributed to them by a distributing corporation with respect to their stock. That basis is the lesser of (1) the distributed property's fair market value, under section 301(d)(2)(A), or (2) the distributed property's adjusted basis in the hands of the distributing corporation, increased by any gain recognized to the distributing corporation on the distribution, under section 301(d)(2)(B). If section 301(d)(2)(B) applies, then, under section 1223(2), the corporate shareholder's holding period for the property includes the period during which it was held by the distributing corporation. If section 301(d)(2)(A) applies, the corporate shareholder's holding period in the distributed property begins on the date of the distribution.

Under section 1248(f)(1), if certain domestic corporations distribute the stock of certain foreign corporations in a transaction to which section 311 applies, the distributing corporation will have included in its gross

income as a dividend an amount equal to certain earnings and profits of the foreign corporation. Under section 1248(f)(2), the rule of section 1248(f)(1) does not apply if, among other things, the distribution is to a domestic corporate shareholder which includes in its holding period for the distributed stock the period such stock was held by the distributing corporation.

House bill

If section 301(d)(2)(B) applies, the House bill provides that the corporate shareholder's holding period for the distributed property begins not earlier than the date the stock with respect to which the distribution was made was acquired.

The provision applies to distributions declared after the date of enactment.

Senate amendment

The Senate amendment generally is the same as the provision in the House bill except that the Senate amendment applies to distributions after the date of enactment.

Conference agreement

The conference agreement generally follows the Senate amendment. However, the conference agreement explicitly clarifies that if the distributing corporation recognizes gain on the distribution under section 311, as amended by the bill, the corporate shareholder's basis in the distributed property is determined under section 301(d)(2)(A) (and not section 301(d)(2)(B)) so that its holding period in the property begins on the date of the distribution. The conferees are aware that under this rule after section 311, as amended by the bill, becomes fully effective, a corporate shareholder's holding period for property distributed to it by another corporation will generally begin on the date of the distribution.

Under the conference agreement, the provision does not apply for purposes of section 1248(f)(2). However, the amendments to section 311 do apply. Thus, the distribution of appreciated stock of a foreign corporation by one domestic corporation to another may trigger gain recognition (some of which may be dividend income under section 1248(a)) to the distributing corporation. On the other hand, the distribution may not trigger gain recognition to the distributing corporation if the distributee shareholder is an 80-percent corporate shareholder and if the distribution occurs before January 1, 1985. If gain recognition is not triggered, and if the conditions of section 1248(f)(2)(B) are satisfied, then section 1248(f)(1) does not apply, and the distributing corporation has no dividend income by reason of the distribution. The conferees are aware that after section 311, as amended by the bill, becomes fully effective, such a distribution will trigger gain recognition (and dividend income under section 1248(a)) to the distributing corporation.

5. Capital gains distributions from regulated investment companies and real estate investment trusts

Present law

Generally, regulated investment companies ("RICs") that distribute their income are not subject to tax. Rather, that income is taxed directly to their shareholders.

RICs frequently realize long-term capital gain income. That income is generally treated as long-term capital gain to the shareholders. If the stock with respect to which a long-term capital gain distribution is made (or treated as having been made) is held by a shareholder for less than 31 days, any loss on the sale or exchange of that stock is treated as a long-term capital loss to the extent of any long-term capital gain distribution by the RIC with respect to such stock.

Similar rules apply with respect to real estate investment trusts ("REITs").

House bill

If stock with respect to which a long-term capital gain distribution is made by a RIC or a REIT is held by a shareholder for 6 months or less, any loss on the sale or exchange of the stock is treated as a long-term capital loss to the extent of the long-term capital gain distribution. An exception is provided for dispositions of stock pursuant to a periodic redemption plan.

The provision is applicable to losses incurred on stock acquired after the date of enactment.

Senate amendment

The Senate amendment is the same as the House bill.

Conference agreement

The conference agreement follows the House bill and the Senate amendment. In determining whether stock has been held for 6 months or less, the bill amends provisions tolling the running of the holding period in certain instances.

6. Certain expenses incurred in connection with short sales

Present law

Treatment of short sales of stock

In a "short sale", the taxpayer sells borrowed property (such as stock or securities) and later closes the short sale by returning identical property to the lender. Gain or loss on the closing of a short sale is considered gain or loss from the sale or exchange of a capital asset if the property used to close the short sale is a capital asset in the hands of the taxpayer. Where the property sold short is stock, and a dividend is distributed with respect to the stock, the taxpayer is required to pay an amount equal to the value of the distribution to the lender of the stock. The Internal Revenue Service has ruled that this payment in lieu of a dividend is deductible currently against ordinary income.

When a dividend is paid with respect to stock, the stock can be expected to decline in value by an amount that approximates the value of the dividend distribution. Taxpayers can effectively convert ordinary income to capital gain by entering into a short sale of stock just before the ex-dividend date, deducting the dividend-substitute payment against ordinary income, and realizing an offsetting capital gain upon closing the short sale.

When a taxpayer borrows property for use in a short sale, the taxpayer may receive a rebate fee—taxable as ordinary income—with respect to short sale proceeds deposited with the lender as collateral. This rebate fee compensates the taxpayer for the lender's use of the short sale proceeds during the period before the short sale is closed and property is returned.

Investment interest limitation

Section 163(d) limits deductions for interest by an individual or other noncorporate taxpayer on indebtedness to purchase or carry an investment. The deduction for investment interest is limited to the taxpayer's net investment income plus $10,000. Disallowed interest deductions are carried over and may be allowed in future years.

Interest related to tax-exempt income

In general, section 265(2) provides that no deduction is allowed for interest on indebtedness incurred or continued to purchase or carry tax-exempt obligations.

In the case of a securities dealer who borrows money for the purpose of conducting a business that includes the holding of tax-exempt obligations, but whose borrowings cannot be traced to the purchase or continued holding of such obligations, section 265(2) is applied on the basis of an allocation. (See Rev. Proc. 72-18, 1971-1 C.B. 1; and *Leslie v. Commissioner*, 413 F.2d 636 (2d Cir. 1969), *cert. denied*, 396 U.S. 1007 (1970).) The amount of interest allocated to tax-exempt obligations is determined by multiplying the taxpayer's total interest expense by a fraction, the numerator of which is the average adjusted basis of the tax-exempt obligations held during the taxable year and the denominator of which is the average adjusted basis of the total assets held during the year. Interest on debt that is traceable entirely to tax-exempt obligations and interest which is not subject to disallowance under section 265(2) is excluded from this computation. The Internal Revenue Service has ruled that section 265(2) does not apply to disallow interest deductions with respect to indebtedness that is collateralized by tax-exempt securities held for the accounts of customers, and that the securities dealer is required to segregate pursuant to rules promulgated under the Securities and Exchange Act of 1934. Rev. Rul. 74-294, 1974-1 C.B. 71.

House bill

Treatment of short sales of stock

Payments in lieu of dividends are not deductible unless the short sale is held open for at least 16 days (more than one year in the case of payments in lieu of extraordinary dividends). The amount disallowed as a deduction is required to be capitalized (i.e., added to the basis of the stock used to close the short sale).

In determining whether the short sale is held open for the required 16-day (or more-than-one-year) holding period, there is not to be included any period during which the taxpayer holds, has an option to buy, or is under a contractual obligation to buy, substantially identical stock or securities, or there is otherwise a substantial diminution of the taxpayer's risk of loss from the short sale by reason of holding one or more other positions.

Investment interest

For purposes of the restriction on the deductibility of investment interest, the definition of interest is expanded to include any amount allowable as a deduction in connection with personal property used in a short sale.

Interest related to tax-exempt income

For purposes of the provision that disallows interest deductions related to tax-exempt income, the definition of interest is expanded to include any amount paid or incurred in connection with personal property used in a short sale.

The provisions of the House bill are effective for short sales entered into after the date of enactment.

Senate amendment

Treatment of short sales of stock

The Senate amendment is similar to the House bill. In applying the risk reduction rule for purposes of determining whether a short sale is held open for the required period, under regulations, there is not to be included any period during which the taxpayer diminishes the risk of loss from the short sale by reason of holding one or more other positions with respect to substantially similar property.

In addition, except with respect to extraordinary dividends, the Senate amendment permits the deduction of dividend-substitute payments to the extent of ordinary income that is received from the person providing the stock used in the short sale as

Published 1984 Tax Management Inc., a subsidiary of The Bureau of National Affairs, Inc.

compensation for the use of collateral. Earnings on the collateral establish an appropriate measure of the portion of the dividend-substitute payment that represents a current charge for the use of the property sold short, as distinguished from dividends that had accrued economically prior to the short sale.

Interest related to tax-exempt income

The Senate amendment also includes additional rules for the application of the provision extending the rule that disallows interest deductions related to tax-exempt income. First, section 265(2) does not apply to disallow a deduction for short sale expenses incurred by a taxpayer who acts as a conduit in a short sale transaction executed in a customer's account.

Second, the Senate amendment makes clear that section 265(2) applies to amounts paid by the person providing the personal property used in a short sale as compensation for use of collateral with respect to the property (*e.g.*, a rebate fee).

Third, in applying section 265(2) to a taxpayer whose business includes buying and selling tax-exempt obligations, short sale expenses (and the short sale proceeds) are treated separately, in a manner analogous to the treatment accorded broker loans collateralized with customer securities under present law (the situation covered by Rev. Rul. 74-294, 1974-1 C.B. 71), unless the short sale proceeds can be directly traced to the purchase or carrying of tax-exempt obligations. Thus, section 265(2) would not apply to disallow a deduction for short sale expenses incurred in a transaction in which the short seller did not receive the short sale proceeds (*e.g.*, because the funds were deposited as collateral).

Conference agreement

The conference agreement follows the House bill with several modifications.

Treatment of short sales of stock

Under the conference agreement, payments in lieu of dividends are not deductible unless the short sale is held open for at least 46 days (more than one year in the case of payments in lieu of extraordinary dividends). In applying the risk reduction rule for purposes of determining whether a short sale is held open for the required period, under regulations, there is not to be included any period during which the taxpayer diminishes the risk of loss from the short sale by reason of holding one or more other positions with respect to "substantially similar or related property" (as that term is defined for purposes of the holding period requirements for the dividends-received deduction).

The conference agreement clarifies that, in the case of any short sale, the provision relating to short sale expenses applies before section 263(g) (relating to interest and carrying costs in the case of straddles).

Interest related to tax-exempt income

The conference agreement does not include the provision of the Senate amendment relating to brokers who act as conduits in short sales executed for customers. This result occurs under present law without a statutory provision. Thus, the conference agreement contemplates that the provision expanding the scope of section 265(2) to apply to short sale expense will not apply to a broker who acts as a conduit. The conference agreement does not provide for the separate treatment of short sale expenses and short sale proceeds. Under the conference agreement, section 265(2) will not apply to disallow a deduction for short sale expense if the taxpayer (1) deposits cash as collateral for the property used in the short sale, and (2) does not earn a material return on the cash so deposited.

7. Nonrecognition of gain or loss by corporations on options with respect to their stock (warrants)

Present law

Corporations frequently issue for a consideration options to third parties to acquire from it shares of its own stock (warrants). Sometimes those warrants expire unexercised, or lapse. On other occasions, they may be repurchased by the issuing corporation for more or less than they were originally issued for. The tax consequences to the issuing corporation of a lapse of warrants or of a repurchase of warrants it has issued is unclear.

House bill

Under the House bill, a corporation does not recognize gain or loss on any lapse or repurchase of a warrant it issued to acquire from it shares of its own stock.

The provision applies to warrants repurchased or lapsing after the date of enactment.

Senate amendment

The Senate amendment is the same as the House bill.

Conference agreement

The conference agreement follows the House bill and the Senate amendment.

8. Accumulated earnings tax

Present law

An accumulated earnings tax is imposed on corporations that are formed or availed of for the purpose of avoiding the income tax with respect to shareholders by permitting earnings and profits of the corporation to accumulate instead of being distributed. Where applicable, the tax is imposed at a rate of 27½ percent of the first $100,000 of accumulated taxable income for the taxable year and at a rate of 38½ percent on accumulated taxable income in excess of $100,000.

The term "accumulated taxable income" means taxable income, with certain adjustments, reduced by a deduction for dividends paid. In determining accumulated taxable income, a corporation is permitted a deduction for net capital losses during the year in question. A corporation is also permitted a deduction for net capital gains during the year, determined without regard to capital loss carryovers or carrybacks, less certain taxes.

The Internal Revenue Service takes the position that the accumulated earnings tax can be imposed on widely-held corporations, even one not controlled by a few shareholders or groups of shareholders. The issue has not been resolved definitely by the courts.

House bill

Under the House bill, the mere fact that a corporation is widely held does not exempt it from the accumulated earnings tax. This rule applies to operating companies, as well as mere holding or investment companies, regardless of how concentrated the ownership of their stock may be.

Changes are also made in the determination of accumulated taxable income. In general, the deduction from accumulated taxable income for net capital gains, less certain taxes, remains. However, in determining net capital gains for this purpose, net capital losses for any taxable year are treated as short-term capital losses during the next taxable year. The deduction for net capital losses also generally remains. However, that deduction is reduced by any deduction from accumulated taxable income for net capital gains, less certain taxes, for preceding years beginning after the date of enactment. No such net capital gains, less certain taxes, are to be used to reduce the deduction for net capital losses more than once.

Certain different rules apply to mere holding or investment companies. For example, they are allowed no deduction from accumulated taxable income for net capital losses. On the other hand, net capital losses are not to be treated as a carryover in determining accumulated taxable income.

The provision applies to all taxable years beginning after the date of enactment.

Senate amendment

The Senate amendment is the same as House bill.

Conference agreement

The conference agreement generally follows the House bill and the Senate amendment.

The conferees agree with the statement in the Senate committee report to the effect that while a section 531 tax avoidance purpose may be inferred in an appropriate case, as a practical matter it may be difficult to establish such a purpose in the case of a widely-held operating company when no individual or small group of individuals has legal or effective control of the company.

The conference agreement clarifies that, in the case of corporations other than mere holding or investment companies, net capital loss carryovers are to be used only once in determining accumulated taxable income. In addition, mere holding or investment companies are allowed a deduction from accumulated taxable income for net short-term capital gains, but only to the extent of any previously unused capital loss carryovers to the year in question.

9. Repeal of stock for debt exception for purposes of determining income from discharge of indebtedness

Present law

Generally, income from discharge of indebtedness is realized when the taxpayer's debts are satisfied at less than their face amount (sec. 61(a)(12)). However, cases have held that a corporation does not realize income from discharge of indebtedness when its debts are satisfied with its own stock, notwithstanding that the value of the stock is less than the amount of the debt. This stock-for-debt rule is subject to two statutory exceptions (sec. 108(e)(8)).

House bill

The House bill provides that a debtor corporation realizes income from discharge of indebtedness when it satisfies its debt with stock having a fair market value less than the principal of the debt. This rule applies where the principal amount of a corporate debt is discharged, including by reason of the exercise of a conversion right by the holder of the debt. It does not apply where payments are simply deferred. (Section 1032 does not prevent the recognition of this income from the discharge of indebtedness.)

The repeal of the stock-for-debt exception does not apply if the discharge occurs pursuant to a title 11 (bankruptcy) case or to the extent the debtor is insolvent; in these cases, present law continues to apply.

The provision applies to transfers after date of enactment.

Senate amendment

No provision.

Conference agreement

The conference agreement generally follows the House bill, but provides transitional rule exceptions to the general effective date (transfers after the date of enactment) and also makes the provision inapplicable (as of January 1, 1986) to certain "workouts".

Under the first transitional rule, the provision in the bill will not apply to any transfer pursuant to a written binding contract or option (including a convertible debenture) which was in effect at all times on the day of June 7, 1984, and which remains in effect at all times thereafter. Thus, the provision applies to transfers pursuant to contracts or options entered into on or after June 7, 1984, since in such a case, the contract or option will not have been in effect at all times on June 7, 1984. This exception will apply only if the holder of the debt on June 7, 1984, also was the party to the contract or held the option on that date. A transfer pursuant to a written contract must be completed before January 1, 1985. The conversion of debt pursuant to an option or conversion right outstanding at all times on June 7, 1984, and thereafter will be covered by the transitional rule regardless of whether conversion is after 1984. Under the second transitional rule, the provision in the bill will not apply to a transfer of stock before January 1, 1985, to a corporation which owned at least 75 percent of the stock of the debtor corporation on June 7, 1984, and which owns more than 80 percent of the stock of that corporation after the transfer. Finally, a transfer before January 1, 1985, pursuant to a debt restructuring agreement entered into in November, 1983, for which a registration statement was filed with the Securities and Exchange Commission in March, 1984, will not be subject to these new rules.

A stock-for-debt transaction does not give rise to debt discharge income under the "workout" exception if (1) the transfer of stock is made (pursuant to a plan) because of cash flow and credit problems which will cause the debtor corporation difficulty in meeting its liabilities during the next 12 months to such an extent that there is a substantial threat of an involuntary bankruptcy or insolvency proceeding, (2) the corporation notifies its stockholders of this financial difficulty and that it is engaged in a workout, (3) at least 25 percent of the total debt of the corporation is extinguished by transfers of stock pursuant to the plan, and (4) holders of more than 50 percent of the total indebtedness of the debtor corporation outstanding on the date of transfer approve the plan. The workout definition will be satisfied only if it is reasonably related to the objective of avoiding a likely insolvency or bankruptcy proceeding.

The "workout" exception will become effective on the date on which the amendments made to section 382 by the Tax Reform Act of 1976 become effective. Under the bill, this will occur on January 1, 1986. This delayed effective date is adopted to allow the Congress to consider the appropriate treatment of stock-for-debt exchanges in the case of financially troubled corporations while the Congress is reexamining generally the treatment of net operating loss limitations. A stock-for-debt exchange in the case of a financially troubled corporation is a change of ownership event which the Congress may decide is an appropriate occasion for the reduction of net operating losses either under rules of a revised section 382 or by reason of the creation of income from the discharge of indebtedness. It is anticipated that any reconsideration of the exceptions to stock-for-debt rules will include consideration of the rules relating to the use of preferred or limited stock, stock of a parent corporation, and stock of a party to a reorganization, and related technical issues.

10. Affiliated groups

Present law

Includible corporations which are members of an affiliated group of corporations are generally entitled (or required) to file consolidated Federal income tax returns. Section 1504(b) defines the term "includible corporation" to mean any corporation, with several exceptions (e.g., exempt organizations, certain insurance companies, foreign corporations, and regulated investment companies). Certain other tax consequences also depend on whether two corporations are members of the same affiliated group (e.g., the 100-percent dividends received deduction under sec. 243(b)).

Under section 1504, an affiliated group means one or more chains of includible corporations connected through stock ownership with a common parent which is an includible corporation if (1) stock possessing at least 80 percent of the voting power of all classes of stock and at least 80 percent of each class of the nonvoting stock of each includible corporation (except the common parent) is owned directly by one or more other includible corporation, and (2) the common parent owns directly at least 80 percent of the voting power of all classes of stock and at least 80 percent of each class of the nonvoting stock of at least one of the other includible corporations. For purposes of the definition, nonvoting stock which is limited and preferred as to dividends is disregarded, as is certain stock held under tax credit employee stock ownership plans or employee stock ownership plans.

Once the above stock ownership requirements cease to be met with respect to any one corporation, it can no longer be included in the consolidated return of its former affiliated group. However, there are generally no restrictions on its rejoining that group or joining any other group.

House bill

Under the House bill, two includible corporations are not eligible to begin filing a consolidated return with respect to any taxable year unless at the beginning of that year one owns stock possessing at least 80 percent of the voting power of all classes of stock and at least 80 percent of the fair market value of all outstanding stock of the other. For purposes of this definition, certain preferred stock is ignored, as is stock held under certain employee stock ownership plans. A similar rule applies in determining whether another corporation may begin being included in the consolidated return of that group.

Once two corporations are properly included in a valid consolidated return, they will continue being an affiliated group for consolidated return purposes unless one ceases to own stock, determined as above, (1) possessing at least 80 percent of the voting power of all classes of stock, or (2) having more than 50 percent of the fair market value of all outstanding stock, of the other. A similar rule applies in determining whether any other corporation continues to be a member of that group. Once a corporation has ceased being a member of an affiliated group filing consolidated returns, restrictions are imposed on its ability to reconsolidate with that group or to consolidate with certain other groups.

The Treasury is granted broad regulatory authority to carry out the purposes of the provision to prevent abuses.

The provision is effective for taxable years beginning after December 31, 1984. A permanent transition rule is provided for corporations which are members of an affiliated group under present law on March 1, 1984.

Senate amendment

The Senate amendment generally is the same as the House bill. However, stock held under tax credit employee stock ownership plans or other employee stock ownership plans is not ignored. In addition, the Treasury, by regulations, is authorized to provide relief in appropriate cases from the rule requiring ownership by one corporation of at least 80 percent of the fair market value of all outstanding stock of another corporation before the two may commence filing a consolidated return. The Senate amendment also clarifies the rule regarding consolidation or reconsolidation after deconsolidation.

The provision is effective for taxable years beginning after December 31, 1984. However, for taxable years beginning before January 1, 1988, the provision is not applicable to corporations filing a valid consolidated return under present law for the taxable year which includes April 11, 1984.

Conference agreement

The conference agreement follows the Senate provision with several exceptions.

All income tax purposes

Under the conference agreement, the definition of affiliated group is to be applied in determining whether an affiliated group exists for all purposes of subtitle A. The conferees see no reason to have a unique definition of affiliated group for consolidated return purposes. Under the definition, one corporation is not part of an affiliated group with another corporation unless one owns stock (1) possessing at least 80 percent of the total combined voting power, and (2) having a value equal to at least 80 percent of the total fair market value of the stock (disregarding certain preferred stock) of the other. Similar rules apply in determining whether any other corporation is also a member of the group.

No inference regarding present law is intended.

Continuation of status

The conference agreement drops the provision in the House bill and the Senate amendment to the effect that once a consolidated return is validly filed by two corporations, affiliated group status is to be treated as continuing so long as one corporation owns stock (1) possessing at least 80 percent of the total voting power, and (2) having a value equal to more than 50 percent of the total fair market value of the stock (disregarding certain preferred stock) of the other. The conferees believe that such a rule would permit the common parent to dispose of too much of the value of the stock of the other without requiring deconsolidation. As a result, the conference agreement generally treats affiliated group status as continuing only if one corporation continues to own 80 percent of the total voting power and 80 percent of the value of the other. However, nothing in the bill is intended to overturn the position set forth in Rev. Rul. 78-119, 1978-1 C.B. 277 (holding that a corporation which has been a member of a group filing consolidated returns is not deconsolidated merely because its parent has temporarily lost its power to vote such corporation's stock by virtue of a court order issued during the pendency of litigation).

The conferees are also aware that, absent a special rule, the provision would cause affiliated group status to terminate if, merely by reason of changes in relative values of different classes of stock of a corporation, one corporation ceased to own 80 percent in value of the stock of the other corporation. Where the changes in relative value are not large and not intentionally generated, the conferees believe disaffiliation to be inappropriate. Accordingly, under the conference agreement, the Treasury is authorized to prescribe regulations pursuant to which

inadvertent changes in relative values of different classes of stock are to be disregarded in determining whether affiliated group status continues.

Preferred stock

The conference agreement also specifies the kind of stock to be ignored in testing for affiliated group status and the continuation thereof. The stock to be ignored is stock which (1) is not entitled to vote, (2) is limited and preferred as to dividends and does not participate in corporate growth to any significant extent, (3) has redemption and liquidation rights that do not exceed the stock's paid-in capital or par value (except for a reasonable redemption premium), and (4) is not convertible into any other class of stock. Thus, for example, preferred stock carrying a dividend rate materially in excess of a market rate when issued would not be ignored.

Consolidation after deconsolidation

The conference agreement amends the rules of the Senate amendment regarding consolidation after deconsolidation. In general, if a corporation is included in a consolidated return filed by an affiliated group for a taxable year which includes any period after December 31, 1984, and such corporation ceases under the bill to be a member of such group for a taxable year beginning after December 31, 1984, then such corporation (and any successor) may not be included in any consolidated return filed by that group or any other group having the same common parent (or a successor) before the 61st month after the cessation.

The Treasury is authorized to waive the rule prohibiting consolidation after deconsolidation for any period subject to such conditions as the Treasury may prescribe. The rule is an anti-abuse rule, and the conferees expect the Treasury to so apply it. For example, assume that operating corporation A owns all the stock of operating corporation X and that the two file a consolidated return. On July 1, 1986, A merges into unrelated operating corporation B in a transaction qualifying under section 368(a)(1)(A). Assume that the transaction is not a reverse acquisition. Absent other factors, X should be able to join in filing a consolidated return with the group of which B is the common parent for the period beginning July 1, 1986, and regulations should so provide.

Regulations

Regulatory authority is granted to the Treasury to disregard transfers of stock within an affiliated group in determining whether affiliated group status is broken. For example, assume that corporation A owns 100 percent of the only class of stock of corporation B, and corporation B owns 100 percent of the only class of stock of corporation C. It is contemplated that a transfer by A of 30 percent of the stock of B to C will not break the status of A, B, and C as an affiliated group. Furthermore, the authority of the Treasury to prescribe regulations permitting affiliated group status to be treated as commencing or continuing if there was reliance on a good faith but erroneous determination of value is clarified.

The conference agreement contains rules similar to those in the House bill and the Senate amendment authorizing the Treasury to prescribe anti-abuse regulations to carry out the purposes of the provision. For example, the Treasury is authorized to prescribe regulations pursuant to which warrants to acquire stock are to be treated as stock and options to acquire stock are to be treated as having been exercised. Thus, assume that corporation A's common stock is worth $40 a share. Assume further that corporation B, the owner of all of A's common stock, grants corporation C an option to acquire that stock for $20 a share at a date beginning 3 years from the date of the grant. The facts indicate that A and C are likely to be loss corporations but that B is profitable. If it can reasonably be expected that C will exercise the option, the regulations may treat the option as having been exercised, for purposes of the new provision.

The Treasury is also authorized to prescribe regulations under which obligations convertible into stock (and similar interests) are treated as stock and stock (like "puttable" stock) is not treated as stock. Finally, the Treasury, by regulations is authorized to disregard changes in voting power to the extent such changes are disproportionate to related changes in value.

Effective date

Except as noted below, the provision is effective for taxable years beginning after December 31, 1984. The provision does not apply to a corporation validly included in a consolidated return of an affiliated group under present law for the taxable year which includes June 22, 1984, until the taxable year beginning after December 31, 1987. However, if (1) at any time after June 22, 1984, more than a de minimis amount of stock of any such corporation is sold or exchanged (including by redemption), or such corporation issues more than a de minimis amount of stock other than in the ordinary course of its business, and (2) thereafter the bill's provision as to ownership of stock of such corporation is not satisfied (even though before December 31, 1984), then the provision will apply to such corporation for its taxable year beginning after December 31, 1984, or if later, the date such stock is sold, exchanged, or issued, as the case may be. For purposes of this rule, generally stock issued to employee stock ownership plans, stock issued upon the exercise of employee stock options, and similar issuances of stock are to be treated as issuance in the ordinary course of the corporation's business.

For example, assume that Corporation B has only 300 shares of class A common stock and 100 shares of class B common stock outstanding. Shares of each class are identical except that each share of class A common stock has three votes whereas each share of class B common stock has one vote. Corporation A owns all the class A common stock, which represents 90 percent of the voting stock and 75 percent of the value of all the stock of Corporation B, at all times during 1984. A and B file a valid consolidated return for calendar year 1984. On June 30, 1985, A sells 20 shares of the class A common stock of B to a third party. After the sale, A owns 84 percent of B's voting stock and 70 percent of the value of all B's stock. B would be disaffiliated under the provision as a result of the sale.

Special and transitional rules are also provided.

11. Earnings and profits

a. General

Present law

Under present law, distributions by corporations to shareholders are included in income by the shareholders as dividends (and taxed at ordinary income rates) only to the extent such distributions are out of current or accumulated earnings and profits. In general, a corporation's earnings and profits are intended to be a measure of the economic income of the corporation available for distribution to its shareholders. However, in many instances earnings and profits are substantially less than the corporation's economic income.

The effect on the earnings and profits of a corporation of a distribution by the corporation in redemption of shares of its own stock is determined by reference to section 312(e). That section provides that the part of a distribution that is "properly chargeable" to capital account does not reduce earnings and profits. Some cases have held, and the IRS has now ruled, that a corporation's capital account is an amount equal to the par value of its stock plus the amount, if any, of paid-in surplus, and that this amount is reduced in proportion to the amount of the corporation's stock that is redeemed. Under this approach, earnings and profits are reduced by an amount equal to the amount of the distribution over the amount charged against capital account. See, e.g., *Jarvis* v. *Commissioner*, 43 B.T.A. 439, *aff'd*, 123 F.2d 742 (4th Cir. 1941); and Rev. Rul. 79-376, 1979-2 C.B. 133.

House bill

No provision.

Senate amendment

The Senate amendment requires that a number of changes be made in the way in which a corporation's earnings and profits are calculated.

Construction period interest, taxes, and carrying charges

For purposes of computing a corporation's earnings and profits, construction period interest, taxes, and carrying charges are required to be capitalized as a part of the asset to which they relate and written off as is the asset itself. This rule applies to all corporations. Further, it applies with respect to both residential and nonresidential real property, and to personal property.

Construction period interest and taxes include property taxes (real and personal), interest paid or accrued on debt incurred or continued to acquire, construct, or carry property, and other carrying charges, but only to the extent such taxes, interest, and other carrying charges are attributable to the construction period for such property.

This provision is applicable to the effect on earnings and profits of amounts paid or accrued in taxable years beginning after date of enactment.

Intangible drilling costs and mine development costs

Intangible drilling costs allowable as a deduction under section 263(c), and mineral exploration and development costs allowable as a deduction under sections 616(a) or 617, are required to be capitalized for purposes of computing earnings and profits, but only if the expenditures give rise to the creation of an asset having an anticipated economic life of more than one year. Intangible drilling costs capitalized under the provision are to be amortized on a straight-line basis over 5 years. The amortization period for mineral exploration and development expenses is 10 years. No amortization is to occur, however, prior to the date the asset is placed in service.

Unamortized intangible drilling expenses incurred in connection with the drilling of a well (or a group of related wells) are to be deducted in computing earnings and profits when it has been determined that the well (or a group of related wells) is dry. For this purpose, a group of wells is to be considered related if they are drilled from a common drilling rig. Unamortized mineral exploration and development expenses incurred in connection with a mineral property are to be deducted in computing earnings and profits when the property is abandoned.

This provision is applicable to the effect on earnings and profits of amounts paid or accrued in taxable years beginning after the date of enactment.

Certain trademark, trade name, and other expenditures

Amounts amortized under sections 173 (relating to circulation expenditures), 177 (relating to trademark and trade name expenditures), and 248 (relating to organizational expenditures) are to be capitalized and treated as part of the basis of the asset to which they relate. Expenditures made in connection with property having a reasonably determinable useful life are to be recovered for earnings and profits purposes over such useful life. Under the Senate amendment, there is no amortization for expenditures made in connection with property which does not have a reasonably determinable limited useful life.

This provision is applicable to the effect on earnings and profits of amounts paid or accrued in taxable years beginning after the date of enactment.

Certain distributions of appreciated property

In the case of a distribution of appreciated property by a corporation to a shareholder with respect to stock, earnings and profits of the distributing corporation are to be increased by the amount of gain on the distributed property that is realized by the distributing corporation on the distribution whether or not such gain is recognized. The provision does not apply to certain distributions.

With certain exceptions, the provision is applicable to the effect on earnings and profits of distributions after the date of enactment.

Changes in LIFO reserves

A corporation's earnings and profits are to be increased by the amount of any increase in the corporation's LIFO reserve for a taxable year. In addition, earnings and profits are to be decreased by the amount of any decrease in the corporation's LIFO reserve for a taxable year. However, decreases in reserve amounts below the LIFO reserve as of the beginning of the taxable year beginning after the date of enactment will not, except as provided by regulations, reduce earnings and profits. For purposes of this provision, the term "LIFO reserve" has the same meaning as that given to the term "LIFO recapture amount" under section 336.

The provision is applicable to the effect on earnings and profits of changes in reserve amounts in taxable years beginning after the date of enactment.

Deferred gain from installment sales

A corporation's earnings and profits for a year in which the corporation sells property on the installment basis are to be increased by the amount of any deferred gain on the installment sale. This is accomplished by treating all principal payments as having been received in the year of the sale.

The provision is applicable to the effect on earnings and profits of sales occurring after March 15, 1984, other than sales pursuant to binding contracts entered into on or prior to such date.

Completed contract method of accounting

A corporation that accounts for income and expenses attributable to a long-term contract on the completed contract method of accounting generally recognizes income and expense in the year in which the contract is completed. Under the Senate amendment, a corporation that accounts for income and expense on this method is required to compute earnings and profits as if it were accounting for income and expense attributable to long-term contracts on a percentage of completion basis.

This provision is applicable to the effect on earnings and profits of contracts entered into after March 15, 1984, other than contracts entered into pursuant to binding contracts entered into on or prior to such date.

ACRS deductions for real property

The amount by which a corporation's earnings and profits are reduced for ACRS deductions with respect to 15-year and 20-year real property is the amount of the deduction that would be allowable if the straight-line method of depreciation had been used and the property had a 40 year recovery period.

This provision is applicable to the effect on earnings and profits of property placed in service in taxable years beginning after the date of enactment.

Redemptions

In the case of a distribution by a corporation in redemption of its own stock, earnings and profits are to be reduced in proportion to the amount of the corporation's outstanding stock that is redeemed. However, the Senate does not intend that earnings and profits be reduced by more than the amount of the redemption.

This provision is applicable with respect to the effect on earnings and profits of distributions in taxable years beginning after the date of enactment.

Conference agreement

The conference agreement generally follows the Senate amendment with several modifications.

Construction period carrying charges

The conference agreement is generally the same as the Senate amendment, with several technical clarifications.

The provision is effective for amounts paid or incurred in taxable years beginning after September 30, 1984.

Intangible drilling costs and mineral exploration and development costs

The conference agreement clarifies the Senate amendment by providing that for purposes of computing a corporation's earnings and profits intangible drilling costs are capitalized and allowed as a deduction ratably over a 60-month period beginning with the month in which the production from the well begins. Also, the conference agreement makes it clear that for this purpose mineral exploration and development costs are capitalized and deducted ratably over a 120-month period beginning with the later of (1) the month in which the production from the deposit begins, or (2) the month in which the amount is paid or accrued.

The provision is generally effective for amounts paid or incurred in taxable years beginning after September 30, 1984.

Certain trademark, trade name, and other expenditures

The conference agreement generally follows the Senate amendment.

The provision is effective for amounts paid or incurred in taxable years beginning after September 30, 1984.

Certain distributions of appreciated property

The conference agreement generally follows the Senate amendment. Certain exceptions to the rule are provided.

The provision is generally effective for distributions after September 30, 1984.

LIFO inventory adjustments

The conference agreement generally follows the Senate amendment with certain technical and clarifying modifications.

In general, earnings and profits shall be increased or decreased by the amount of any increase or decrease in the LIFO recapture amount. The conferees wish to clarify that this provision is designed to eliminate the impact of LIFO on earnings and profits. Thus, under present law, if a corporation's LIFO reserve increases by $10, taxable income and earnings and profits are lower than they would have been had LIFO not been used. Under the new rules, $10 would be added back to earnings and profits.

An exception is to be provided, under regulations, for decreases below the amount of the reserve as of the close of the taxable year of the taxpayer preceding the first taxable year to which the provision applies. Since the cumulative effect of the LIFO reserve has been to keep earnings and profits lower than they otherwise would have been, it is contemplated that the regulations will provide that in the event of a reduction in the LIFO reserve below its level as of the close of such taxable year (the pre-enactment reserve), earnings and profits will be increased as under present law without any offsetting reduction under the new rules. However, because a reduction in the reserve below the pre-enactment reserve results in an increase in taxable income and earnings and profits, any subsequent restoration of the reserve up to the level of the pre-enactment reserve should result in an adjustment under the new rules.

The following example is illustrative.

Assume that a calendar year taxpayer has a LIFO reserve of $100 at the end of 1984. Assume further that the reserve decreases to $95 at the end of 1985 and increases to $105 at the end of 1986. Finally, assume that the reserve decreases to $90 at the end of 1987. The change in the reserve for 1985 results in an increase in taxable income and earnings and profits under present law, with no offsetting adjustment under the new rules. Under present law, the increase in the reserve in 1986 would reduce taxable income and earnings and profits. This reduction is offset by a $10 adjustment to earnings and profits under the new rules.

The $15 reduction in the reserve for 1987 increases taxable income and related earnings and profits by $15. This increase is offset, in part, by a $10 reduction in earnings and profits under the new rules.

The adjustment for 1987 is $10 and not $15 because the provision does not require an adjustment to offset the inclusion in earnings and profits of reserve amounts not previously included in earnings and profits. By the end of 1986, $10 (not $15) of the $100 pre-enactment reserve had been taken into account in determining earnings and profits.

The provision applies to taxable years beginning after September 30, 1984.

Installment sales

The conference agreement generally follows the Senate amendment. The conference agreement makes it clear that a corporation's earnings and profits are computed as if the corporation did not use the installment method to account for the installment sale. Thus, for purposes of computing a corporation's earnings and profits, all principal payments, as determined under general Code principles, are treated as received in the year of the sale. This provision applies to all installment sales, including installment sales of inventory.

The provision applies to sales after September 30, 1984.

Completed contract method of accounting

The conference agreement is generally the same as the Senate amendment except that it applies to contracts entered into after September 30, 1984.

ACRS deductions for real property

The conference agreement is generally the same as the Senate amendment except that the provision applies to property

placed in service in taxable years beginning after September 30, 1984.

Redemptions

The conference agreement is generally the same as the Senate amendment.

The conferees wish to clarify that when a corporation has more than one class of stock, its earnings and profits generally should be allocated among the different classes in determining the amount by which a redemption of all or a part of one class of stock reduces the earnings and profits account. However, no earnings and profits generally should be allocable to preferred stock which is not convertible or participating to any significant extent in corporate growth. Therefore, a redemption of such preferred stock should result in a reduction of the capital account only, unless the distribution includes dividend arrearages, which will reduce earnings and profits.

Similarly, priorities legally required as between different classes of stock may be taken into account in allocating earnings and profits between classes. For example, assume that corporation X has 1,000 shares of class A common stock and 1,000 shares of class B common stock. Both classes are $10 par value stock and were issued at the same time at a price of $20. The class A common has a preference as to dividend and liquidating distributions in a 2:1 ratio to the class B common, and only the class B common has voting rights. Assume further that Corporation X holds net assets worth $210,000 and has current and accumulated earnings and profits of $120,000. If X distributes $140,000 in cash in redemption of all of the class A common, earnings and profits should be reduced by $80,000 and the capital account by $60,000.

Special rule for foreign corporations

The amendments made by the conference agreement may affect the earnings and profits of foreign corporations as well as domestic corporations. Application of these amendments to foreign corporations could have an impact on U.S. persons in at least three situations.

First, under section 951, a U.S. person owning 10 percent or more of the stock of a controlled foreign corporation must include in gross income a pro rata share of the corporation's subpart F income for the shareholder's year in which or with which the corporation's taxable year ends. Subpart F income is limited to the earnings and profits, computed according to U.S. tax concepts, of the controlled foreign corporation. Thus, to the extent the conference agreement may require that the earnings and profits of a controlled foreign corporation be computed, for example, by capitalizing and amortizing rather than deducting an item, it could result in an increase in a U.S. shareholder's income.

Second, under section 902, a domestic corporation which owns at least 10 percent of the voting stock of a foreign corporation from which it receives dividends is deemed to have paid a proportionate share of any income taxes paid or deemed paid by such corporation to any foreign country or to any possession of the United States on the "accumulated profits" of such foreign corporation from which the dividends were paid. The so-called "deemed paid" credit to which a qualifying U.S. shareholder is entitled equals the foreign taxes paid by the foreign corporation multiplied by the ratio of the dividends to the foreign corporation's accumulated profits. For this purpose, accumulated profits are essentially equivalent to earnings and profits. Because the conference agreement could have the effect of changing the ratio of dividends to accumulated profits, it could change the section 902 deemed paid credit of the corporation's U.S. shareholders.

Third, section 1248 generally treats certain domestic corporations as recognizing dividend income on the sale or exchange, or other disposition, of the stock of certain foreign corporations. That dividend income is measured by certain earnings and profits of the foreign corporation.

Although the conference agreement extends the changes in the earnings and profits provisions to foreign corporations, as well as domestic corporations, the application of the amendments pertaining to LIFO inventory adjustments, installment sales, and the use of the completed contract method of accounting is delayed for certain foreign corporations until taxable years beginning after December 31, 1985. This special effective date applies to foreign corporations deriving less than 20 percent of their gross income from sources within the United States. It is anticipated that this delayed effective date will provide both the Treasury and affected foreign corporations and their shareholders opportunity to consider how those provisions should apply to such foreign corporations.

Distributions to 20-percent corporate shareholders

Under the proposed new earnings and profits rules, a corporation's earnings and profits can exceed its taxable income if its income is deferred for purposes of determining gross income but not for purposes of computing earnings and profits. The conferees are concerned that, without a special rule, if a corporation with earnings and profits in excess of taxable income makes a distribution to a corporate shareholder and the distribution is treated as a dividend qualifying for a dividends received deduction, it may be possible for earnings to be distributed to the corporate shareholder without ever being subject to tax in the hands of the corporate shareholder.

For example, assume that P Corporation owns 100 percent of the stock of X Corporation, that P's basis in such stock is $200, that P and X file separate income tax returns, and that X has no current or accumulated earnings and profits. Assume further that X sells an asset for a $1,000 installment note, realizing an $800 gain. Finally, assume that X borrows $500 secured by the installment note and distributes the $500 to P. In such event, under the provision, absent a special rule, P would include the $500 distribution in income but would likely qualify for a 100-percent dividends received deduction. If P later sells its X stock for $200 (the value of that stock if it is assumed that X will ultimately have a $300 tax liability, in present value terms, on account of the installment sale), it would not recognize gain or loss on the sale. As a result, P would have realized an overall profit of $500.

Under the conference agreement, except as regulations may otherwise provide, the taxable income of a corporate shareholder with a 20-percent or greater interest in the distributing corporation, and such shareholder's basis in the stock of the distributing corporation, are determined as if section 312(n) (as added by the bill) did not apply to the distributing corporation. As a result, in the above example, $200 of the distribution by X to P would be a return of capital, and $300 would be taxed to P under section 301(c)(3). P's basis in the X stock would be reduced to zero, and P would recognize a $200 gain on the sale of the stock. This special rule does not affect the computation of resulting earnings and profits of either the distributing corporation or the corporate shareholder. Thus, for purposes of computing earnings and profits of X and P, $500 of earnings and profits would be treated as having been transferred from X to P. Furthermore, the special rule applies only if the corporate shareholder would, but for the special 20-percent corporate shareholder rule, be entitled to a dividends received deduction with respect to the distribution involved.

Under the rule, a 20-percent corporate shareholder is any corporation owning, directly or indirectly, stock possessing at least 20 percent of the total combined voting power of all classes of stock entitled to vote or at least 20 percent of the total value of all classes of stock (excluding certain preferred stock) of the distributing corporation. Attribution rules apply for purposes of determining stock ownership.

This rule applies to distributions after the date of enactment.

b. Distributions by a corporation of discount obligations

Present law

A corporation may distribute as a dividend its own discount obligations to its shareholders. Only the fair market value of the obligations is includible in the gross income of such shareholders. However, some taxpayers have taken the position that the corporation's earnings and profits are reduced by the entire principal amount of such obligations (sec. 312(a)(2)).

It is unclear whether the original issue discount rules apply to such a discount obligation upon its distribution.

House bill

In the case of a dividend distribution by a corporation of its own discount obligation, the corporation's earnings and profits are reduced only by the issue price of the obligation at the time of the distribution. The issue price is to be determined under the original issue discount rules. Furthermore, the original issue discount rules apply to the holder and the issuer of the obligation upon its distribution.

The provision is effective for distributions after the date of enactment.

Senate amendment

The Senate amendment is the same as the House bill except that it applies to distributions declared after March 15, 1984.

Conference agreement

The conference agreement follows the Senate amendment.

12. Net operating loss, etc. carryover rules

Present law

The Tax Reform Act of 1976 substantially revised sections 382 and 383, which relate to the carryover of corporate net operating losses and other corporate tax attributes following acquisitions, including reorganizations. The 1976 Act revisions relating to acquisitions other than reorganizations are generally effective with respect to taxable years beginning after June 30, 1984. Those relating to reorganizations are effective with respect to a reorganization pursuant to a plan of reorganization adopted on or after January 1, 1984. The 1976 Act revisions are not explicitly made applicable to "G" reorganizations (relating to reorganizations of corporations in a title 11 or similar case).

House bill

The 1976 Act revisions relating to acquisitions other than reorganizations are generally effective for taxable years beginning after October 31, 1984. Those relating to reorganizations are effective only with respect to a reorganization pursuant to a plan adopted on or after November 1, 1984.

Senate amendment

The 1976 amendments relating to acquisitions other than reorganizations are generally effective for taxable years beginning after December 31, 1985. Those relating to reorganizations are effective only with respect to a reorganization pursuant to a plan of reorganization adopted on or after January 1, 1986.

Conference agreement

The conference agreement generally follows the Senate amendment. Thus, for example, the revisions of the 1976 Act are not applicable to any reorganization pursuant to a plan of reorganization not adopted on or after January 1, 1986. In addition, the 1976 Act revisions, insofar as they relate to reorganizations, are amended to clarify that, when they become effective, they will apply to "G" reorganizations. This latter amendment is effective as if included in the amendments made by section 4 of the Bankruptcy Tax Act of 1980.

13. Distribution requirement in the case of a "C" reorganization

Present law

A "C" reorganization, as defined by section 368(a)(1)(C), is an acquisition by one corporation (the "acquiring corporation") of substantially all of the properties of another corporation (the "transferor corporation") in exchange solely for voting stock of the acquiring corporation or its parent corporation, or in exchange for such voting stock and a limited amount of money or other property. In determining whether an exchange is solely for voting stock, the assumption by the acquiring corporation of a liability of the transferor corporation, or the fact that the property acquired is subject to a liability, generally is disregarded.

A transaction can qualify as a C reorganization even if the transferor corporation does not distribute to its shareholders the consideration received from the acquiring corporation or assets not transferred by it to the acquiring corporation. Furthermore, the Service has ruled that a transaction can qualify as a C reorganization where the transferor corporation distributes a 25-percent stock interest in the acquiring corporation but retains liquid assets which it intends to use to engage in an active trade or business. (Rev. Rul. 73-552, 1973-2 C.B. 116.)

Under present law, the acquiring corporation in a C reorganization succeeds to, and takes into account, the tax attributes of the transferor corporation described in section 381, subject to limitations contained in that section and section 382. For example, the acquiring corporation generally succeeds to the earnings and profits of the transferor corporation.

Any distribution pursuant to the plan of reorganization by the transferor corporation to its shareholders in exchange for their stock in the transferor corporation is subject to section 354 (or so much of section 356 as it relates to section 354). Thus, no gain or loss is recognized to the shareholders of the transferor corporation on the receipt of qualifying consideration. Gain may be recognized under section 356, however, on the receipt of other property, but not in an amount in excess of the sum of any money and the fair market value of any other property received. If the receipt of such property has the effect of a distribution of a dividend to a shareholder, the shareholder is treated as receiving dividend income in an amount equal to the amount of the gain realized on the exchange but not in excess of the shareholder's ratable share of undistributed earnings and profits of the corporation. The principles of section 302 are applicable in testing for dividend equivalency under section 356. Any gain recognized which is not treated as dividend income is treated as gain from the sale or exchange of property.

For purposes of determining the extent to which a shareholder is to be treated as having received a dividend, the relevant earnings and profits are the accumulated earnings and profits of the transferor corporation. For this purpose, the exchange is generally deemed to occur prior to the time the transferor corporation's earnings and profits are inherited by the acquiring corporation under section 381. Furthermore, the earnings and profits of the transferor corporation inherited by the acquiring corporation under section 381 are reduced by amounts treated as a dividend under section 356.

House bill

No provision.

Senate amendment

Under the Senate amendment, a transaction can qualify as a C reorganization only if the transferor corporation distributes all of its assets (less those retained to meet claims), including consideration received from the acquiring corporation and any retained assets, within 12 months of the acquisition. Authority is provided for the Secretary to prescribe regulations providing exceptions to the distribution requirement.

The Secretary is also directed to prescribe regulations under section 312 providing for the allocation of earnings and profits between the acquiring corporation and the transferor corporation in situations in which, prior to the transaction, 80 percent or more of the stock of the transferor corporation was held by one corporate shareholder and in any other situation described in regulations.

The provision is applicable to transactions pursuant to a plan adopted after the date of enactment.

Conference agreement

The conference agreement generally follows the Senate amendment. However, under the conference agreement, the required distribution must be pursuant to the plan of reorganization rather than within a 12-month period beginning on the date of the acquisition. In addition, the conference agreement makes technical modifications to the Senate amendment.

The provision contained in the Senate amendment that provides that the Secretary may be regulations waive the application of the distribution requirement, subject to any conditions imposed in the regulations, is also retained under the conference agreement. The report of the Senate committee, which the conferees endorse, states that the Senate anticipated that waivers may be granted if a distribution would result in substantial hardship. The conferees also wish to make it clear that as a general rule a waiver is to be granted only on the condition that the transferor corporation and its shareholders be treated as if the retained assests are distributed and then contributed to the capital of a new corporation.

The conference agreement expands a provision contained in the Senate amendment by providing the Secretary with authority to issue regulations allocating the earnings and profits of the transferor corporation between or among such corporation, any corporation in control of the transferor corporation immediately before the reorganization, and the acquiring corporation in the case of a C reorganization. Such authority is extended to D reorganizations as well. The conferees anticipate that under those regulations, generally the consequences of an "A" reorganization (e.g., a merger) preceded by a distribution, on the one hand, and a C (or non-divisive D) reorganization followed by a distribution, on the other hand, will be consistent. In this regard, the Treasury might reconsider its regulations relating to allocations of earnings and profits in transactions under section 355.

The conferees wish to clarify that the provision applies to transactions pursuant to a plan adopted after the date of enactment by any corporation which would be a party to the reorganization if the transaction qualifies as a reorganization.

14. Control requirement in a "D" reorganization

Present law

"D" reorganizations

Under section 368(a)(1)(D), a transfer by a corporation of all or a part of its assets to a corporation controlled immediately after the transfer by the transferor or one or more of its shareholders is generally treated as a "D" reorganization if, among other things, stock or securities of the controlled corporation are distributed in a transaction qualifying under sections 354, 355, or 356. For the transaction to qualify under section 354 (or so much of section 356 as relates to section 354), the acquiring corporation must acquire substantially all the assets of the transferor corporation (a non-divisive D reorganization). For purposes of determining whether a transaction qualifies as a D reorganization, the term "control" is defined in section 368(c) as the ownership of stock possessing at least 80 percent of the total combined voting power of all classes of stock entitled to vote and at least 80 percent of the total number of shares of all other classes of stock of the corporation. No attribution rules are explicitly made applicable.

Liquidation and contribution to a related corporation

In general, under section 331, amounts distributed to a shareholder in complete liquidation of a corporation are treated as in full payment in exchange for the shareholder's stock. If the stock is a capital asset in the hands of the shareholder, a complete liquidation will result in capital gain or loss. The shareholder's basis in the property received in a taxable liquidation is the fair market value of the property at the time of the distribution. With several exceptions, no gain or loss is recognized to the distributing corporation on a distribution in complete liquidation of such corporation or a liquidating sale by the corporation.

Under section 351, generally no gain or loss is recognized if property is transferred to a corporation by one or more persons solely in exchange for stock or securities in such corporation and, immediately after the exchange, such person or persons are in control of the corporation. As a general rule, a transferor takes a substitute basis in stock or securities received in the exchange. The corporation's basis in property received from the transferor is generally determined with reference to the basis of such property in the transferor's hands.

House bill

No provision.

Senate amendment

Under the Senate amendment, for purposes of determining whether a non-divisive transaction qualifies as a D reorganization, "control" is defined as ownership of stock possessing at least 50 percent of the total combined voting power of all classes of stock entitled to vote and at least 50 percent of the total number of shares of all other classes of stock of the corporation. Further, the constructive ownership of stock rules

Published 1984 Tax Management Inc., a subsidiary of The Bureau of National Affairs, Inc.

contained in section 318(a), as modified, are applicable for purposes of determining whether the transferor corporation or its shareholders are in control of the acquiring corporation. The provision is applicable to transactions pursuant to a plan adopted after the date of enactment.

Conference agreement

The conference agreement generally follows the Senate amendment in that under the conference agreement the general definition of "control" contained in section 368(c) does not apply for purposes of determining whether a non-divisive transaction qualifies as a D reorganization. However, the definition substituted for the section 368(c) definition by the Senate amendment is modified under the conference agreement.

Under the conference agreement, control means the ownership, directly or indirectly, of stock possessing at least 50 percent of the total combined voting power of all classes of stock entitled to vote, or at least 50 percent of the total value of all shares of all classes of stock. The conferees believe that by taking value into account this definition increases the utility to the Internal Revenue Service of the D reorganization provisions as a means of preventing taxpayers from bailing out earnings and profits at capital gains rates in liquidation-reincorporation transactions.

In addition, the conferees wish to clarify that they do not intend that recharacterization as a D reorganization under this provision be the exclusive means for the Service to challenge liquidation-reincorporation and similar transactions. For example, it is not intended that this provision supercede or otherwise replace the various doctrines that have been developed by the Service and the courts to deal with such transactions. See, e.g., Rev. Rul. 61-156, 1961-2 C.B. 62; *Telephone Answering Service Co.* v. *Commissioner*, 62 T.C. 423 (1974), *aff'd.*, 546 F.2d 423 (4th Cir. 1976), *cert. denied*, 431 U.S. 914 (1977); and *J.E. Smothers* v. *U.S.*, 642 F.2d 894 (5th Cir. 1981).

The conferees wish to clarify that the provision applies to transactions pursuant to a plan adopted after the date of enactment by any corporation which would be a party to the reorganization if the transaction qualifies as a reorganization.

15. Collapsible corporations

Present law

The collapsible corporation rules are designed to prevent the use of a corporation to convert what would be ordinary income in the hands of a shareholder to capital gain. A shareholder's gain on the sale or exchange of stock in a collapsible corporation is generally required to be reported as ordinary income. However, the collapsible corporation rules are inapplicable if the collapsible corporation realizes a "substantial part" of the income to be derived from its collapsible assets. In *Commissioner* v. *Kelley*, 293 F.2d 904 (5th Cir. 1961), the court held that the "substantial part" test is satisfied if the corporation has realized one-third of the income to be derived from its collapsible assets.

Under a second exception, the collapsible corporation rules are inapplicable if 70 percent or less of a shareholder's gain on the disposition of his stock in the corporation is attributable to the collapsible assets (the "70/30" rule).

House bill

The House bill provides that the "substantial part" test requires the realization of at least two-thirds of the income from collapsible assets. In addition, the Secretary is authorized to promulgate regulations to make conforming changes to the 70/30 rule, treating all property described in section 1221(a) as one item of property.

The provision is effective for sales and exchanges made after the date of enactment.

Senate amendment

The Senate amendment is generally the same as the House bill except that the provision is applicable to sales and exchanges made after December 31, 1984. Under a transition rule, the provisions of the bill are inapplicable if, prior to January 1, 1985, a corporation realized a "substantial part" of the income to be derived from any property.

Conference agreement

The conference agreement follows the House bill.

16. Phaseout of graduated rates for large corporations

Present law

Present law provides graduated corporate rates on the first $100,000 of taxable income. These rates provide a maximum tax reduction of $20,250 in tax below the tax which would be imposed if the tax rate on that income were 46 percent.

House bill

No provision.

Senate amendment

The Senate amendment phases out the benefits of the graduated rates on corporations with taxable income in excess of $1 million, by imposing an additional 5 percent tax on the first $400,000 of taxable income over $1 million. This recaptures $20,000 of the graduated rate benefits for corporations with taxable income in excess of $1.4 million.

The provision applies to taxable years beginning after December 31, 1983. (Under Code section 21, the provision will apply on a pro-rata basis to 1983-1984 fiscal years.)

Conference agreement

The conference agreement generally follows the Senate amendment. However, the full $20,250 of tax benefit from the graduated rates is recaptured. Also, the conference agreement provides that this provision will not apply to any 1983-1984 fiscal years. Thus, the provision applies only to taxable years beginning after December 31, 1984.

17. Golden parachute contracts

Present law

A corporation is allowed a deduction for all the ordinary and necessary expenses paid or incurred during the taxable year in carrying on a trade or business. Reasonable allowances for salaries or other compensation for personal services actually rendered generally qualify as ordinary and necessary trade or business expenses.

House bill

No provision.

Senate amendment

Under the Senate amendment, all payments under a "golden parachute" contract are presumed to be excessive. The presumption is rebuttable, but only by a showing that the payments are a reasonable allowance for salaries or other compensation for personal services actually rendered. It may not be rebutted by a showing that the payments otherwise qualify as an ordinary and necessary trade or business expense.

If any payments under a golden parachute contract are excessive, none of the payments under that contract are deductible, and a nondeductible excise tax of 20 percent is imposed on the recipient with respect to all of the payments.

A golden parachute contract generally is any contract entered into by a corporation with any officer, shareholder, or highly-compensated individual (including any independent contractor) providing, at the time of execution, for contingent payments of cash (or property) which are to be made in the event of a change (or threatened change) in ownership or control of the corporation (or of a significant portion of its assets). Furthermore, the present value of the payments (determined as of the time the contingency occurs) must exceed 200 percent of the highest compensation income of the individual from the corporation includible in his gross income during any of the five taxable years ending with the taxable year preceding the taxable year in which the contract is executed. Present value is determined under section 1274, as added by the bill.

Payments under golden parachute contracts, like any termination pay, are subject to FICA taxes when paid.

To the extent provided by regulations, any contract which the Securities and Exchange Commission classifies as unreasonable in situations involving a threatened takeover will also constitute a golden parachute contract.

The provision is applicable to payments under contracts entered into after March 15, 1984.

Conference agreement

General rule

Under the conference agreement, no deduction is allowed for "excess parachute payments" paid or accrued. Furthermore, a nondeductible 20 percent excise tax is imposed on the recipient of any excess parachute payments.

Parachute payment

A "parachute payment" is any payment in the nature of compensation to (or for the benefit of) a "disqualified individual" if such payment is contingent on a change in the ownership or effective control of a corporation, or in the ownership of a substantial portion of its assets, if the aggregate present value of all such payments made or to be made to (or for the benefit of) the disqualified individual equals or exceeds three times the "base amount". The "base amount" is the average annualized compensation income (including, for example, ordinary income with respect to stock options) from the corporation includible in the disqualified individual's gross income over the five-taxable-year period (or if the individual did not perform services throughout such five-taxable year period for such corporation, the portion of such period during which the individual did perform services for the corporation) preceding the taxable year in which the change of ownership or control occurs.

A "disqualified individual" means any individual who is an employee, independent contractor, or other person specified in regulations who performs personal services for the corporation and who is an officer, shareholder, or highly-compensated individual of such corporation. Personal service corporations and similar entities are treated as individuals for this purpose. Thus, for example, if an individual performs services for a corporation through a personal service corporation, parachute payments to the personal service corporation are treated as made to the individual. Similarly, any office held by the individual is treated as held by his personal service corporation.

To be a parachute payment, the payment must be contingent on a change in ownership or effective control. In general a payment is to be treated as contingent on a change of ownership or control under the provision if such payment would not in fact have been made to the disqualified individ-

ual had no change in ownership or control occurred. Furthermore, a payment is to be treated as contingent on a change of ownership or control if the change determines the time such payment in fact is to be made. Finally, a payment may be a parachute payment even if the employment of the individual involved is not voluntarily or involuntarily terminated.

The following examples illustrate the "contingent on a change in ownership or control" concept.

Example (1).—Assume that a contract provides for payments to a disqualified individual if control of the corporate employer changes. Assume that control does change and payments under the contract are made. The payments are contingent on the change in control, even if the individual continues in the employ of the corporation.

Example (2).—Assume that a contract provides for payments to a disqualified individual contingent upon termination of his employment. A change of control occurs, and thereafter, as a result of the change, the employment of the individual is terminated. Payments under the contract are to be treated as contingent on the change in control.

Example (3).—Assume that a contract provides for the acceleration of vesting or a payment of any deferred incentive compensation, for the acceleration of the time for the exercise of stock options, or for payments in cancellation of stock options, contingent on a change in control. Payments resulting from such a contract are treated as contingent on a change in control.

Parachute payment presumption

Under the conference agreement, payments under a contract entered into (or amended in significant relevant respect) within one year before a change in ownership or control are presumed contingent on such a change, even if such payments are not contingent on a change in ownership or control, unless the contrary is established by clear and convincing evidence.

Property transfers

Under the conference agreement, transfers of property (e.g., stock options) are treated as payments for purposes of the provision. Any such property is taken into account at its fair market value, and all such property is to be valued for purposes of the provisions. Under the conference agreement, present values are determined in accordance with the principles of section 1274(b)(2), as added by the bill.

Change in ownership or control

Whether a particular transaction involves a change in the ownership or effective control of a corporation or in the ownership of a substantial portion of its assets is to be determined under all the facts and circumstances.

Excess parachute payments

"Excess parachute payments" are any parachute payments in excess of the base amount which are not reasonable compensation for personal services actually rendered by the disqualified individual. Under the conference agreement, it is presumed that no parachute payment is reasonable compensation for personal services actually rendered. Such presumption may be rebutted, but only by clear and convincing evidence. To the extent that the presumption is rebutted, the provision does not apply. To the extent the taxpayer establishes the amount that is reasonable compensation for services actually rendered, it is first applied against the base amount. The conferees do not intend that services adequately compensated for by payments that are not parachute payments be taken into account in determining whether parachute payments are payments of reasonable compensation.

For example, assume that the disqualified individual's base amount is $100,000. Assume further that a payment totalling $400,000, which is contingent on a change in control, is made on the date of the change. Under the provision, parachute payments total $400,000, and the provision applies because $400,000 exceeds $300,000 (three times the base amount). Excess parachute payments total as much as $300,000 ($400,000 less $100,000, the base amount). Assume that the taxpayer establishes by clear and convincing evidence that reasonable compensation for services compensated for by the parachute payments totals $150,000. Under the conference agreement, excess parachute payments equal $250,000 ($300,000 less ($150,000 less $100,000)).

If, in the above example, parachute payments totalled only $290,000, the provision would not apply. In that case, the parachute payments would not equal or exceed three times the base amount.

Reasonable compensation

The conferees believe that in most large corporations, executives are not under-compensated. As a result, the conferees contemplate that only in rare cases, if any, will any portion of a parachute payment be treated as reasonable compensation in response to an argument that the executive was under-compensated in earlier years. On the other hand, payments of compensation previously earned which are in fact made by reason of a change in ownership or control are generally to be treated as reasonable compensation under the provision. For example, payments under the following agreements are generally to be treated as reasonable compensation under the provision if such payments would have been made in the future in any event, even though the timing of such payments is in fact be triggered by a change in control: (1) payments in cancellation of a normal stock option, or normal stock appreciation right, granted more than one year before the change; (2) exercises after termination of stock options or stock appreciation rights issued as part of a normal compensation package granted more than one year before the change; (3) compensation previously earned and deferred pursuant to a plan of the employer, such as a staggered bonus plan, or at the election of the employee; and (4) amounts paid under a retirement plan that supplements a tax-qualified plan to the extent such amounts are designed to compensate a newly-hired key employee for the loss of retirement benefits attributable to services performed for a prior employer.

Violation of securities laws or regulations

Under the conference agreement, the term "parachute payment" also includes any payments under a contract similar to a contract providing for parachute payments which violates securities law or regulations. However, the rules relating to reasonable compensation are not applicable in determining how much of such parachute payments are excessive.

Withholding

Rules regarding withholding taxes and FICA taxes are also provided.

Application

The provision is to be applied on a pro rata basis with respect to each excess parachute payment paid or accrued by the corporation or received by the disqualified individual in excess of the portion of the base amount allocated to such payment. The conferees intend that any reasonable compensation in excess of the base amount be allocated to the first parachute payments made.

Other

The conference agreement authorizes the Treasury to prescribe regulations necessary to carry out the purposes of the provision (including regulations for the application of the provision in the case of related corporations and personal service corporations). Those regulations are to prescribe rules for the case in which the disqualified individual commences working for the corporation in the year the change in ownership or control occurs.

No inference is intended as to the deductibility under present law of amounts paid or accrued under so-called golden parachute agreements. Nor is any inference intended as to the deductibility of any parachute payments which are not excess parachute payments under the provision.

Effective date

The conference agreement is effective for payments made under contracts entered into or renewed after June 14, 1984. For this purpose, a contract cancellable at will by either party is to be treated as a new contract entered into on the date any such cancellation, if made, would be effective. Payments under agreements in effect on June 14, 1984, are not affected by the provision unless the terms of such agreements are amended in significant relevant respect after that date. The conferees intend that an agreement will be treated as so amended if it is amended (or supplemented) either to add or modify a change in ownership or control trigger (or similar trigger), to increase amounts payable (or, where payment is under a formula, to modify the formula) in the event of such a trigger, or to accelerate the payment of amounts otherwise payable at a later date in the event of such a trigger. Where a golden parachute agreement in effect on June 14, 1984, is so amended or supplemented after that date, all amounts payable under the contract (and any supplement) are subject to the provision.

18. Increase in reduction of certain corporate tax preference items from 15 percent to 20 percent

Present law

TEFRA reduced certain corporate tax preferences by 15 percent. These preferences include real estate, capital gains, percentage depletion for coal and iron ore, bad debt reserves and interest to carry tax-exempt obligations of financial institutions, amortization of pollution control facilities, DISC, intangible drilling expenses of integrated oil companies, and mining exploration and development costs.

The corporate minimum tax was adjusted to prevent a double impact of the two provisions.

House bill

No provision.

Senate amendment

The Senate amendment generally increases the preference cutback from 15 to 20 percent, including a similar adjustment to the new Foreign Sales Corporation provision. The Senate amendment makes a corresponding adjustment to the corporate minimum tax. The cutback in the depletion allowance for coal and iron ore remains unchanged.

The provision applies to taxable years beginning after, and transactions after, December 31, 1984.

Conference agreement

The conference agreement follows the Senate amendment.

E. Partnership Provisions

1. Shifting of income, gain, loss, and deduction when partnership interests change

Present law

Contributions

Under present law (sec. 704(c)), when property is contributed to a partnership, depreciation, depletion, or gain or loss with respect to the contributed property may be shared among the partners so as to take account of the variation between the basis of the property to the partnership and its fair market value at the time of contribution (i.e., the built-in gain or loss on the property). If the partnership does not make allocations on this basis, the allocations are made as if the property had been purchased by the partnership. It generally is thought that a portion of the built-in gain or loss that would have been realized by the contributing partner if he had sold the property may be shifted to the other partners.

Retroactive allocations

The Tax Reform Act of 1976 amended the partnership provisions to preclude a partner who acquires his interest late in the taxable year from taking into account partnership items incurred prior to his entry into the partnership ("retroactive allocations" of partnership losses). The 1976 Act provided that when partners' interests change during the taxable year, each partner's share of various items of partnership income gain, loss, deduction, and credit is to be determined by taking into account each partner's varying interest in the partnership during the taxable year.

Some taxpayers argue that the 1976 Act rule may be avoided in the case of tiered partnership arrangements on the theory that losses sustained by the lower-tier partnership are allocable to the day in the upper-tier partnership's taxable year on which the lower-tier partnership's taxable year closes. Similarly, partnerships using the cash receipts and disbursements method of accounting have avoided the retroactive allocation rules by deferring actual payment of accrued deductions until near the end of the partnership's taxable year.

House bill

Contributions

Under the House bill, depreciation, depletion, and gain or loss with respect to contributed property are to be shared among the partners, pursuant to Treasury regulations, so as to take account of the difference between the partnership's basis for the property and the fair market value of the property at the time of contribution. The report of the House committee anticipates that the regulations under this provision generally will provide for the same result that is achieved under present law when a partnership elects to provide for sharing of depreciation, depletion, and gain or loss among the partners so as to take into account fully the difference between the basis and fair market value of the property contributed to the partnership (at the time of the contribution). Thus, it will not be possible to shift built-in gain or loss from the contributing partner to the other partners.

The provision is effective with respect to property contributed to a partnership after March 31, 1984.

Retroactive allocations

The House bill provides that if any partner's interest in a partnership changes at any time during the partnership's taxable year, each partner's share of each item of partnership income, gain, loss, deduction, and credit is to be determined by using any method prescribed by Treasury regulations which takes into account the varying interests of the partners in the partnership during the taxable year. Unless these regulations provide otherwise, the House bill requires, in the case of cash-method partnerships, that interest, taxes, payments for services or use of property, and any other item specified in regulations be assigned to each day in the period to which it is attributable (i.e., to the day or days in such period to which such item would accrue if such partnership were on the accrual method) and allocated among the partners in proportion to their interests in the partnership at the close of each day.

In the case of tiered partnerships, the bill provides that the upper-tier partnership's share of any item of income, gain, loss, deduction, or credit of the lower-tier partnership will, except as otherwise provided in regulations, be prorated equally over the portion of the taxable year during which the upper-tier partnership had an interest in the subsidiary.

The provision applies to items attributable to periods after, or amounts paid or accrued after, March 31, 1984.

Senate amendment

Contributions

The Senate amendment is the same as the House bill with respect to the partner's share of depreciation, depletion, and gain or loss on property contributed to a partnership.

Retroactive allocations

The Senate amendment generally is the same as the House bill with respect to retroactive allocations of partnership items, except that the amendment explicitly provides that when there is a disposition of less than an entire interest in a partnership by a partner (including entry of a new partner), the partnership may elect (on an annual basis) to determine the varying interests of the partners by using a monthly convention that treats any changes in any partner's interest as occurring on the first day of the month.

Conference agreement

The conference agreement follows the House bill and the Senate amendment with modifications to eliminate gaps in the provisions identified by the conference committee.

Contributions

Under the conference agreement, the Secretary is provided with authority to require items of income, gain, loss, and deduction with respect to contributed property to be shared among the partners to take account of the variation between the basis and fair market value of such property at the time of contribution. By making reference to items of income and deduction, the conferees do not intend for the Treasury to require such variations to be eliminated by allocations of operating income and loss attributable to the contributed property (other than depreciation, depletion, and similar items). Rather, the conference agreement intends to address situations in which a partner on the cash receipts and disbursements method of accounting contributes accounts receivable, accounts payable, or other accrued but unpaid items to a partnership that uses the same method of accounting. Thus, for example, if a cash-method taxpayer contributes accounts payable to a cash-method partnership, the deductions attributable to those items generally will be allocated to the contributing partner if possible, and if not, capitalized (see the discussion of retroactive allocations below). The committee intends that, similar to the amendments recently made to section 357(c) (and contrary to Rev. Rul. 60-345, 1960-2 C.B. 211), these accrued but unpaid items should not be treated as partnership liabilities for purposes of section 752. The conferees expect that the Treasury will provide regulations to cover situations in which the partnership is on the accrual method of accounting. These changes, and the changes contained in new section 724, are not intended to override the anticipatory assignment of income doctrine in those situations in which such doctrine would apply to a cash-method partner's contribution of accrued but unpaid items to a partnership. *See*, e.g., Rev. Rul. 80-198, 1980-2 C.B. 113 and Rev. Rul. 80-199, 1982-2 C.B. 122, and the cases cited therein. These changes compliment, and are consistent with, the modifications to the retroactive allocation provisions adopted by the conferees which prevent a cash-method partnership from shifting its accrued deductions to partners who are admitted to the partnership after such deductions are accrued.

The conferees are concerned with complexities that may arise in applying this new rule to allocations of depreciation and depletion. In this regard, the conferees note that the report of the Senate committee suggests ways in which the Treasury might provide for flexibility in applying the new rule (for example, in the case of small operating partnerships) when no tax avoidance potential exists. The conferees intend that this language be read as illustrative of, rather than as a limitation on, the Secretary's authority to provide reasonable rules as long as no abuse potential is present. For example, the conferees recognize that the Secretary may decide to require taxpayers to allocate only the built-in gain or loss on contributed property under new section 704(c) and permit allocations of depreciation, depletion, or similar items with respect to such property, to be governed by section 704(b), provided this flexibility is not likely to result in the contributing partner avoiding the effect of the allocation of built-in gain or loss (such as when the property is expected to be held by the partnership until it has little, if any fair market value). Although partnerships may continue to rely on the regulations issued under present section 704(c)(2) until new regulations are proposed, the conference agreement provides authority for the Secretary to significantly modify or expand those rules. Those modified regulations may take into account situations not addressed by the current rules, including those involving contributions of (1) more than one item of property with built-in gain or loss by a single partner, (2) property with built-in gain or loss by more than one partner, (3) property with built-in gain that would constitute ordinary income under the various recapture provisions, (4) property which is disposed of by the partnership for "substituted basis" transaction as defined in new section 7701(a)(42), (5) property when there are disproportionate profit and loss sharing arrangements contained in the partnership agreement, and (6) property which is not disposed of prior to the contributing partner's disposition of his partnership interest.
