Removing all EIN numbers (from id and origin.id) using Arbortext

1. Go to Find menu
2. Select Find/Replace Attributes...
3. Fill it out as follows (10 dots for Value)
4. Replace All
5. Repeat the same process for origin.id

The screenshot shows the Arbortext software interface. The main window displays a document with XML tags and text. The text is about Greece, mentioning its location, population, and official language. The XML tags are highlighted in yellow, showing attributes like 'id' and 'origin.id'. A dialog box titled 'Replace Attribute - 7142-2_A_1_DA_fcp_20102163603' is open, showing the 'Find' section with 'Attributes' set to 'id' and 'Value' set to '.....'. The 'Replace With' section is empty. The 'Value Search Options' section has 'Match Patterns' checked. The 'Direction' section has 'Down' selected. The 'Found' section is empty.
